INTRODUCTION

Community colleges aren't just the key to the future of their students. They're also one of the keys to the future of our country. We are in a global competition to lead in the growth industries of the 21st century. And that leadership depends on a well-educated, highly skilled workforce. We know, for example, that in the coming years, jobs requiring at least an associate degree are going to grow twice as fast as jobs that don't require college. We will not fill those jobs – or keep those jobs on our shores – without community colleges. – Barack Obama, White House Summit on Community Colleges (White House, 2010).

Increasing the number of college graduates has emerged as a national priority. Additional college graduates are sought to stimulate the economy and improve the United State's position in an increasingly competitive world marketplace. Recent Organization for Economic Cooperation and Development (OCED) international comparisons show the United States (US) as 10th in the world in college attainment (OCED, 2010). The US initially dropped from the top position in college attainment in OCED's 2000 report (National Center for Policy Analysis, 2000).

While details of initiatives differ, the Obama Administration, major national foundations, and multiple leading associations have identified a need for higher education institutions to produce more graduates. The Obama Administration set a goal to have the highest proportion of college graduates in the world by the year 2020. The American Graduation Initiative calls for the production of five million additional graduates by 2020. (Brandon, 2009. & National Center for Policy Analysis, 2000). The Lumina Foundation and the Bill & Melinda Gates Foundation have made increasing higher education attainment as measured by the production of additional degrees and certificates a top priority. The Lumina Foundation policy initiative has a goal of increasing the “percentage of Americans with high quality degrees and credentials from 39 percent to 60 percent” by 2025 (Nauffts, 2009). The Gates Foundation seeks to “double the number of young people who earn a postsecondary degree or certificate with value in the marketplace by the time they reach age 26” (Bill & Melinda Gates Foundation. 2009b). The Commission on Access, Admissions and Success in Higher Education's goal is to increase the proportion of 25 to 34 year-olds who hold an Associate degree of higher to 55 percent by the year 2025 to re-establish the United States as the leader in educational attainment in the world (Lee, Jr. & Rawls, 2010). Six major community college organizations pledged to increase college completion rates by 50 percent by 2020. The groups endorsing the “pledge” include the American Association of Community Colleges, Association of Community College Trustees, Center for Community College Student Engagement, League for Innovation in the Community College, National Institute for Staff & Organization Development and Phi Theta Kappa Honor Society (Moltz, 2010).

In keeping with the national call for action, in 2010 under Governor Quinn's leadership, Illinois was in the first group of states to join Complete College America (CCA). Participating CCA states agree to set state and local completion goals, create action plans and implement policy changes to meet them and generate information on the CCA metrics. At the time of publication, 24 states have signed up to make college completion and the production of additional college graduates a top priority <http://www.completecollege.org/>. CCA is partnering with the National Governors Association (NGA) on the initiative to encourage and promote college completion. NGA's parallel initiative is called Complete to Compete (Reyna, 2010) <http://www.subnet.nga.org/ci/1011/resources.htm>. Additional partners in the development of a set of common metrics include the National Center for Higher Education Management Systems (NCHEMS) and the State Higher Education Executive Officers (SHEEO).

Student Enrollments & Completions Fiscal Year 2010

Aiming to increase the number and rate of college graduates, the partners developed a series of metrics under three categories: Progress, Outcomes and Context. Progress metrics include: enrollment in remedial education (Math only, English\Reading only; both Math and English\Reading); success after remedial education; success in first year college courses (gateway courses); credit accumulation; retention rates; and course completion. Outcome metrics include: degree\certificate production; graduation rates; transfer out rates (for community colleges only); credits and time to degree. Context metrics include: annual enrollment; completion ratio; and market penetration. Several different breakouts are requested including: race\ethnicity, gender, age by range, Pell recipient status, and student status (e.g., first-time full-time, first time part-time, transfer at time of entry). Further refinements to the metrics may occur following the initial data collection. Until the metrics have been compiled, the Complete College America website provides summary college completion information by state based on publically available data (http://www.completecollege.org/state_data/ & <http://www.completecollege.org/docs/Illinois.pdf>).

Highlights of recent CCA activities include the following milestones. The initial CCA cross state meeting took place in June 2010. States provided preliminary goals in September 2010. Fall Academy meetings were held by CCA officials for selected states in October 2010 and preliminary state level data on the metrics were provided in December 2010. Illinois Community College Board (ICCB) staff collaborated with the colleges to generate initial information for Illinois community colleges. Illinois Board of Higher Education (IBHE) staff gathered similar data that public universities produced locally and compiled the information before forwarding it to CCA officials. In 2010, overall Illinois community colleges exceeded the preliminary statewide goal. Moving forward, a CCA hosted Spring Academy is scheduled for selected states in March 2011, and a summer 2011 statewide workshop will be held in Illinois to highlight promising practices and promote college completion. The second round of data will be submitted by states in December 2011.

Community colleges are committed to helping individuals attain credentials. In addition to serving individuals with the goal of graduating, community colleges also help individuals who need to: strengthen their foundational skills (adult education, English as a Second Language and developmental education), acquire specific career and technical skills for entry or advancement in the workforce and transfer to four-year colleges or universities.

The Annual Enrollment and Completion (A1) submission is a major source of the community college data for the CCA metrics. A1 data are reported for individuals who are officially enrolled at the college in credit coursework at any time during the specified fiscal year. This year's Annual Enrollment and Completion Report is based on fiscal year 2010 enrollments and completions. Comparative information is supplied from four previous fiscal years (2006-2009). Detailed tables comparing fiscal year 2009 and fiscal year 2010 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. FTE enrollments in this report are based on all credit hours attempted (including non-reimbursable credit hours). Thirty credit hours equal one FTE. Additionally, noncredit courses provide another approach to the delivery of education, training, and public service by community colleges. Therefore, the Annual Enrollment and Completion Report include information about noncredit offerings for the current year (2010) and the four previous fiscal years (2006-2009). Since fiscal year 1999, the Illinois Community College System has been submitting a Noncredit Enrollment (N1) annual data containing demographic and course information on the wide range of noncredit instruction they provide. The following pages contain additional information about annual credit and noncredit enrollments and credit completions.

HIGHLIGHTS OF FISCAL YEAR 2010 ANNUAL REPORT
Student Enrollments

- The Illinois Community College System served nearly **one million (985,010) students** in credit and noncredit courses during fiscal year 2010. Overall combined enrollments increased compared to last year (+3.2 percent, N = +30,614).
- **Credit-generating** students accounted for **74.1 percent** of the overall fiscal year 2010 headcount.
- During fiscal year 2010, the 48 public community colleges in Illinois enrolled **730,335** students in instructional credit courses. This is higher than the previous year (700,072). The full-time equivalent (FTE) enrollment was 273,344, an increase of 9.2 percent since fiscal year 2009.
- Statewide, **24,479 noncredit course sections** were conducted during fiscal year 2010.
- From fiscal year 2009 to fiscal year 2010, the number of individuals receiving instruction through **noncredit course** offerings increased slightly (0.1 percent) to **254,675 students**.
- Statewide, 33,428 of 985,010 total students enrolled in both credit and noncredit courses during fiscal year 2010 (A1 and N1). While there is some overlap, these data suggest that **credit and noncredit courses are meeting largely different student and community needs**.
- Females comprised 54.7 percent of the fiscal year 2010 student population enrolled in credit-generating programs.
- **Minority (non-white) students accounted for over one-third** (37.0 percent) of the credit students enrolled. African American student representation increased (11.1 percent) and accounted for 15.6 percent of all credit students. Latino student representation decreased to 16.1 percent. Asian student representation increased slightly from the previous year to 4.5 percent, while foreign/nonresident alien representation decreased to 0.4 percent.
- The median age of credit-generating students was **25.4** during fiscal year 2010, a slight decrease from the previous year. The average age decreased to **30.5** years.
- **Baccalaureate/transfer** remained the largest credit instructional program area **enrolling 40.4 percent** of fiscal year 2010 Illinois Community College System students. Enrollments in baccalaureate/transfer programs increased 7.3 percent compared to the previous year.
- Statewide, career and technical education credit program enrollments accounted for **more than one-quarter** of all credit students (28.2 percent). Enrollments in career and technical programs increased 9.6 percent from last year.
- Although 40.4 percent of the fiscal year 2010 credit student population was enrolled in the baccalaureate/transfer area, only 34.0 percent of all students indicated intent to transfer.
- Students enrolled in **adult education** courses in community colleges comprised **14.5 percent** of the credit-generating students. Enrollment in adult education decreased by 4.0 percent versus fiscal year 2009.
- Of the students in adult education, approximately **53.9 percent** were enrolled in **English as a Second Language** (ESL) courses.
- **Nearly one-half** (47.7 percent) of the fiscal year 2010 credit students enrolled in the colleges indicated that they were not pursuing a degree, but **attending to complete one or several courses**. Participation in college to take courses instead of pursuing a degree or certificate remained similar compared to the previous year.
- **About two out of three credit students attended on a part-time basis** during both the fall (64.7 percent) and spring (67.2 percent) semesters in fiscal year 2010.

HIGHLIGHTS OF FISCAL YEAR 2010 ANNUAL REPORT
(Continued)
Student Enrollments

- Nearly 19 percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes **36,008 who earned a bachelors degree or higher**.
- Illinois community college students were enrolled in **8,200,327 credit hours throughout fiscal year 2010** and earned 77.4 percent of those hours.
- Accumulated credit hours were available for 74.6 percent of the fiscal year 2010 student population. Just over one third of them (34.8 percent) attained **sophomore-level** status by accumulating 30 or more college-level hours.
- Cumulative grade point average data was reported for 70.2 percent of the fiscal year 2010 students. **Nearly one-half (46.9 percent) held an A-B average**.
- In fiscal year 2010, Illinois community college students earned 65.3 percent of the remedial credits they attempted. This percentage is up from 64.2 percent in fiscal year 2009.
- In fiscal year 2010, more than **one-fifth** (21.1 percent) of Illinois community college students (not enrolled in ABE/ASE/ESL, Vocational Skills, and General Studies) were enrolled in at least one developmental course – an increase from fiscal year 2009.
- **Noncredit** course enrollment figures for fiscal year 2010 are from the **Noncredit Course Enrollment Data** submission (N1).
- **Over one-half of the 2010 noncredit courses were held on main college campuses** (57.3 percent).
- Fiscal year 2010 unduplicated noncredit headcount increased 0.1 percent over last year. The duplicated headcount or “seatcount” was 7.2 percent lower than the previous year.
- 24,479 noncredit course sections were conducted during fiscal year 2010.
- **Female** students accounted for **55.3 percent** of 2010 noncredit enrollments for which gender data were reported.
- **Minority students accounted for almost one-third** (31.2 percent) of the individuals enrolled in noncredit courses who supplied racial/ethnic data.
- The median age of **noncredit** students was **37.9** during fiscal year 2010. The average age was **40.8** years.
- Nearly **one-half** of the noncredit students were **40 years of age or above** among the individuals who supplied this information.
- Nearly 60 percent of the noncredit offerings (duplicated) were in the Personal and Social Development category of activity. **Over one-quarter** of the noncredit coursework was dedicated to developing **workplace skills**: Professional/vocational (20.7 percent) and Business and Industry Contractual training (5.4 percent).
- Across all categories of activity, ten broad course areas (two-digit CIP) had over 6,000 noncredit students enrolled. **These ten areas accounted for more than two-thirds of the students enrolled in noncredit courses** with CIP data (73.7 percent). Approximately four out of ten enrollments in these large CIPs were in work-related courses: Transportation Workers (15.0 percent), Business Management (13.5 percent), Health Professions (6.8 percent), Education (5.8 percent), and Computer Information Systems (2.8 percent).

HIGHLIGHTS OF FISCAL YEAR 2010 ANNUAL REPORT

(Continued)

Student Completions

- A total of **56,884** collegiate-level **degrees and certificates** were awarded to Illinois community college students in fiscal year 2010.
- The number of community college completions in fiscal year 2010 is the **highest count ever reported**. Community colleges sustained an elevated level of completions during fiscal year 2010.
- The number of degrees and certificates awarded **increased 7.2 percent from fiscal year 2009** (+ 3,831 completers). Taking a longer view – compared to fiscal year 2006 – the total number of fiscal year 2010 completions increased 14.6 percent
- **Career and Technical Education** accounted for the **largest number of graduates** (N = 39,581) in fiscal year 2010. Two-thirds of the earned degrees and certificates were in Career and Technical Education programs during fiscal year 2010 (69.6 percent). Career completions increased 7.6 percent from last year.
- **Baccalaureate/transfer degrees** accounted for the **second largest** group of completers in fiscal year 2010 (N = 15,994). Nearly three out of every ten graduates earned Baccalaureate/Transfer degrees (28.1 percent). The number of Transfer degrees increased 7.3 percent (+1,086) from last year.
- Approximately 26.7 percent of the career and technical education awards in fiscal year 2010 were AAS degrees.
- **Females** accounted for **56.7 percent** of all 2010 completions.
- **Career and Technical Education Certificates of Less Than One Year** accounted for the **largest number** of male (N = 11,570) and female (N = 11,679) completers of a specific degree or certificate.
- Although small in number, the Associate in Engineering Science (N = 104) had the highest proportion of male graduates (86.5 percent, N = 90).
- **Minority students earned about 30 percent of the collegiate-level degrees and certificates awarded** in the Illinois Community College System during fiscal year 2010. African American students earned 14.8 percent, Latino students earned 9.9 percent, and Asian students earned 5.2 percent of all degrees and certificates.
- Minorities accounted for about 23.2 percent of total Transfer degree recipients.
- Nearly four times as many minority graduates completed Career and Technical Education degrees and certificates (N = 13,192) were awarded compared to baccalaureate/transfer degrees (N = 3,717).
- Among the largest minority groups, African American students completed 2,794 more collegiate-level awards than Latino students.
- Fourteen percent of the students who were awarded degrees and certificates during fiscal year 2010 were less than 21 years of age. **The age groups with the largest percentages of graduates were 21 to 24 (30.9 percent), 25 to 30 (17.8 percent), and 40 to 55 years of age (16.1 percent).**
- Almost three-quarters of the Transfer degree completers in 2010 indicated intent to transfer to a four-year institution. Approximately 18.8 percent of fiscal year 2010 Associate in Applied Science degree graduates indicated goals to complete some courses or finish a certificate.

OVERALL FISCAL YEAR 2010 STUDENT ENROLLMENTS

The Illinois Community College System recorded a total approaching **one million (985,010) students** in credit and noncredit courses during fiscal year 2010. Overall combined enrollments increased compared to last year (+3.2 percent, N = +30,614).

Table 1 provides a summary comparison of fiscal year 2006 through fiscal year 2010 credit and noncredit unduplicated enrollments. Total enrollments reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

Table 1 SUMMARY COMPARISON OF ANNUAL ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2006-2010					
Unduplicated Headcount	FY06	FY07	FY08	FY09	FY10
Credit	682,623	684,964	682,607	700,072	730,335
% Change	-2.3%	0.3%	-0.3%	2.6%	4.3%
Noncredit	254,280	247,424	251,033	254,324	254,675
% Change	-1.5%	-2.7%	1.5%	1.3%	0.1%
Total*	936,903	932,388	933,640	954,396	985,010
% Change	-2.1%	-0.5%	0.1%	2.2%	3.2%

*Individuals may be concurrently enrolled in credit and noncredit courses

SOURCES OF DATA: Annual Enrollment (A1) Records
Annual Noncredit Course Enrollment (N1) Records

Detailed comparisons of fiscal year 2006 through fiscal year 2010 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

As depicted in Figure 1, credit-generating students account for 74.1 percent of the overall fiscal year 2010 headcount. Over the past three years, the credit-generating proportion has been increasing, while the noncredit proportion has remained relatively stable. Long-term noncredit enrollments are trending downward, while short-term noncredit enrollments are showing a slight recovery.

Fig. 1. Overall Annual Enrollments, FY 2006-2010

Statewide, 33,428 of 985,010 total enrolled in both credit and noncredit courses during fiscal year 2010 (A1 and N1). While there is some minimal overlap (3.4 percent), credit and noncredit courses are meeting largely different student and community needs.

FISCAL YEAR 2010 STUDENT CREDIT ENROLLMENTS

Student Credit Enrollment by Community College

Annual credit enrollment for fiscal year 2010 was 730,335, and full-time equivalent (FTE) students totaled 273,344. Table 2 contains comparative enrollment data for the last five years. Fiscal year 2010 saw a 4.3 percent increase in credit headcount enrollment from the previous year. Fiscal year 2010 FTE enrollment increased by about 9.2 percent compared to last year. Compared to five years ago, fiscal year 2010 credit headcount enrollments increased by 7.0 percent. FTE enrollments have increased 14.1 percent since 2006. Historically, fiscal year 2010 credit headcount enrollments were at their highest since fiscal year 1992 (N = 727,310).

Table A-1 in the Appendix provides a comparison of fiscal year 2006 through fiscal year 2010 headcount enrollments for each community college. Among Illinois' 48 community colleges, 36 colleges reported increases in headcount while 7 exhibited decreases compared to fiscal year 2009. Five colleges experienced little or no change (1.0 percent or less) during fiscal year 2010. Table A-2 contains a comparison of full-time equivalent (FTE) enrollments for fiscal years 2006 through 2010. FTE calculations convert the substantial part-time enrollment into the number of students there would be if everyone attended on a full-time basis. Over the last year, 44 colleges experienced increases in FTE, 3 reported decreases, and 1 college experienced little or no FTE change versus fiscal year 2009.

Table 2 COMPARISON OF ANNUAL CREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2006-2010					
	<u>FY06</u>	<u>FY07</u>	<u>FY08</u>	<u>FY09</u>	<u>FY10</u>
Headcount	682,623	684,964	682,607	700,702	730,335
% Change	-2.3%	0.3%	-0.3%	2.6%	4.3%
FTE	239,534	238,288	239,881	250,328	273,344
% Change	-2.1%	-0.5%	0.7%	4.4%	9.2%

SOURCE OF DATA: Annual Enrollment (A1) Records

Male/Female Distribution

The male/female distribution of credit students typically fluctuates little from year to year with female students consistently constituting a slight majority. Females comprised 54.7 percent of the student population in fiscal year 2010. The percentage of male students has averaged 44.9 percent over the past five years (see Table A-3).

Ethnic Origin

In fiscal year 2010, one-third (37.0 percent) of those participating in credit coursework in community colleges were minority (non-white) students. Minority representation increased by 4.8 percent from fiscal year 2009 to fiscal year 2010. Similarly, during the past five years, students from minority groups comprised an average of just over one-third (35.8 percent) of the student population. Latino students (now numbering 114,437) became the largest minority group in 2000, followed by African American students (now numbering 110,432). Compared to last year, increases were noted in credit headcount enrollments among African Americans and Latinos. In fiscal year

2010, the number of Latino credit students enrolled increased by 1.9 percent and the number of African American students enrolled in Illinois community college credit courses increased by 11.1 percent (see Table A-4).

Student Age

In fiscal year 2010, the average age of Illinois community college students in credit courses was 30.5 years which is lower than fiscal year 2009 (N = 30.7 years). The median age was 25.4 years which is just lower than last year (25.5). The largest proportion of students – over one-quarter (26.2 percent) – were between age 17 and 20, an increase of 4.6 percent over fiscal year 2009. The second largest proportion of students – just over one-fifth (21.0 percent) – were ages 21 through 24, an increase of 6.5 percent over fiscal year 2009. The third largest proportion of students (16.9 percent) were 40 through 55 years of age, which is the same as fiscal year 2009. During fiscal year 2010, 15.4 percent were age 25 through 30 and 14.0 percent of students were age 31 through 39. Always the smallest in size, the 16 and under age group decreased 3.3 percent, representing only 1.4 percent of the student population in fiscal year 2010. Dual credit and dual enrollment arrangements where high achieving high school students are allowed to enroll in college-level courses is contributing to enrollment among the younger student populations (see Table A-5).

Summary of Enrollments by Instructional Program Area

Short-term, fiscal year 2010 enrollment increased in one half of the instructional program areas. Increases ranged from 7.3 percent in Baccalaureate/Transfer to 18.6 percent in General Associate. Career and Technical Education increased 9.6 percent. Adult Education and English as a second language (-4.0 percent), Vocational Skills (-6.0 percent), and General Studies Certificate (-53.0 percent) all saw decreases from fiscal year 2009. Longer term, between fiscal years 2006 and 2010 results were mixed as four of the instructional program

areas registered growth – General Associate, Baccalaureate/Transfer, Career and Technical Education, and Vocational Skills – while the other two reported enrollment declines – General Studies Certificate and Adult Education and English as a Second Language (ESL).

Baccalaureate/transfer is the largest instructional program offered in the Illinois Community College System accounting for four out every ten credit students. This program is designed to provide individuals with the equivalent of the initial two years of a bachelors degree. Statewide, enrollment in this program area has increased over the past year (7.3 percent) and is up 8.2 percent between fiscal years 2006 to 2010.

Career and Technical Education programs are the second largest credit program in the Illinois Community College System accounting for over one-quarter of all credit enrollments. Career and Technical Education enrollments have increased 9.6 percent compared to last year and are up 9.4 percent since 2006. In the past year, enrollment in **Vocational Skills** programs decreased by 6.0 percent and enrollment in **General Studies Certificates** decreased by 53.0 percent. Enrollment in **General Associate Degree** programs increased by 18.6 percent in fiscal year 2010 (see Table A-6a).

Students enrolled in community college **Adult Education** courses comprised 14.5 percent of the credit generating students in fiscal year 2010. Hence, less than one out of six community college students are enrolled in Adult Education skills building coursework. Statewide, there was a 4.0 percent decrease in Adult Education enrollments over the previous year and community college Adult Education enrollments are down 6.2 percent since fiscal year 2006. In fiscal year 2010, 53.9 percent of the students in adult education were enrolled in English as a Second Language (ESL) courses.

The City Colleges of Chicago accounted for over one-third (38.1 percent) of statewide community college Adult Education enrollments in fiscal year 2010. Adult Education enrollment at the City Colleges of Chicago decreased compared to last year (-1.0 percent). This is compared to the short-term increase in overall enrollment (7.4 percent) at the City Colleges of Chicago. Excluding the City Colleges of Chicago, there was a 5.8 percent decrease in Adult Education enrollment in fiscal year 2010 compared to last year. (see Table A-6a and A-6b).

Longer term, excluding the City Colleges of Chicago, the rest of the system experienced an overall increase in enrollments (6.5 percent) between 2006 and 2010. Looking back across five years, analysis of instructional program area information and excluding City Colleges of Chicago data shows similar results for the rest of the system. The small General Associate programs recorded 45.4 percent growth excluding the City Colleges of Chicago. An increase was exhibited in Baccalaureate/transfer programs (8.5 percent) between fiscal years 2006 and 2010. There was an increase in Career and Technical Education (10.3 percent) program enrollment and in Vocational Skills (4.9 percent) enrollment. General Studies Certificate enrollments were down long term (-64.6 percent) without the City Colleges. Long-term results in Adult Education were down moderately across the rest of the system (-7.8 percent). (See Table A-6b)

Instructional Program Enrollments by Gender. During fiscal year 2010, females outnumbered males in all instructional areas; the Career and Technical Education programs contained the highest proportion of male students (49.4 percent). The highest proportion of female students were enrolled in the General Studies Certificate program (60.1 percent) followed by the General Associate degree program (60.0 percent) and Baccalaureate/Transfer programs (57.0 percent). The English as a Second Language programs consisted of 56.8 percent female students,

while 54.1 percent of those enrolled in Vocational programs and 50.7 percent of those enrolled in Adult Education programs were female (see Table A-7).

Fig. 2. FY 2010 Minority Enrollments in Baccalaureate/Transfer and Career and Technical Education Programs

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 2 illustrates the distribution of minorities in the two largest program areas, Baccalaureate/transfer and Career and Technical Education. An examination of each racial/ethnic group's representation across program areas in fiscal year 2010 indicates that the largest percentage of Asian (43.8 percent), White (44.1 percent), Native American (42.6 percent), Nonresident Alien students (58.3 percent), and African American (39.9 percent) were enrolled in Baccalaureate/transfer programs. The highest percentage of Latino (34.7 percent) students were enrolled in English as a Second Language programs. Overall, minority students were least represented in the vocational skills (11.9

percent), career and technical education (28.6 percent), baccalaureate/transfer (30.5 percent), and general studies certificate (38.7 percent) areas (see Table A-8).

Instructional Program Enrollments by Age. During fiscal year 2010, nearly one-half of community college credit students were under 25 years of age (48.3 percent). More than half of the students under 25 were enrolled in Baccalaureate/transfer programs (55.4 percent). Almost three out of every ten (29.2 percent) credit students were between 25-39 years of age. Two program areas account for the largest portion of students between 25 and 39 years of age: Career and Technical Education (32.5 percent) and Baccalaureate/transfer (30.6percent). Overall, over one-fifth of Illinois' community college credit students were at least 40 years of age (22.0 percent). Among students 40 years of age and above, most were primarily enrolled in workforce related courses (57.2 percent) which includes Career and Technical Education (31.0 percent) and short-term intensive Vocational Skills (26.2 percent) courses. About one-fifth of the students 40 and above were pursuing Baccalaureate/transfer programs (20.8 percent) (see Table A-9).

Largest Career and Technical Programs. The largest Career and Technical Education curricula included Associate Degree in Nursing, Child Care Provider, Criminal Justice Technology, Nursing Assistant, and Business Administration and Management in fiscal year 2010. With 17,522 students in fiscal year 2010, Associate Degree Nursing/Registered Nursing remained the largest program. Enrollment increased by 9.4 percent (+1,506 students) over last year. RN program enrollments represent individuals who are pursuing the program but are not limited to individuals who have been formally admitted to the program. Child Care Provider/Assistant remained the second largest program with an increase of 7.8 percent (+481 students). Criminal Justice increased (24.0 percent; +1,265 students) and remained the third

largest program in 2010. Certified Nursing Assistant (CNA) enrollments increased 16.5 percent (+749 students) in 2010 and remained the fourth largest program, while Business Administration and Management increased 6.2 percent (+272 students) and was the fifth largest program in fiscal year 2010. (see Table A-10) .

Instructional Program Enrollments by Intent. Intent data provide the primary goal that the student plans to achieve as a result of her/his studies. Initial intent data are self-reported by students when the student first enrolls at the college. College staff are asked to require students to update goal information each semester and provide a current intent, as well as retaining the student's original entry intent. Nearly three out of ten students reported a workforce goal which includes preparing for a job immediately after community college program completion (17.1 percent) and improving skills for a current position (12.7 percent). Slightly more students report a goal of preparing for transfer to a four-year institution (34.0 percent). GED preparation was the goal for 13.4 percent of the students.

In an examination of student intent by program area. Over one-half of the students in Adult Education, Career and Technical Education, Baccalaureate/transfer and Vocational Skills programs reported the goal that is most often associated with a given major. More than three-quarters of the ABE/ASE and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for enrolling in these programs. Fifty-four percent of students in Career and Technical programs enrolled with the intent of preparing for a job after community college or to improve their job skills for their current position. Sixty percent of the students enrolled in Baccalaureate/ transfer programs indicated an intent to transfer to a four-year institution. Sixty-four percent of the Vocational students enrolled with the intent of preparing for a job after community college or to improve job skills for their present position (see Table A-11).

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 2010, nearly one half of community college students indicated that they were attending to complete courses rather than formal awards. Nearly 48 percent of all students indicated that they were enrolling with no intention of pursuing a degree — only to complete one or several courses. Figure 3 contains information on degree objective for the two largest community college programs. Baccalaureate/transfer students were split between degree seekers (61.3 percent) and course takers (36.1 percent). A small contingent of students in Baccalaureate/transfer programs indicated an interest in completing a certificate which would entail changing to a career or general studies major. Less than half (44.9 percent) of the Career and Technical Education students indicated they expected to complete an associate degree, while 31.5 percent expected to complete one or several courses. Nearly one in four plan to complete a certificate. Many Career and Technical students plan to complete an entire program, while others simply want to improve their current skills or obtain new skills to enter a different career. More than nine out of ten students in the following program areas planned to only complete one or several courses: General Studies, ESL, Vocational, and ABE/ASE (95.4; 95.1; 94.4; and 93.5 percent, respectively). (See Table A-12).

Enrollment Hours by Term and Type of Attendance

Part-time attendance is prevalent among community college students who are often simultaneously engaged with college coursework, careers, and family responsibilities. During the fall semester, nearly two-thirds (64.7 percent) of the students attended on a part-time basis (less than 12 credit hours). The part-time proportion was slightly higher (67.2 percent) in the spring. In a pattern not typical among higher education institutions, Illinois community college enrollment

during the spring semester (450,056) was actually slightly higher than in the fall (431,307). More than nine out of ten students (91.5 percent) attended on a part-time basis during the summer term of fiscal year 2010 (less than nine credit hours). (See Table A-13).

Fig. 3. Degree Objective for Baccalaureate/Transfer and Career and Technical Education, FY 2010

Highest Degree Earned by Students Prior to Attending Community College

The prior earned degree data reiterate that community colleges serve diverse populations. Figure 4 illustrates the educational background of fiscal year 2010 students. Prior degree reporting is similar compared to last year with only two-thirds of the students providing this information (adult education students would typically not possess earned degrees). Just about two-thirds of the students entered the community college with a high school diploma/GED. Nearly nineteen percent earned some type of postsecondary certificate or degree. About 14 percent had already earned degrees at or beyond the community college level. Nearly 18 percent of the students had previously taken college coursework. (see Table A-14).

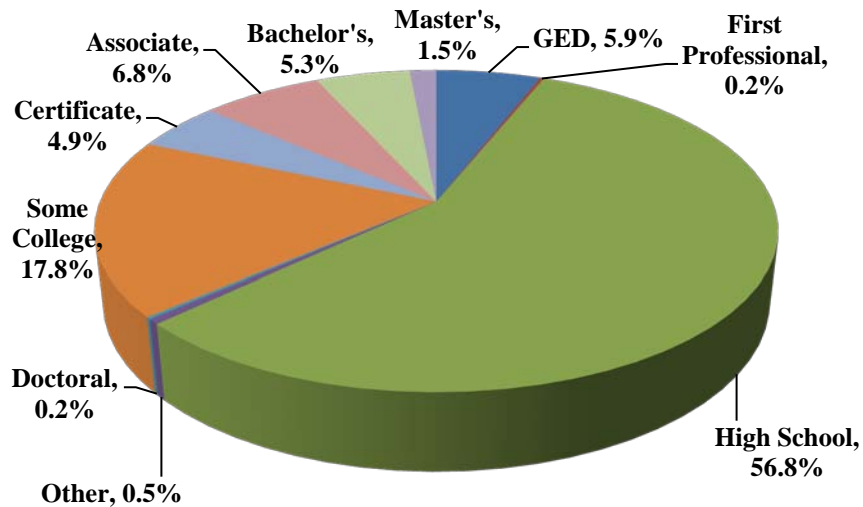

Fig. 4. Headcount Enrollment by Prior Highest Degree Earned, FY 2010

Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In fiscal year 2010, Illinois community college students completed over 6.3 million credit hours, which was 77.4 percent of the hours they attempted. Full-time and part-time students earned a similar percentage of the hours they attempted (see Table A-15).

Accumulated College-Level Credit Hours

Of the 544,808 students (74.6 percent) for whom data were available, nearly two-thirds (65.2 percent) had accumulated less than 30 college-level hours (freshman level). About one-fifth (20.5 percent) had accumulated between 30 to 59 credit hours (sophomore status), and 14.3 percent earned 60 or more credit hours (See Table A-16).

Grade Point Averages

Cumulative grade point average (GPA) data were available for 70.2 percent of the students enrolled in fiscal year 2010. Pre-college coursework does not generate GPA information. Over four out of five students had grade point averages of 2.01 or higher, which is a “C” average or above (83.1 percent). Nearly one-half of the students (46.9 percent) achieved grade point averages in the “B” to “A” range (3.01 to 4.00). The remaining one-third had achieved grade point averages in the “C” to “B” range (2.01 and 3.00). (See Table A-17).

High School Graduation Percentile Rank

High school class rank was reported for 16.0 percent of the fiscal year 2010 community college students. Of this population, 5.5 percent were in the top 10 percent of their graduating class, while 52.3 percent graduated in the top half of their class (see Table A-18).

ACT Scores of Community College Students

ACT score data were available for 17.5 percent of the students enrolled in fiscal year 2010. Sixty-two percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is frequently required for acceptance into many colleges or universities. For those fiscal year 2010 students from whom data were gathered, the average ACT score was 20.1. The median score was 20.0 (see Table A-19).

Developmental Enrollment

During fiscal year 2010, just under one-fifth (21.1 percent) of students enrolled in Illinois community colleges – not enrolled in ABE/ASE/ESL, Vocational Skills or General Studies – took at least one developmental course (115,842). This represents an increase of 17,434 students since last year when there were 98,408 students enrolled in developmental courses. Over the most recent five-year

period (2006-2010), the percent of students enrolled in at least one developmental course increased 18.5 percent. (See Table A-21).

Nationwide, according to the National Postsecondary Student Aid Study, 23.2 percent of the students enrolled in two-year public institutions took at least one developmental course (fiscal year 2000).

The appendices provide additional information on the academic area(s) in which students enrolled in developmental course work at Illinois community colleges for fiscal years 2006 through 2010. (See Table A-23). Generally, community college students enrolled in developmental courses required assistance in only one academic area. Most of the time the area was Mathematics. In fiscal year 2010, nearly 6 out of every 10 students participating in developmental coursework needed assistance in just Math (56.6 percent). Compared to last year, Math Only developmental enrollments increased 14.9 percent. Since fiscal year 2006, there was an increase of 13.8 percent among students with the need to take developmental Math exclusively. In fiscal year 2010, English Only comprised 8.0 percent of the population requiring developmental assistance. About 5.3 percent of the developmental course enrollments were in Reading Only. Reading difficulties are particularly problematic since they impede an individual's ability to acquire new knowledge through written documents which is a foundational skill in every academic course. Additionally, 4.6 percent of the fiscal year 2010 students who enrolled in developmental coursework took both English and Reading courses. Combinations of Math, English, and Reading developmental needs shows that more than four-fifths (82.2 percent) of community college students who enrolled in developmental courses required assistance with their Math skills – alone or in combination with other areas. From fiscal years 2009 to 2010, the population requiring help in Math – either alone or in combination with other areas – remained the same. Similarly long

term, the proportion of students requiring Math skills enhancement – either alone or combined with other areas - also remained the same.

Close to 9 percent of the students in developmental courses (N = 10,506) needed assistance in all three areas – Math, English, and Reading. Requiring assistance in all three areas is a particularly serious situation since weaknesses exist across the spectrum of skills required to acquire and process new information.

As depicted in Table A-22, overall during fiscal year 2010, Illinois Community College System students earned almost two-thirds (65.3 percent) of the developmental credits they attempted. This is a slight increase from fiscal year 2009 when students earned 64.2 percent of remedial credits attempted. Over the five-year period of 2006 to 2010, the percent of developmental credits earned has increased each year from 62.0 percent in 2006 to 65.3 percent in 2010. (see Table A-22).

FISCAL YEAR 2010 STUDENT NONCREDIT COURSE ENROLLMENTS

Student Noncredit Course Enrollment by Community College

Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. Fiscal year 1994 was the first year in which annual noncredit course enrollment data were collected. Beginning in fiscal year 2002, data are from the Noncredit Course Enrollment database (N1) which includes individual records for each student.

During fiscal year 2010, Illinois community colleges conducted 24,479 noncredit course sections, about 2.1 percent fewer than the previous year. From fiscal years 2006 to fiscal year 2010, the total number of course sections offered through the colleges decreased 7.3 percent. Despite a decrease in course offerings over the past five years, noncredit offerings continue to be an important part of college efforts to meet community and employer needs. Figure 5 illustrates that unduplicated student enrollments have been increasing since last fiscal year. During fiscal year 2010, the unduplicated noncredit headcount (in which students are counted only once, regardless of the number of noncredit courses in which they enroll) increased 0.1 percent. Over a longer time frame, unduplicated noncredit headcounts have increased 0.2 percent over the last five fiscal years. The duplicated headcount (also known as “seatcount”) during fiscal year 2010 was 7.2 percent lower than the previous fiscal year and 4.0 percent lower than five years earlier.

Table 3 COMPARISON OF ANNUAL NONCREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2006-2010					
	FY06	FY07	FY08	FY09	FY10
Unduplicated Headcount	254,280	247,424	251,033	254,324	254,675
% Change	-1.5%	-2.7%	1.5%	1.3%	0.1%
Duplicated Headcount	364,449	355,656	354,120	377,147	349,821
% Change	-1.4%	-2.4%	-0.4%	6.5%	-7.2%
Course Sections	26,411	25,934	25,161	25,016	24,479
% Change	-5.1%	-1.8%	-3.0%	-0.6%	-2.1%

SOURCES OF DATA: FY2006 - FY2010 Noncredit Course Enrollment Data submission (N1)

Fiscal year 2010 is the twelfth year that the Illinois Community College System has undertaken data collection through a noncredit course enrollment database (N1). The transition period from the paper survey to the database is complete.

The number of noncredit course offerings and enrollments at the community colleges often varies from year to year, depending on the needs of the surrounding communities. Comparisons of fiscal years 2006 through fiscal year 2010 noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3. Reasons for the recent declines in noncredit activity and participation vary by locality. Local community college budgets continue to be tight and, generally, noncredit courses are only offered if they break even or are profitable. Additionally, there has been some resurgent resistance to reporting individual participant data. Records are not added to the noncredit database unless the category of activity information is supplied – business/industry contract; professional/vocational development; personal/social development; and youth programs.

Fig. 5. Noncredit Course Enrollments, FY2006-2010

Characteristics of Noncredit Students

Information is available to provide additional detail about the characteristics of the students enrolled in noncredit coursework at community colleges in fiscal year 2010. Still, there tends to be more unknown/unreported information in the noncredit data than in the credit submission. Cited percentages among noncredit enrollments are based on the reported data. Student characteristic information is based on unduplicated counts. Information pertaining to course offerings is based on duplicated counts, since course attributes change and individuals can and do enroll in multiple courses.

Noncredit Student Gender. Similar to the distribution for credit programs, female students accounted for 55.3 percent of 2010 noncredit enrollments for which gender data were reported. Approximately 11.7 percent of students did not provide gender data. Gender data by category of activity show that most missing gender information was among individuals enrolled in personal and social development courses (see Table B-4).

Noncredit Student Ethnic Origin. Racial/ethnic reporting among noncredit students was less complete than among credit students, as more than one-third (37.1 percent) of noncredit records were missing racial/ethnic data. Minority students accounted for nearly one-third (31.2 percent) of the individuals enrolled in noncredit programs who supplied racial/ethnic information. In credit programs during the past five years, minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: White (68.8 percent), African American (15.0 percent), Latino (8.6 percent), Asian (3.6 percent), Alien (3.7 percent), and Native American (0.3 percent) (see Table B-5).

Fig. 6. Age Distribution of Noncredit Students, FY 2020

Noncredit Student Age. Based on available data, the average age of students enrolled in noncredit coursework during fiscal year 2010 was 40.8 years and the median age was 37.9 years. Age information was missing for just under one-quarter (23.5 percent) of noncredit students during 2010. Noncredit programming served a more mature clientele than credit courses. Available age data are depicted in Figure 6. One-half (48.0 percent) of noncredit students were 40 years of age or older. Nearly one-third (29.1 percent) of noncredit students were ages 40 to 55 and another quarter (23.2 percent) were between 25 and 39 years of age. Just over one-fourth (28.9 percent) of noncredit students were under 25 years of age (see Table B-6).

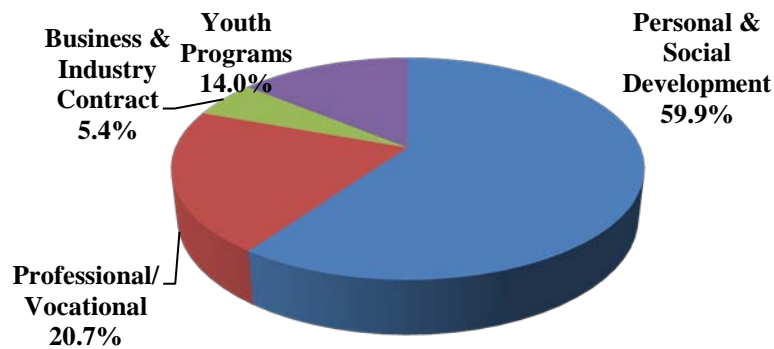

Fig. 7. Category of Activity for Noncredit Course Enrollments (Dup), FY 2010

Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework is grouped into four broad categories: Business and Industry Contract, Professional/Vocational Development, Personal and Social Development, and Youth Programs. Records were not added to the database unless the category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information depicted in Figure 7 (also see Table B-12).

Based on a duplicated count, 59.9 percent of the noncredit offerings were in the Personal and Social Development category. Personal and Social Development programming is an important community service provided by the colleges. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. They can also serve as a gateway to other credit or workforce-oriented courses offered by the college. Just over one-quarter (26.1 percent) of the noncredit coursework was dedicated to developing workplace skills: Professional/vocational (20.7 percent) and Business and Industry Contractual Training (5.4 percent). These courses meet the needs of area residents who are interested in acquiring specific skills without earning academic credit. Providing customized training is an important economic development activity in which colleges collaborate with local employers to tailor content and instructional delivery to their specific requirements. Illinois community colleges are extensively relied upon to develop and deliver coursework addressing the unique training requirements of area businesses, industries, and governmental organizations. The remaining 14.0 percent helped serve the needs of youth in the community (i.e., academic enrichment activities, athletic skills building, study skills, etc.).

Largest Noncredit Offerings (Duplicated)

Two-digit classifications of instructional program (CIP) codes provide additional information about the areas where noncredit instruction were provided. Percentages cited are based on known CIP codes.

Across all categories of activity, ten programs (two-digit CIP) had over 6,000 noncredit students enrolled. These ten program areas accounted for over two-thirds (73.7 percent) of the students enrolled in noncredit courses where CIP data were reported. Four out of ten enrollments accounted for in Figure 8 are in work-related programs: Business Management (13.5 percent), Transportation Workers (15.0

percent), Health Professions (6.8 percent), Education (5.8 percent), and Computer Information Systems (2.8 percent). The two largest programs, each enrolling around 60,000 students, were in the following areas: Leisure and Recreation (23.5 percent) and Self Improvement (23.2 percent). Liberal Arts and Sciences, General Studies, and Humanities accounted for 3.8 percent, Basic Skills accounted for 3.0 percent, and Visual and Performing Arts accounted for 2.6 percent of those enrolled in these ten programs (see Table B-7).

Fig. 8. Largest Noncredit Offerings (Dup), FY 2010

Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 2010 (see Table B-9). The distribution of enrollments by term was as follows: Spring (40.1 percent), Fall (34.9 percent), and Summer (25.0 percent). Overall, the distribution is similar to fiscal year 2010 credit offerings with somewhat higher summer noncredit activity and lower spring and fall noncredit enrollments. Noncredit winter offerings are very low (N = 20 students).

Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five instructional site locations have been identified: Main Campus, Off-campus College Owned, Off-campus College Leased, Community Based, and Business Based. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site and Figure 9 shows that half of the enrollment occurred on main college campuses (See Table B-8).

Further information about the differences between the categories follows. Community-based sites are rented or leased, with site maintenance and upkeep the responsibility of the organization furnishing the space. Off-campus college-leased sites are controlled by the college with site maintenance and upkeep the responsibility of the college. Off-campus college-owned facilities are college-controlled branch or extension center sites located away from the main campus. Business-based sites are provided by businesses that contract for training services.

Fig. 9. Noncredit Distribution by Site/Location, FY 2010

FISCAL YEAR 2010 COMPLETIONS

Degrees and Certificates Awarded by Community College

The number of collegiate-level degrees and certificates awarded to Illinois community college students in fiscal year 2010 totaled 56,884. The number of community college completions in fiscal year 2010 is the highest level ever reported. Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded increased 7.2 percent from the previous year. Compared to fiscal year 2006, the total number of fiscal year 2010 completions increased 14.6 percent.

Table C-1 in the appendix provides a comparison of fiscal year 2006 through fiscal year 2010 duplicated completions for each community college. Compared to last year among the 48 colleges, 32 experienced increases in degree and certificate awards, while 15 exhibited decreases in the past year. One college experienced little or no change.

Table 4 SUMMARY COMPARISON OF ANNUAL COMPLETIONS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2006-2010					
	FY 06	FY 07	FY 08	FY 09	FY 10
Trans/Gen Assoc/ Gen Studies	15,811	15,827	15,754	16,268	17,303
<i>% Change</i>	2.5%	0.1%	-0.5%	3.3%	6.4%
Career and Tech	33,817	35,495	35,561	36,785	39,581
<i>% Change</i>	-6.1%	5.0%	0.2%	3.4%	7.6%
TOTALS	49,628	51,322	51,315	53,053	56,884
<i>% Change</i>	-3.5%	3.4%	-0.0%	3.4%	7.2%

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records

Degrees and Certificates Awarded by Program Categories

Over two-thirds of the 56,884 completers during fiscal year 2010 received Career and Technical Education degrees or certificates (69.6 percent). Baccalaureate/transfer degrees were the second most frequently awarded and accounted for 28.1 percent of all the collegiate-level completions (see Table C-2).

Looking at the trends over time, overall **Career and Technical Education** completions increased (7.6 percent) compared to last year. Historically, the fiscal year 2010 career completion counts are the highest level that has been recorded. Accordingly, a comparison of overall fiscal year 2010 Career and Technical Education completions to those granted five years earlier reveals that the total number of awards grew by 17.0 percent. Career and Technical awards recorded nearly across the board long-term increases. Since 2006, there has been an increase in short-term career certificates (5,139 graduates, or 28.4 percent). The number of longer term career certificates awarded also grew (157 graduates or 2.8 percent). Likewise, between fiscal years 2006 and 2010, there was an overall increase in Associate in Applied Science degrees (639 graduates or 6.4 percent). Vocational Skills was the exception as 171 fewer certificates were awarded in fiscal year 2010 compared to 2006 (-91.4 percent).

A closer examination of the categories of formal awards issued within Career and Technical Education in fiscal year 2010 shows that more than one-half (58.7 percent) of the completions were Career Certificates of Less than One Year. More than one-fourth were Associate in Applied Science degrees (26.7 percent). Longer term Career Certificates accounted for 14.5 percent of the career program completions. The number of Vocational Skills Certificates awarded was less than 1 percent of career completions in fiscal year 2010. (See Table C-2).

The total number of **Baccalaureate/transfer** degrees awarded increased 7.3 percent compared to the last fiscal year. The overall number of Baccalaureate/transfer degrees awarded in fiscal year 2010 increased from fiscal year 2006 (8.5 percent, N = 1,257).

Among Baccalaureate/transfer degrees granted, the Associate in Arts (AA) degree was most commonly awarded (60.2 percent). The proportion of AA degrees granted has been remarkably stable over the past five years, with an increase of 8.4 percent in fiscal year 2010. Almost one-third (31.6 percent) of the Baccalaureate/transfer degrees earned were Associate in Science degrees. (See Table C-2).

Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. As indicated in Table C-3, during fiscal year 2010, nearly six out of ten degrees and certificates were earned by females (56.7 percent). The three degrees and certificates attained by the highest proportion of females were the General Studies Certificate (86.5 percent), the Associate in Teaching (77.8 percent), and the Associate in Applied Science (62.8 percent). Although small in overall number, the Associate in Engineering Science (N = 104) — one of the newest degree programs in the Illinois Community College System — had the highest proportion of male graduates (86.5 percent, N = 90). Short-term Certificates of Less Than One Year were the specific award category with the largest number of male graduates (N = 11,570). The male/female distribution within the Baccalaureate/transfer degree and Career and Technical Education degree and certificate areas drive the overall gender proportion.

Racial/Ethnic Origin of Graduates by Degree Category. Nearly one-third (30.6 percent) of all degrees and certificates in fiscal year 2010 were awarded to **minority students** (nonwhite). According to Table C-4, more than three and one-half times as many minority graduates completed Career and Technical Education degrees and certificates (N = 13,192) than Baccalaureate/transfer degrees (N = 3,717).

Nearly one out of every five (23.2 percent) fiscal year 2010 Baccalaureate/transfer degrees were earned by minority students. The majority of the transfer degrees earned by minorities were Associate in Arts degrees (70.5 percent), while 25.6 percent were Associate in Science degrees. The overall proportion of minority Baccalaureate/transfer completers was similar to last year.

One-and-a-half times as many African American students (N = 8,427) completed collegiate-level programs than did Latino students (N = 5,633) in fiscal year 2010. Figure 10 illustrates the distribution of minority students who successfully completed degree and certificate programs in the Illinois Community College System during fiscal year 2010. (See Table C-4).

Fig. 10. Associate Degrees Earned by Minority Student, Fiscal Year 2010

Age of Graduates by Degree Category. Fourteen percent of all completers were in the under 21 year old age group (13.9 percent). The youngest graduates were in Career and Technical Education (56.9 percent) and Transfer (42.3 percent) programs. The 21-24 age group accounted for nearly one-third (30.9 percent) of all graduates. Graduates between 25 and 30 accounted for almost one-fifth (17.8 percent) of the total, and the 31-39 age group accounted for 14.1 percent.

Over one-third (35.2 percent) of students 30 and under completed Baccalaureate/transfer degrees, while only 5.2 percent of graduates over the age of 30 completed Baccalaureate/transfer programs. Nine out of ten (91.5 percent) graduates over 30 earned Career and Technical Education degrees and certificates. In general, the proportion of Career and Technical Education graduates increased as student age advanced (see Table C-5).

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, available **current intent** was examined to reflect the changing needs and desires of the community college student. Seven out of every ten students who attained a Baccalaureate/transfer degree in fiscal year 2010 indicated that they intended to prepare for transfer to a four-year institution. Just over one-tenth (10.9 percent) of these successful students indicated a desire to either prepare for a job immediately after community college or to improve present job skills — intent that would most often be associated with seeking a Career and Technical Education degree or certificate.

Similarly, 57.5 percent of those students who attained a Career and Technical Education degree or certificate indicated they were preparing for a job immediately after completing community college or improving present job skills. More than one-fifth (21.9 percent) of the Career and Technical Education graduates indicated that they were preparing for

transfer to a four-year institution. Pursuing a Career and Technical Education degree does not preclude a student from transferring to a four-year institution (see Table C-6).

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college. One might anticipate that they would mirror student completion patterns. Four out of five (79.6 percent) students who earned Baccalaureate/transfer degrees in fiscal year 2010 indicated that they enrolled with a desire to complete an associate degree. However, nearly one in five (16.8 percent) indicated that they wanted to complete only one or several courses and were not pursuing a degree.

A review of Career and Technical Education graduates reveals a similar pattern: 80.9 percent of the Career and Technical Education students who earned an Associate in Applied Science degree had listed completing an associate degree as their objective. Nearly one-fifth (18.8 percent) of the students who had planned to only complete one or several courses or a certificate ended up surpassing their goal by earning an Associate in Applied Science degree (see Table C-7).
