## INTRODUCTION

The colleges in the Illinois community college system submit detailed student records twice during each fiscal year. Fall opening enrollment (E1) data for credit-generating students are recorded by the colleges at the end of the regular fall registration period, which is usually the 10th day of the term. Annual student enrollment and completion (A1) data are reported for all students who are officially enrolled at the college in credit coursework at any time during the fiscal year. An A1 record is also submitted for students who graduate, but are not officially enrolled during the year. Noncredit classes are not collected in these databases. Fiscal year 1999 marks the first year that the Illinois Community College System has undertaken a noncredit course enrollment database (N1) to house demographic information on the wide range of noncredit instruction provided annually. As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data. Previously, since fiscal year 1994, only aggregate noncredit enrollment data have been gathered through the use of a yearly survey. During the transition period both detailed data (N1) and aggregate data (paper survey) are being gathered.

Fall enrollment data provide a point-in-time or "snapshot" of fall term enrollment allowing year-to-year and institution-to-institution comparisons and are comparable to fall enrollment data in postsecondary institutions nationwide. However, the diversity of the community college system and its students are best captured in annual student enrollment and completion records. This is because the age, attendance patterns, and goals of the community college student are unconventional. Students "stop in and out" of college according to their individual needs and may not always be enrolled at the beginning of a fall semester. The increase in module classes adds to the complexity of tabulating student enrollments at any given point-in-time. Additionally, with elevated emphasis on student outcomes and program effectiveness, analyses of student completions have become increasingly important. Therefore, the analyses in this report focuses on annual enrollment and completion data in an effort to secure the most comprehensive and accurate information available.

This report, the seventh in a series of annual publications, varies in content from previous reports. For the first time, both aggregate annual noncredit course enrollment data and selected detailed information about individuals enrolling in noncredit courses are provided along with annual enrollments for credit-generating students. Additionally, as in last year's report, completions are reported only for collegiate-level programs. Advancements in adult education and English as a Second Language programs are excluded but, along with supplementary credit enrollment and completion data for each community college, will be provided in the 2000 edition of Data and Characteristics of the Illinois Public Community College System.

This year's report is based on fiscal year 1999 enrollments and completions. For comparison with past enrollments and completions, summary data for the four previous fiscal years (1995-1998) are also presented. Detailed tables comparing fiscal year 1998 and fiscal year 1999 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. More detailed tables for noncredit course enrollments will become available for future reports as the noncredit database evolves. FTE enrollments in this report are based on all credit hours attempted (including nonreimbursable credit hours).

## HIGHLIGHTS OF FISCAL YEAR 1999 ANNUAL REPORT

## Student Enrollments

$<$ The Illinois community college system recorded a total of nearly one million $(971,667)$ students in credit and noncredit courses in fiscal year 1999, an increase of 1.4 percent since fiscal year 1998.
$<$ Credit-generating students accounted for slightly more than two-thirds (67.0 percent) of the overall fiscal year 1999 headcount.
$<$ During fiscal year 1999, the 48 public community colleges in Illinois enrolled 650,605 students in instructional credit courses, 1.3 percent less than the previous year. The full-time equivalent (FTE) enrollment was 216,593, a decrease of 0.3 percent since fiscal year 1998.
< Noncredit course enrollment figures for fiscal year 1999 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey.
$<$ Statewide, 33,833 noncredit course sections were conducted during fiscal year 1999.
$<$ From fiscal year 1998 to fiscal year 1999, the number of individuals receiving instruction through noncredit course offerings increased 7.5 percent (to 321,062 students).
$<$ Statewide, more than 36,400 students of the 971,667, enrolled in both credit and noncredit courses during fiscal year 1999 (A1 and N1). While there is some overlap these data suggest that credit and noncredit courses are meeting largely different student and community needs.
$<$ Females comprised 55.8 percent of the fiscal year 1999 student population enrolled in credit-generating programs.
$<$ Minority (non-white) students accounted for one-third of the credit
students enrolled, one-half percent (0.5) more than in 1998. Black student representation was about the same as last year and at its lowest (14.3 percent) in the past five years. Participation by Hispanic students increased by 0.4 percent. Both foreign/non-resident alien and Asian student participation were up slightly ( 0.1 percent)
$<$ The median age of credit-generating students was 27.2 during fiscal year 1999, slightly younger than the previous year. Likewise, the average age decreased slightly to 31.4 years.
$<$ Baccalaureate/transfer remained the largest credit instructional program area enrolling 34.4 percent of fiscal year 1999 Illinois community college system students. Enrollments in Baccalaureate/transfer programs declined 4.1 percent from last year.
$<$ Statewide, occupational credit program enrollments accounted for more than one-quarter of all credit students ( 26.4 percent). Enrollments in occupational programs declined 1.9 percent since last year which was the seventh consecutive year of decline.
< Although 34.4 percent of the fiscal year 1999 credit student population was enrolled in the baccalaureate/transfer area, only 28.6 percent of all students indicated an intent to transfer.
$<$ More than one-half (55.4 percent) of the fiscal year 1999 credit students enrolled in Illinois community colleges indicated that they were not pursuing a degree, but attending only to complete one or several courses. Participation in college with a focus on taking courses instead of degree or certificate completion increased 3.4 percent over last year.
$<$ Nearly three out of four credit students attended on a part-time basis during both the fall and spring semesters in fiscal year 1999.
(Continued)

## Student Enrollments

$<$ Fifteen percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes 33,600 who earned a bachelors degree or higher which is an increase of 2,363 over last year.
$<$ Illinois community college students were enrolled for nearly $6,497,773$ credit hours throughout fiscal year 1999 and earned over 74 percent of those hours.
$<$ Accumulated credit hours were available for 71.8 percent of the fiscal year 1999 student population. Of that percentage, 31.5 percent had accumulated 30 or more college-level hours (sophomore level).
< Cumulative grade point average data was reported for 65 percent of the fiscal year 1999 students. Forty-five percent held an A-B average.
< Noncredit course enrollment figures in the report for fiscal year 1999 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey. The collection of noncredit individual student data submission (N1) is evolving and are expected to become increasingly complete in the future.
< Fiscal year 1999 unduplicated noncredit headcount increased 7.5 percent over last year. Similarly, the duplicated headcount or "seatcount" was 7.9 percent higher than the previous year.
< Female students accounted for 56.4 percent of 1999 noncredit enrollments for which gender data were reported.
$<$ Minority students accounted for nearly one-quarter of the individuals enrolled in noncredit programs who supplied racial/ethnic data.
$<$ Nearly one-half of the noncredit students were 40 years or above.
$<$ Forty-seven percent of the noncredit offerings were in the personal and social development category of activity. Forty-two percent of the noncredit coursework were dedicated to developing workplace skills: professional/vocational ( 31.4 percent) and business and industry contractual training ( 10.6 percent).
$<$ Across all categories of activity, eight programs (two-digit CIP) had over 10,000 noncredit students enrolled. These eight program areas accounted for over three quarters of the students enrolled in noncredit courses where CIP data were reported. Over 35 percent of these enrollments are in work related programs: business management (15.1 percent), computer information systems ( 9.5 percent), transportation workers (4.1 percent), health professions (3.4 percent) and construction trades ( 3.3 percent).
< Instructional site information shows that 56.8 percent of the noncredit courses offered in 1999 were held on main college campuses.

## HIGHLIGHTS OF FISCAL YEAR 1999 ANNUAL REPORT

## (Continued)

## Student Completions

$<$ More than 33,500 collegiate level degrees and certificates were awarded to students at Illinois community colleges in fiscal year 1999, -2.9 percent fewer than in fiscal year 1998.
$<$ Nearly 13,000 baccalaureate/transfer degrees were earned during the fiscal year, a decrease of -2.7 percent since 1998 , accounting for 38.7 percent of all completions.
< Nearly 60 percent of all fiscal year 1999 collegiate degrees and certificates were earned through completion of occupational programs.
$<$ Students successfully completed nearly 19,700 occupational degrees and certificates in Illinois community colleges during fiscal year 1999, a -3.4 percent decrease from the previous year. The decrease was primarily due to fewer AAS degrees and short term certificates being awarded
$<$ Nearly half (43.7 percent) of the occupational degrees and certificates awarded in fiscal year 1999 were associate in applied science degrees.
$<$ Females accounted for 60.8 percent of all completions during fiscal year 1999. A similar proportion was reflected in the baccalaureate/ transfer and occupational program areas.
$<$ The largest number $(2,977)$ of male completers of a specific degree or certificate was in the associate in applied science degree program. However, the majority of AAS graduates ( 65.4 percent) were female.
$<$ Although small in number (76), the Associate in Engineering Science program had the highest proportion of male graduates ( 90.8 percent).
$<$ Minority students earned one-quarter of the collegiate-level degrees and certificates granted in the Illinois community college system
during fiscal year 1999. Black students achieved 13.8 percent, Hispanic students earned 6.3 percent and Asians earned 4.0 percent of the degree and certificates.
$<$ Minorities accounted for 16.2 percent of the total baccalaureate/transfer degree recipients. Blacks accounted for 7.6 percent, 4.9 percent were Hispanic, and 2.8 percent were of Asian origin.
$<$ A larger number of minority graduates was found in the occupational area $(5,944)$ than in the baccalaureate/transfer area $(2,101)$.
$<$ Among the largest minority groups, Black students completed more than twice as many collegiate-level programs than Hispanic students.
$<$ Fifteen percent of the students who were awarded degrees and certificates during fiscal year 1999 were less than 21 years of age. The age groups with the largest percentages of graduates were the 21 to 24 ( 31.6 percent), 25 to 30 ( 18.0 percent), and 31 to 39 year olds (17.7 percent).
$<$ The proportion of occupational graduates increased as age advanced.
$<$ Nearly three-quarters of the students who successfully completed baccalaureate/transfer degrees in fiscal year 1999 indicated an intent to transfer to a four-year institution.
$<$ Twenty percent of the fiscal year 1999 AAS degree graduates indicated their goal was to only complete one or several courses or finish a certificate, not to earn an associate degree. This demonstrates that students sometimes alter their goals as they progress through the community college system.

## OVERALL FISCAL YEAR 1999 STUDENT ENROLLMENTS

The Illinois Community College System recorded a total of nearly one million $(971,667)$ students during fiscal year 1999 . This overall enrollment figure, which includes student enrollments in credit and noncredit courses, has increased 1.4 percent since fiscal year 1998. In fact, overall enrollments have increased each year since annual aggregate noncredit headcounts were first collected six years ago. Fiscal year 1999 totals are 7.4 percent higher than those reported in fiscal year 1995.

Table 1 provides a summary comparison of fiscal year 1995 through fiscal year 1999 credit and noncredit unduplicated enrollments. Total enrollments do not reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

** FY 1999 higher value generated by Noncredit Course Enrollment Data Submission (N1) or Annual Noncredit Enrollment Survey
SOURCES OF DATA: Annual Enrollment (A1) Records,
Annual Noncredit Enrollment Surveys

Comparisons of fiscal year 1995 through fiscal year 1999 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

Fig. 1. Overall Annual Enrollments, FY 1995-1999

As depicted in Figure 1, credit-generating students account for slightly more than two-thirds ( 67.0 percent) of the overall fiscal year 1999 headcount. An examination of the five-year period indicates that the proportion of credit-generating students has decreased 8.4 percent since fiscal year 1995, when the proportion of credit-generating students was just over three-fourths ( 75.4 percent) of the overall student population. Proportionate noncredit enrollment growth is evident in every year between 1995 and 1999 with noncredit enrollments peaking at one-third in the latest figures.

Statewide, more than 36,400 students of the 971,667 , enrolled in both credit and noncredit courses during fiscal year 1999 (A1 and N1). While there is some overlap these data suggest that credit and noncredit courses are meeting largely different student and community needs.

## FISCAL YEAR 1999 STUDENT CREDIT ENROLLMENTS

## Student Credit Enrollment by Community College

Annual enrollment for fiscal year 1999 was 650,605 , and full-time equivalent (FTE) students totaled 216,593. Table 2 contains comparative enrollment data for the last five years. Fiscal year 1999 total headcount enrollment decreased 1.3 percent from the previous year, and fiscal year 1999 FTE enrollment decreased only 0.3 percent. Headcount enrollments have decreased 4.6 percent since 1995, while FTE enrollments decreased 1.1 percent. Headcount enrollments were at their highest at 727,310 in fiscal year 1992. FTE enrollments peaked at 237,762 in fiscal year 1993, little change has occurred the past four years.

| Table 2 <br> COMPARISON OF ANNUAL CREDIT ENROLLMENTS <br> IN ILLINOIS PUBLIC COMMUNITY COLLEGES <br> FISCAL YEARS 1995-1998 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | FY 95 | FY 96 | FY 97 | FY 98 | FY 99 |

| \% Change | -4.1\% | -0.9\% | 0.5\% | -0.6\% | -0.3\% |

## Source of Data: Annual Enrollment (A1) Records

Table A-1 in the appendix provides a comparison of fiscal year 1995 through fiscal year 1999 headcount enrollments for each community college. Note that Metropolitan Community College figures are for Fall 1998 only which was the last semester the college operated. Since that time the East St. Louis Community College Center (ESLCCC) has been providing educational programs and services to area residents through cooperative efforts of other higher education institutions. Enrollment and completion figures for the ESLCCC are included in the records of the colleges providing the programs and services. Of the 49 community colleges, 18 colleges experienced increases in headcount, while 26
exhibited decreases during the past year. Five colleges experienced little or no change ( 1.0 percent or less) over the last year. Table A-2 contains a comparison of FTE enrollments for the five-year period, indicating 15 colleges with increases, 20 with decreases, and 14 with little change.

## Male/Female Distribution

The male/female distribution of students typically fluctuates little from year to year. Females comprised 55.8 percent of the student population in fiscal year 1999. The percentage of male students has averaged 44.3 percent over the past five years. (See Table A-3.)

## Ethnic Origin

All changes in the proportion of ethnic groups during fiscal year 1999 were slight -- less than 1 percent in each category. In fiscal year 1999, just over one-third ( 33.7 percent) of those attending credit courses in community colleges were minority (non-white) students. Current data show that minority representation increased slightly ( 0.5 percent) over last year. During the past five years, minorities have comprised an average of about one-third ( 33.2 percent) of the student population. The fiscal year 1999 minority participation increase is largely due to proportionate increases in Hispanic ( 0.4 percent), non-resident alien/foreign ( 0.1 percent) and Asian ( 0.1 percent) student participation. Black students $(92,268)$ remained the largest minority group followed by students of Hispanic heritage $(87,769)$. In fiscal year 1999 representation by African Americans was near its lowest (14.3 percent) level in the past five years. (See Table A-4.)

## Student Age

The average age of the Illinois community college student was 31.4 years in fiscal year 1999 just slightly less than in fiscal year 1998. The median age was 27.2 years which is slightly younger than last year. The largest proportion of students ( 22.8 percent) was in the 17-20 year old category, an increase of nearly 1 percent from the previous year. Once the third largest group (fiscal years 1994-1996), the next in size, 21-24 year old students ( 19.9 percent), also increased slightly. However, the next three groups by proportion, $40-55$ ( 18.5 percent), 31-39 ( 16.8 percent), and 2530 ( 16.2 percent), declined somewhat. The 31-39 year old group had
previously (fiscal years 1994-1996) been the second largest age bracket. Always the smallest in size, the 16 and under age group grew slightly but still represented only 0.6 percent of the student population in fiscal year 1999. (See Table A-5.)

## Summary of Enrollments by Instructional Program Area

The baccalaureate/transfer program is the largest instructional program offered in the Illinois community college system. Statewide, this program area decreased 4.1 percent in the past year and is down nearly 21 percent between 1995 and 1999. An examination of the longer term trend data reveals a large increase in the total number of baccalaureate/transfer students in 1994, followed by two years of level enrollments and then a substantial drop in the transfer program category for 1997. Further study reveals that the large shift in enrollments was due to the inclusion of adult education (specifically English As a Second Language) students in the baccalaureate/transfer programs at City Colleges of Chicago in 1994. Then in 1997 Chicago switched category usage back to adult education along with expanded use of general studies programs. Relatedly, statewide adult education enrollments showed little change in 1999 and increased 33.2 percent between 1995 and 1999. These and similar categorization shifts will continue to impact statewide trend data. Changes by the City Colleges of Chicago in the use of general studies (decrease) and vocational skills (increase) are noted in the 1999 submission.

Occupational programs are the second largest credit program in the Illinois community college system. Occupational enrollments decreased 1.9 percent from last year and decreased 7.7 percent over the five-year period.
In the past year, enrollments increased in both vocational skills (12.0 percent) and general associate degree programs ( 27.7 percent). General studies is the smallest program area and registered a substantial decrease in 1999 ( -30.5 percent). (See Table A-6a).

Overall, between 1995 and 1999 excluding City Colleges of Chicago the rest of the system experienced little change ( 0.5 percent) in enrollments. Analysis of instructional program area information, excluding City Colleges of Chicago data, produces less exaggerated long term trends for most program areas. Relatively little change was exhibited in baccalaureate transfer (-3.0 percent) programs between 1995 and 1999. Adult education growth though less dramatic was still evident (22.1
percent). The general associate ( 65.9 percent) and general studies (38.7 percent) programs recorded higher growth without Chicago data with both changes resulting from short term growth in 1999. Decreases in both occupational ( -7.3 percent) and vocational skills ( -5.4 percent) programs moderated between 1995 and 1999. (see Table A-6b). While occupational enrollments have decreased, the number of students enrolled in noncredit courses, many of which are suitable for updating professional skills in business and industry, increased. A review of noncredit course enrollments is provided in the next section of this report.

Instructional Program Enrollments by Gender. During fiscal year 1999, females outnumbered males in all instructional areas; the English as a Second Language program contained the highest proportion of male students ( 47.4 percent). The highest proportion of female students ( 60.1 percent) were enrolled in the general associate program followed closely by the general studies certificate program ( 59.9 percent) and baccalaureate/transfer program ( 58.0 percent). (See Table A-7.)

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 2 illustrates the distribution of minorities in the two largest program areas, baccalaureate/transfer and occupational/career. An examination of each racial/ethnic group's representation across program area in fiscal year 1999 indicates that the largest percentage of white ( 39.6 percent), Asian ( 32.9 percent), Black (29.9 percent), and American Indian (29.2 percent) students were enrolled in baccalaureate/transfer programs. The highest percentage of Hispanic ( 41.4 percent) students and Non-resident Aliens ( 40.5 percent) were enrolled in English as a Second Language programs. Overall, minority students were least represented in the baccalaureate/transfer (24.1 percent), occupational (24.8 percent), and vocational skills ( 25.3 percent) areas (see Table A-8).

Fig. 2. Fiscal Year 1999 Minority Enrollments in Baccalaureate/Transfer and Occupational Programs

Instructional Program Enrollments by Age. During fiscal year 1999, 42.2 percent of community college students were under 25 years of age. Half (49.3 percent) of the students under 25 were enrolled in baccalaureate/transfer programs. Almost one-third of the student population was between 25-39 years of age; 31.3 percent were enrolled in the occupational program area, while another quarter ( 26.8 percent) were enrolled in baccalaureate/transfer programs. More than one-fifth of Illinois' community college students were at least 40 years of age. Nearly onethird of student $40+$ were enrolled in occupational programs. Students $40+$ also had substantial enrollments in vocational skills ( 20.7 percent) and baccalaureate/transfer ( 20.7 percent) programs. (See Table A-9.)

Largest Occupational Programs. An examination of occupational curricula with at least 5,000 students enrolled during either of the last two years revealed a change at the top with Business Data Programming displacing

Associate Degree Nursing (ADN). Business Data Programming enrollments increased 7.5 percent ( 783 students) to overtake ADN which had been the largest program for the past several years. ADN enrollments declined 6.6 percent ( -705 students) since last year. The highest growth over last year among the largest programs was registered by Criminal Justice Technology ( 10.5 percent). The decrease in Accounting and Bookkeeping ( -7.0 percent) was sufficiently large to drop the program below the 5,000 enrollment level. Accounting and Bookkeeping has dropped every year over the past six years that this report has been produced. Between 1995 and 1999 enrollments decreased -27.8 percent. The remaining programs in the group experienced moderate to slight decreases over the past year: Child Care Provider/Assistant ( -5.2 percent), and Business Administration \& Management ( -1.2 percent).

Instructional Program Enrollments by Intent. Intent data convey the primary goal that the student wants to achieve as a result of his/her studies. Intent data are self-reported by students when they initially enroll at the college. College staff are asked to require students to update this information periodically by providing a current intent as well as entry intent. An examination of the intent data across program areas illustrates the diversity of student interests and needs that community college serve. Two goals combined to represent the aspirations of more than 43 percent of community college students: 28.6 percent were preparing for transfer to a four-year institution and 14.7 percent were preparing for a job immediately after community college.

Examination of student intent by program area reveals interesting observations. With the exception of adult education and baccalaureate/ transfer, less than half of the students in any program area were pursuing the particular goal most often associated with a given major. Only 56.0 percent of those students enrolled in baccalaureate/transfer programs indicated that they intend to transfer to a four-year institution. Similarly, just 57.6 percent of the students in occupational programs enrolled with the intent of preparing for a job after community college attendance or to improve their present job skills. Three-quarters of the ABE/ASE and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for attending. (See Table A-11.)

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 1999, 55.4 percent of the students indicated that they were enrolling with no intention of pursuing a degree -- only to complete a certificate or one or several courses. A review of student objectives by program area reveals expected results: 55.5 percent of the baccalaureate/transfer students plan to complete an associate degree, while 39.6 percent are interested in completing one or several courses. Less than half ( 43.6 percent) of the occupational/career students indicated that they expected to complete an associate degree, while 38.9 percent expected to complete one or several courses. Nearly seventeen percent wanted to complete a certificate. These data illustrate the variety of aspirations among students enrolled in community college occupational programs. Many students complete an entire program, while others simply want to improve their current skills or obtain new skills to enter a different career. Particularly in an strong economy, employers often do not require the completion of a formal certificate or degree; only that individuals acquire the skills necessary to perform specific job duties. In the ESL, general studies, ABE/ASE, and vocational programs, the vast majority (96.8, 94.9, 91.1 and 89.5 percent, respectively) of students planned only to complete one or several courses. (See Table A-12.)

## Enrollment Hours by Term and Type of Attendance

Nine out of ten students attending during the summer term of fiscal year 1999 were part-time (less than nine credit hours). Seventy-three percent of the students were attending college on a part-time (less than 12 credit hours) basis during the fall semester. The part-time proportion was slightly higher ( 74.3 percent) in the spring. In a pattern typical to higher education, more students attended Illinois community colleges in the fall semester $(380,937)$ than in the spring semester $(368,237)$. (See Table A13.) Statewide, 201,665 students attended in both the fall and spring semesters.

## Highest Degree Earned by Students Prior to Attending Community College

These data reiterate that community colleges serve diverse populations. Among the 79 percent of students who reported their prior degrees (excluding adult education students who would typically not possess earned degrees), 15 percent earned some type of postsecondary certificate or degree. Nearly 13 percent had already earned degrees at or beyond the community college level. (See Table A-14.) Figure 3 illustrates the educational background of these fiscal year 1999 students.

Fig. 3. Fiscal Year 1999 Headcount Enrollment by Prior Highest Degree Earned

## Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In 1999, Illinois community college students completed $4,835,018$ credit hours, or 74.4 percent of their attempted hours. Overall, full-time students earned a slightly higher percent of attempted hours than did part-time students. (See Table A-15).

Of the 467,142 students ( 71.8 percent) for whom data were available, more than two-thirds had accumulated less than 30 college-level hours (freshman level). Nearly 19 percent had accumulated between 30 to 59 credit hours (sophomore status), and 13 percent earned 60 or more credits. (See Table A-16.)

## Grade Point Averages

Cumulative grade point average data were available for nearly two-thirds of the students enrolled in fiscal year 1999. Eighty-two percent of the students had a grade point of 2.01 or above, which is a "C" average or above. Thirty-seven percent had achieved a grade point between 2.01 and 3.00 ("C" to "B"), while 45.3 percent were in the 3.01 to 4.00 ("B" to "A") range. (See Table A-17.)

## High School Graduation Percentile Rank

High school class rank was reported for about 16 percent of the fiscal year 1999 community college students. Of this population, nearly 5 percent were in the top tenth percentile of their graduating class, while 48 percent graduated in the top half of their class. (See Table A-18.)

## ACT Scores of Community College Students

ACT score data were available for 11 percent of the students. Sixty percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is typically required for acceptance into many colleges or universities. For those fiscal year 1999 students from whom data were gathered, the average ACT score was 19.3. The median score was 19. (See Table A-19.)

## FISCAL YEAR 1999 STUDENT NONCREDIT COURSE ENROLLMENTS

## Student Noncredit Course Enrollment by Community College

Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. Fiscal year 1994 was the first year in which annual noncredit course enrollment data were collected. Note that noncredit course enrollment figures for fiscal year 1999 are the higher value of information generated by the Noncredit Course Enrollment Data submission (N1) or the Annual Noncredit Enrollment Survey.

SOURCE OF DATA: FY95 to FY98 Annual Noncredit Enrollment Surveys, FY99 higher value of Noncredit Course Enrollment Data submission (N1) or Survey.

Fiscal year 1999 marks the first year that the Illinois Community College System has undertaken a noncredit course enrollment database (N1). As with any new data collection initiative of this magnitude, one can expect a transition period where gradual improvements are made to the process of gathering and reporting the array of requested data takes place. During the transition period, both detailed data (N1) and aggregate data (paper survey) are being gathered.

During fiscal year 1999, 33,833 noncredit course sections were conducted throughout the state or about 0.9 percent greater than the previous year. Course offerings have, in fact, increased each year in the five-year period. From fiscal year 1995 to fiscal year 1999, the total number of course sections offered through the colleges increased 34.3 percent.

Noncredit offerings are an important and growing part of college efforts to meet community and employer needs. As illustrated in Figure 4, student enrollments have also increased dramatically. In the past year, the unduplicated noncredit headcount (in which students are counted only once, regardless of the number of noncredit courses in which they enroll) increased 7.5 percent. Since annual noncredit data collection began five years ago, unduplicated noncredit headcounts have increased 44 percent. Similarly, the fiscal year 1999 duplicated headcount (also known as "seatcount") was 7.9 percent higher than the previous year and 47.7 percent higher than five years earlier.

The number of noncredit course offerings and enrollments at the community colleges often vary from year to year, depending on the needs of the surrounding communities. Comparisons of fiscal year 1995 through fiscal year 1999 noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3.

Fig. 4. Noncredit Course Enrollments, FY 1995-1999

## Characteristics of Noncredit Students

The collection of noncredit individual student data submission (N1) is evolving and are expected to become increasingly complete in future years. The staff from the colleges are recognized for the substantial effort they put into collecting these detailed data on noncredit students. Due to extensive work by college officials, during the transition period there is sufficient information available to provide percentages about the characteristics of the students who enrolled in noncredit coursework at community colleges in fiscal year 1999. The following student characteristic information is based on unduplicated counts.

## Noncredit Student Gender

Similar to the distribution for credit programs, female students accounted for 56.4 percent of 1999 noncredit enrollments for which gender data were reported. Three percent of the gender data were missing.

## Noncredit Student Ethnic Origin

Racial/ethnic data for noncredit students were less complete as just over one-fifth of the racial/ethnic information were missing from the noncredit records. Minority students accounted for nearly one-quarter of the
individuals enrolled in noncredit programs who supplied racial/ethnic data. In credit programs during the past five years minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: Whites (77.2 percent), Blacks ( 11.8 percent), Hispanics ( 6.8 percent), Asians ( 3.5 percent), Aliens ( 0.4 percent) and American Indians ( 0.3 percent).

Fig. 5. Age Distribution for Noncredit Course Enrollments, FY 1999

## Noncredit Student Age

Based on available data, both the average and median age of students enrolled in noncredit coursework during fiscal year 1999 was 36.6 years. Age information was missing for nearly one-fifth of the noncredit students. As depicted in Figure 5, available data indicates that during 1999 noncredit programming served a mature clientele than credit courses. Nearly onehalf of the noncredit students were 40 years or above. The largest group of noncredit students were between 40 and 55 ( 32.7 percent). Less than one-fifth of noncredit students were under 25 years of age. The $25-39$ old age group accounted for just over one-third of the noncredit enrollments.

## Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework are grouped into four major categories. Records were not added to the database unless category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information in Figure 6.

Fig. 6. Category of Activity for Noncredit Course Enrollments, FY 1999

Forty-seven percent of the noncredit offerings were in the personal and social development category. Personal and social development programming is an important community service provided by the colleges. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. Forty-two percent of the noncredit coursework were dedicated to developing workplace skills: professional/vocational ( 31.4 percent) and business and industry contractual training ( 10.6 percent). Area residents are often interested in acquiring new skills without earning academic credit. Customized training is an important economic development activity in which the colleges activelv participate. Colleges are relied upon extensivelv to develop and
deliver coursework to meet the unique needs of area businesses. The remaining 10 percent served the needs of youth (e.g., learning skill enrichment, athletic skill building, college for kids, etc.).

Fig. 7. Largest Noncredit Offerings, FY 1999

## Largest Noncredit Offerings (Duplicated)

Two-digit classification of instructional program (CIP) codes provide additional information about the areas where noncredit instruction were provided. Nearly 15 percent of the CIP data were missing. Percentages cited are based on the known CIP codes. Across all categories of activity, eight CIP codes (two-digit) had over 10,000 noncredit students enrolled. The eight largest program areas accounted for over three quarters of the students enrolled in noncredit courses. The "all other category" includes 40 separate two-digit CIP codes. Over 35 percent of the enrollments accounted for in Figure 7 are work related: business management (15.1 percent), computer information systems ( 9.5 percent), transportation workers ( 4.1 percent), health professions ( 3.4 percent) and construction trades ( 3.3 percent). The remaining 41.5 percent were in the following
areas: leisure and recreation (23.1 percent), self improvement (14.3 percent), and basic skill development ( 3.4 percent).

## Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 1999. The distribution of enrollments by term follows: spring ( 38.5 percent), fall ( 35.3 percent), summer ( 23.8 percent), and winter (2.3 percent). Overall, the distribution is similar to fiscal year 1999 credit offerings with summer and spring activity slightly higher and fall slightly lower in the noncredit data.

## Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five broad instructional site locations were identified. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site which show that most enrollment occurs on main college campuses:
main campus ( 56.8 percent),
community based (17.9 percent),
off-campus college owned (13.1 percent),
off-campus college leased ( 8.5 percent), and
business based ( 3.7 percent).

Further information about the differences between the categories follows. Community based sites are rented or leased and site maintenance and upkeep is the responsibility of the organization furnishing the space. For off-campus college leased sites the college controls the property and is responsible for maintenance and upkeep. Off-campus college owned facilities are college controlled branch or extension center sites located away from the main campus. Business based sites are provided by a business which is contracting for services.

The current report contains new information about noncredit enrollments due to extensive efforts by college officials to gather these data using a new format. Readers can anticipate the availability of more detailed information on noncredit activity via the Noncredit Course Enrollment (N1) as the system gains more experience with this substantial new data collection initiative.

## FISCAL YEAR 1999 COMPLETIONS

## Degrees and Certificates Awarded by Community College

The number of collegiate level degrees and certificates awarded to Illinois community college students in fiscal year 1999 totaled 33,542 . Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded decreased by -2.9 percent over fiscal year 1998. Compared to fiscal year 1995, the total number of fiscal year 1998 completions decreased -4.1 percent.

Table C-1 in the appendix provides a comparison of fiscal year 1995 through fiscal year 1999 duplicated completions for each community college. Among the 49 colleges, 18 experienced increases in degree and certificate awards, while 28 exhibited decreases in the past year. Three colleges experienced little or no change.

## Table 4

SUMMARY COMPARISON OF ANNUAL COMPLETIONS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 1995-1999

|  | $\underline{\text { FY 95 }}$ | FY 96 | FY 97 | FY 98 | FY 99 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Trans/Gen Assoc/ | 13,870 | 13,564 | 13,828 | 14,143 | 13,848 |

| \% Change | 21,089 | 20,310 | 19,565 | 20,386 | 19,694 |
| Occupational | $0.7 \%$ | $-3.7 \%$ | $-3.7 \%$ | $4.2 \%$ | $-3.4 \%$ |
| \% Change | 34,959 | 33,874 | 33,393 | 34,529 | 33,542 |
| TOTALS | $1.4 \%$ | $-3.1 \%$ | $-1.4 \%$ | $3.4 \%$ | $-2.9 \%$ |

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records.

## Degrees and Certificates Awarded by Program Categories

Of the 33,542 completions during fiscal year 1999, nearly 60 percent were occupational degrees or certificates. Baccalaureate/transfer degrees accounted for 38.7 percent of all the collegiate-level completions. Among these baccalaureate/transfer degrees, the associate in arts degree was most commonly awarded ( 60.2 percent). More than one-third ( 34.6 percent) of the baccalaureate/transfer degrees earned were associate in science degrees. The proportion of AA and AS degrees granted has been remarkably stable over the past five years. The total number of transfer degrees awarded decreased -2.7 percent since fiscal year 1998. Overall, the number of baccalaureate/transfer degrees awarded in fiscal 1999 showed little change from five years earlier (a decrease of 54 or -0.4 percent).

An examination of the occupational degrees and certificates awarded in fiscal year 1999 indicates that 43.7 percent $(8,608)$ were associate in applied science degrees. Thirty-three percent of the completions were for occupational certificates of less than one year. Overall occupational completions are down 3.4 percent compared to last year. This overall decrease is attributable to short term decreases in AAS degrees and certificates of one year or more. Short-term certificates (less than one year) increased 3.4 percent in the past year. Although small in volume, the number of vocational skills certificates awarded in fiscal year 1999 remained about the same as last year when there was a dramatic increase. A comparison of fiscal year 1999 occupational completions to those awarded five years earlier reveals that the total number of awards decreased by -6.6 percent. A closer examination shows decreases in three out of four categories: associate degrees ( -13.0 percent), short-term certificates ( -2.5 percent) long-term certificates ( -2.1 percent). Vocational skills certificates were up substantially but relatively few of these are awarded.

## Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. During fiscal year 1999, six out of ten degrees and certificates were earned by females. The three degrees
and certificates attained by the highest proportion of females were the associate in arts ( 65.5 percent), associate in applied science ( 65.4 percent) and vocational skills certificate ( 64.9 percent). Although small in number (76), associate in engineering science - one of the newest degree programs in the Illinois community college system - had the highest proportion of male graduates ( 90.8 percent). The associate in applied science was the specific degree program with the largest number of male graduates (2,977). The male/female distribution within the baccalaureate/transfer degree and occupational degree and certificate areas drive the overall proportion. (See Table C-3.)

Racial/Ethnic Origin of Graduates by Degree Category. One-quarter of all degrees and certificates in fiscal year 1999 were awarded to minority (nonwhite) students. Sixteen percent of all fiscal year 1999 baccalaureate/transfer degrees were earned by minority students, the majority of which were associate in arts degrees ( 68.6 percent), while 28.7 percent were associate in science degrees. The overall proportion of minority baccalaureate/transfer completers was similar to last year. Almost three times as many minority graduates completed occupational degrees and certificates $(5,944)$ than baccalaureate/transfer degrees $(2,101)$. More than twice as many Black students $(4,636)$ completed collegiate-level programs than did Hispanic students $(2,117)$ in fiscal year 1999. (See Table C-4). Figure 8 illustrates the distribution of minority students who successfully completed degree programs in the Illinois community college system during fiscal year 1999.

Age of Graduates by Degree Category. Fifteen percent of the completers were in the under 21 year old age group. These graduates were predominately ( 61.6 percent) in baccalaureate/transfer programs. The 2124 age group accounted for nearly 32 percent of the total graduates, while the 25-30 and 31-39 age groups each accounted for about 18 percent. Half of the students 30 and under completed baccalaureate/ transfer degrees, while less than one-fifth ( 18.3 percent) of the graduates over the age of 30 completed baccalaureate/transfer programs. More than three-quarters (78.2 percent) of those graduates age 30 or above earned occupational degrees and certificates. Across all age groups, the
proportion of occupational graduates increased as age advanced. (See Table C-5.)

Fig. 8. FY 1999 Associate Degrees Earned by Minority Students

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal that a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, current intent (when available) was analyzed to reflect the changing needs and desires of the community college student. Less than three-fourths (73.6 percent) of those students who attained a baccalaureate/transfer degree indicated that they intended to prepare for transfer to a four-year institution. Over one-tenth of these successful students indicated a desire to prepare for a job immediately after community college or to improve present job skills - intents that would most often be associated with
seeking an occupational degree or certificate. Likewise, only 60 percent of those students who attained an occupational degree or certificate indicated that they were preparing for a job immediately after completing community college or improving present job skills. One-fifth of the occupational graduates indicated that they were preparing for transfer to a four-year institution. Pursuing an occupational degree does not preclude a student from transferring. More than half of these occupational completers who indicated a desire to transfer were Health Professions and Related Sciences and Business Management and Administrative Services graduates. (See Table C-6.)

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college, and one might anticipate that they would mirror student completion patterns. Eighty-one percent of the students who earned baccalaureate/transfer degrees in fiscal year 1999 indicated that they enrolled with a desire to complete an associate degree. However, more than 16 percent indicated that they wanted to complete only one or several courses and were not pursuing a degree. A review of occupational graduates reveals the same pattern; 78.5 percent of the occupational students who earned an associate in applied science degree had listed completing an associate degree as their objective, but 15.9 percent of the students who had planned to only complete one or several courses or a certificate surpassed their goal by earning an associate degree. (See Table C-7.)

## SUMMARY

As indicated by the demographic data presented in this report, the Illinois community college system serves a diverse student clientele through a variety of credit and noncredit programs and courses. For students enrolled in credit coursework, more than half are female ( 56.1 percent), one-third are of minority ethnicity, and two out of every five students are 31 years of age or older. Available information on students enrolled in noncredit courses show nearly identical gender representation (56.4
percent female), less minority participation with one-quarter minority noncredit enrollments, and the participation by a more mature population in noncredit courses with two-thirds of the students 31 years of age or above.

In the past year, based on fiscal year 1999 annual data, overall community college enrollments increased and completions decreased. Despite a decline in the number of credit-generating students, the accelerating number of students served through noncredit courses affirms that the Illinois community college system continues to adapt to the evolving educational needs of the communities the colleges serve.

Access, opportunity, affordability, and accountability are central themes for the Illinois Community College System. Hence, the Illinois Community College System prepares analyses on an extensive array of information pertaining to students' educational experiences and outcomes. In addition to enrollment and completion data, information is collected on student migration between community colleges and universities (shared data), follow-up of occupational program graduates and coursetakers, program review, minority student studies, and persistence and transfer rate analyses. Recent initiatives to provide educational guarantees, promote leadership and core values, actively participation in efforts to build a seamless educational system (e.g., the Illinois Articulation Initiative and K16 partnership) and establish performance-based funding demonstrate a systemwide commitment to innovation. These studies and initiatives, along with an exciting new comprehensive statewide strategic planning process that is well underway provide the necessary information and direction for further system advancement. The Illinois Community College System will continue to move ahead to fulfill its mission to provide high-quality, accessible, cost-effective educational opportunities for individuals and communities across the state.
