## Introduction

The colleges in the Illinois Community College System submit detailed credit student records twice during each fiscal year. Fall opening enrollment (E1) data for credit-generating students are recorded by the colleges at the end of the regular fall registration period, which is usually the 10th day of the term. Annual student enrollment and completion (A1) data are reported for individuals who are officially enrolled at the college in credit coursework at any time during the fiscal year. An A1 record is also submitted for students who graduate, but are not officially enrolled during the year. Additionally, the N1 submission includes data on students enrolled in noncredit courses. Since fiscal year 1999, the Illinois Community College System has been using a noncredit enrollment database to house demographic and course information on the wide range of noncredit instruction provided annually. Between fiscal years 1994 and 1998, only aggregate noncredit enrollment data was gathered through the use of an annual survey. During the transition period (1999 through 2002), both detailed data (N1) and aggregate data (internet survey) were gathered. In fiscal year 2003, the transition to the N1 data system as the source of noncredit information was complete.

Fall enrollment data provide a point-in-time or "snapshot" of opening fall term enrollment allowing year-to-year and institution-to-institution comparisons and are comparable to fall enrollment data in postsecondary institutions nationwide. Looking at the fall and annual data for fiscal year 2009 shows the substantial differences in coverage of these submissions for Illinois community colleges. During the fall term included in fiscal year 2009, there were 357,157 students enrolled in credit coursework in public community colleges at the start of the semester. During the entire fiscal year of 2009, a total of 700,072 students took credit coursework at the colleges. Hence, the beginning fall term enrollment data captures just 51.0 percent of all the credit students who attended a community college during the entire fiscal year of 2009. Stated another way, community college annual enrollments are nearly twice as large as fall credit opening enrollments reflect. In the noncredit arena, the differences are even more pronounced as fall noncredit data only accounted for 31.8 percent of the annual 2009 noncredit enrollments. Hence, annual data more fully capture the community college system's impact.

The diversity of the community college system and its students are best captured in annual student enrollment and completion records. Students "stop in and out" of college according to their individual needs and may not always be enrolled at the beginning of a fall semester. The increase in module classes within traditional semesters adds to the complexity of tabulating student enrollments at any given point-in-time. Additionally, with elevated emphasis on student outcomes and program effectiveness, analyses of student completions have become increasingly important. Therefore, this report focuses on annual enrollment and completion data to provide the most comprehensive information available.

This year's report is based on fiscal year 2009 enrollments and completions. Comparative information is supplied from four previous fiscal years (2005-2008). Detailed tables comparing fiscal year 2008 and fiscal year 2009 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. FTE enrollments in this report are based on all credit hours attempted (including nonreimbursable credit hours).

## Highlights of Fiscal Year 2009 Annual Report Student Enrollments

- The Illinois Community College System recorded a total approaching one million $(\mathbf{9 5 4}, \mathbf{3 9 6})$ students in credit and noncredit courses during fiscal year 2009. Overall combined enrollments increased compared to last year ( +2.2 percent, $\mathrm{N}=$ $+20,756$ ).
- Credit-generating students accounted for 73.4 percent of the overall fiscal year 2009 headcount.
- During fiscal year 2009, the 48 public community colleges in Illinois enrolled $\mathbf{7 0 0 , 0 7 2}$ students in instructional credit courses. This is higher than the previous year $(682,607)$. The full-time equivalent (FTE) enrollment was 250,328, an increase of 4.4 percent since fiscal year 2008.
- $\quad$ Statewide, $\mathbf{2 5 , 0 1 6}$ noncredit course sections were conducted during fiscal year 2009.
- From fiscal year 2008 to fiscal year 2009, the number of individuals receiving instruction through noncredit course offerings increased slightly ( 1.3 percent) to $\mathbf{2 5 4 , 3 2 4}$ students.
- $\quad$ Statewide, 28,404 of 954,396 total students enrolled in both credit and noncredit courses during fiscal year 2009 (A1 and N1). While there is some overlap, these data suggest that credit and noncredit courses are meeting largely different student and community needs.
- Females comprised 54.9 percent of the fiscal year 2009 student population enrolled in credit-generating programs.
- Minority (non-white) students accounted for over one-third (36.2 percent) of the credit students enrolled. African American student representation increased ( 2.3 percent) but remained at 14.4 percent. Latino student representation increased to 16.3 percent. Asian student representation remained similar to the previous year at 4.4 percent, while foreign/nonresident alien representation increased minimally to 0.8 percent.
- The median age of credit-generating students was $\mathbf{2 5 . 5}$ during fiscal year 2009, a slight decrease from the previous year. The average age remained at $\mathbf{3 0 . 7}$ years.
- Baccalaureate/transfer remained the largest credit instructional program area enrolling 39.2 percent of fiscal year 2009 Illinois Community College System students. Enrollments in baccalaureate/ transfer programs increased 1.7 percent compared to the previous year.
- Statewide, career and technical education credit program enrollments accounted for more than one-quarter of all credit students (26.8 percent). Enrollments in career and technical programs increased 0.5 percent from last year.
- Although 39.2 percent of the fiscal year 2009 credit student population was enrolled in the baccalaureate/transfer area, only 30.5 percent of all students indicated an intent to transfer.
- Students enrolled in adult education courses in community colleges comprised 15.7 percent of the credit-generating students. Enrollment in adult education increased by 3.1 percent versus fiscal year 2008.
- Of the students in adult education, approximately 55.3 percent were enrolled in English as a Second Language (ESL) courses.
- More than one-half ( 51.0 percent) of the fiscal year 2009 credit students enrolled in the colleges indicated that they were not pursuing a degree, but attending to complete one or several courses. Participation in college to take courses instead of pursuing a degree or certificate remained similar compared to the previous year.
- More than two-out-of -three credit students attended on a parttime basis during both the fall (66.9 percent) and spring (69.6 percent) semesters in fiscal year 2009.
- Nearly 19 percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes 34,741 who earned a bachelors degree or higher.
- Illinois community college students were enrolled in 7,509,827 credit hours throughout fiscal year 2009 and earned 76.7 percent of those hours.
- Accumulated credit hours were available for 73.9 percent of the fiscal year 2009 student population. Just over one third of them (34.9 percent) attained sophomore-level status by accumulating 30 or more college-level hours.
- Cumulative grade point average data was reported for 68.5 percent of the fiscal year 2009 students. More than 47.1 percent held an A-B average.
- In fiscal year 2009, Illinois community college students earned 64.2 percent of the remedial credits they attempted. This percentage is up from 63.4 percent in fiscal year 2008.
- In fiscal year 2009, close to one-fifth (19.5 percent) of Illinois community college students (not enrolled in ABE/ASE/ESL, Vocational Skills, and General Studies) were enrolled in at least one developmental course - a slight decrease from fiscal year 2008.
- Noncredit course enrollment figures for fiscal year 2009 are from the Noncredit Course Enrollment Data submission (N1).
- Over one-half of the $\mathbf{2 0 0 9}$ noncredit courses were held on main college campuses (50.5 percent).
- Fiscal year 2009 unduplicated noncredit headcount increased 1.3 percent over last year. The duplicated headcount or "seatcount" was 6.5 percent higher than the previous year.
- 25,016 noncredit course sections were conducted during fiscal year 2009.
- Female students accounted for 55.5 percent of 2009 noncredit enrollments for which gender data were reported.
- Minority students accounted for one-fourth (26.1 percent) of the individuals enrolled in noncredit courses who supplied racial/ethnic data.
- The median age of noncredit students was $\mathbf{3 8 . 8}$ during fiscal year 2009. The average age was 40.7 years.
- Nearly one-half of the noncredit students were $\mathbf{4 0}$ years of age or above among the individuals who supplied this information.
- Nearly 60 percent of the noncredit offerings (duplicated) were in the Personal and Social Development category of activity. Over onequarter of the noncredit coursework was dedicated to developing workplace skills: Professional/vocational (18.9 percent) and Business and Industry Contractual training ( 8.0 percent).
- Across all categories of activity, nine broad course areas (two-digit CIP) had over 6,000 noncredit students enrolled. These nine areas accounted for more than two-thirds of the students enrolled in noncredit courses with CIP data ( 71.3 percent). Approximately four out of ten enrollments in these large CIPs were in work-related courses: Business Management (14.4 percent), Transportation Workers (11.7 percent), Education ( 5.2 percent), Health Professions (4.9 percent), and Computer Information Systems ( 3.1 percent).

HIGHLIGHTS OF FISCAL YEAR 2009 ANNUAL REPORT
(Continued)
Student Completions

- A total of 53,053 collegiate-level degrees and certificates were awarded to Illinois community college students in fiscal year 2009.
- The number of community college completions in fiscal year 2009 is the highest count ever reported. Community colleges sustained an elevated level of completions during fiscal year 2009.
- The number of degrees and certificates awarded increased 3.4 percent from fiscal year 2008 ( $+1,738$ completers). Taking a longer view - compared to fiscal year 2005 - the total number of fiscal year 2009 completions increased 3.1 percent
- Career and Technical Education accounted for the largest number of graduates $(\mathrm{N}=36,785)$ in fiscal year 2009. Two-thirds of the earned degrees and certificates were in Career and Technical Education programs during fiscal year 2009 (69.3 percent). Career completions increased 3.4 percent from last year.
- Baccalaureate/transfer degrees accounted for the second largest group of completers in fiscal year 2009 ( $\mathrm{N}=14,908$ ). Nearly three out of every ten graduates earned Baccalaureate/Transfer degrees ( 28.1 percent). The number of Transfer degrees increased 1.9 percent $(+280)$ from last year.
- Approximately 27.8 percent of the career and technical education awards in fiscal year 2009 were AAS degrees.
- Females accounted for $\mathbf{5 6 . 2}$ percent of all 2009 completions.
- Career and Technical Education Certificates of Less Than One Year accounted for the largest number of male ( $\mathrm{N}=10,445$ ) and female ( $\mathrm{N}=10,222$ ) completers of a specific degree or certificate.
- Although small in number, the Associate in Engineering Science $(\mathrm{N}=94)$ had the highest proportion of male graduates (87.2 percent, $\mathrm{N}=82$ ).
- Minority students earned about 30 percent of the collegiate-level degrees and certificates awarded in the Illinois Community College System during fiscal year 2009. African American students earned 14.8 percent, Latino students earned 9.5 percent, and Asian students earned 5.5 percent of all degrees and certificates.
- Minorities accounted for about 23.4 percent of total Transfer degree recipients.
- Nearly four times as many minority graduates completed Career and Technical Education degrees and certificates ( $\mathrm{N}=12,427$ ) were awarded compared to baccalaureate/transfer degrees ( $\mathrm{N}=3,495$ ).
- Among the largest minority groups, African American students completed 2,810 more collegiate-level awards than Latino students.
- Fourteen percent of the students who were awarded degrees and certificates during fiscal year 2009 were less than 21 years of age. The age groups with the largest percentages of graduates were 21 to 24 ( 31.1 percent), 25 to 30 ( 17.0 percent), and 40 to 55 years of age ( 16.7 percent).
- Almost three-quarters of the Transfer degree completers in 2009 indicated an intent to transfer to a four-year institution. Approximately 17.5 percent of fiscal year 2009 Associate in Applied Science degree graduates indicated goals to complete some courses or finish a certificate.

## Overall Fiscal Year 2009 Student Enrollments

The Illinois Community College System recorded a total approaching one million $(954,396)$ students in credit and noncredit courses during fiscal year 2009. Overall combined enrollments increased compared to last year ( +2.2 percent, $\mathrm{N}=+20,756$ ).

Table 1 provides a summary comparison of fiscal year 2005 through fiscal year 2009 credit and noncredit unduplicated enrollments. Total enrollments reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

| Table 1 <br> SUMMARY COMPARISON OF ANNUAL ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2005-2009 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Unduplicated Headcount | FY 05 | FY 06 | FY 07 | FY 08 | FY 09 |

SOURCES OF DATA: Annual Enrollment (A1) Records
Annual Noncredit Course Enrollment (N1) Records

Detailed comparisons of fiscal year 2005 through fiscal year 2009 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

As depicted in Figure 1, credit-generating students account for 73.4 percent of the overall fiscal year 2009 headcount. Over the past three years, the credit-generating proportion remained relatively stable with more recent growth. Long-term noncredit enrollments are trending downward, while short-term noncredit enrollments are showing a slight recovery.

Fig. 1. Overall Annual Enrollments, FY 2005-2009
Statewide, 28,404 of 954,396 total enrolled in both credit and noncredit courses during fiscal year 2009 (A1 and N1). While there is some minimal overlap ( 3.0 percent), credit and noncredit courses are meeting largely different student and community needs.

## Fiscal Year 2009 Student Credit Enrollments

## Student Credit Enrollment by Community College

Annual credit enrollment for fiscal year 2009 was 700,072 , and full-time equivalent (FTE) students totaled 250,328. Table 2 contains comparative enrollment data for the last five years. Fiscal year 2009 saw a 2.6 percent increase in credit headcount enrollment from the previous year. Fiscal year 2009 FTE enrollment increased by about 4.4 percent compared to last year. Compared to five years ago, fiscal year 2009 credit headcount enrollments increased by 0.2 percent. FTE enrollments have increased 2.3 percent since 2005. Historically, credit headcount enrollments were at their highest at 727,310 in fiscal year 1992.

| Table 2 |  |  |  |  |  |

| $\%$ Change | $-0.2 \%$ | $-2.1 \%$ | $-0.5 \%$ | $0.7 \%$ | $4.4 \%$ |

## SOURCE OF DATA: Annual Enrollment (A1) Records

Table A-1 in the Appendix provides a comparison of fiscal year 2005 through fiscal year 2009 headcount enrollments for each community college. Among Illinois' 48 community colleges, 25 colleges reported increases in headcount while 14 exhibited decreases compared to fiscal year 2008. Nine colleges experienced little or no change ( 1.0 percent or less) during fiscal year 2009. Table A-2 contains a comparison of full-
time equivalent (FTE) enrollments for fiscal years 2005 through 2009. FTE calculations convert the substantial part-time enrollment into the number of students there would be if everyone attended on a full-time basis. Over the last year, 31 colleges experienced increases in FTE, ten reported decreases, and seven colleges experienced little or no FTE change versus fiscal year 2008.

## Male/Female Distribution

The male/female distribution of credit students typically fluctuates little from year to year with female students consistently constituting a slight majority. Females comprised 54.9 percent of the student population in fiscal year 2009. The percentage of male students has averaged 44.7 percent over the past five years (see Table A-3).

## Ethnic Origin

In fiscal year 2009, one-third ( 36.2 percent) of those participating in credit coursework in community colleges were minority (non-white) students. Minority representation increased by 5.1 percent from fiscal year 2008 to fiscal year 2009. Similarly, during the past five years, students from minority groups comprised an average of just over onethird ( 35.5 percent) of the student population. Latino students (now numbering 112,298) became the largest minority group in 2000, followed by African American students (now numbering 99,425). Compared to last year, increases were noted in credit headcount enrollments among African Americans and Latinos. In fiscal year 2009, the number of Latino credit students enrolled increased by 6.2 percent and the number of African American students enrolled in Illinois community college credit courses increased by 2.3 percent (see Table A-4).

## Student Age

In fiscal year 2009, the average age of Illinois community college students in credit courses was 30.7 years which is the same as fiscal year 2008. The median age was 25.5 years which is slightly lower than last
year (25.7). The largest proportion of students - over one-quarter (26.1 percent) - were between age 17 and 20, an increase of 4.7 percent over fiscal year 2008. The second largest proportion of students - just over one-fifth ( 20.6 percent) - were ages 21 through 24 , an increase of 2.8 percent over fiscal year 2008. The third largest proportion of students ( 17.7 percent) were 40 through 55 years of age, an increase of 2.8 percent over fiscal year 2008. During fiscal year 2009, 15.1 percent were age 25 through 30 and 13.9 percent of students were age 31 through 39 . Always the smallest in size, the 16 and under age group decreased 4.0 percent, representing only 1.5 percent of the student population in fiscal year 2009. Dual credit and dual enrollment arrangements where high achieving high school students are allowed to enroll in college-level courses is contributing to enrollment among the younger student population (see Table A-5).

## Summary of Enrollments by Instructional Program Area

Short-term, fiscal year 2009 enrollment increased in all instructional program areas. Increases ranged from 0.5 percent in Career and Technical Education to 23.4 percent in General Studies Certificate. Longer term, between fiscal years 2005 and 2009, results were mixed as one half of the instructional program areas registered growth - General Associate, Baccalaureate/Transfer and Vocational Skills - while the other half reported enrollment declines - General Studies Certificate, Adult Education and English as a Second Language (ESL), and Career and Technical Education.

Baccalaureate/transfer is the largest instructional program offered in the Illinois Community College System accounting for four out every ten credit students. This program is designed to provide individuals with the equivalent of the initial two years of a bachelors degree. Statewide, enrollment in this program area has increased slightly over the past year (1.7 percent) and is up 1.0 percent between fiscal years 2005 to 2009.

Career and Technical Education programs are the second largest credit program in the Illinois Community College System accounting for over one-quarter of all credit enrollments. Career and Technical Education
enrollments have increased 0.5 percent compared to last year and are down 1.8 percent since 2005. In the past year, enrollment in Vocational Skills programs increased by 2.0 percent and enrollment in General Studies Certificates increased by 23.4 percent. Enrollment in General Associate Degree programs increased by 13.9 percent in fiscal year 2009 (see Table A-6a).

Students enrolled in community college Adult Education courses comprised 15.7 percent of the credit-generating students in fiscal year 2009. Hence, less than one out of five community college students are enrolled in Adult Education skills building coursework. Statewide, there was a 3.1 percent increase in Adult Education enrollments over the previous year and community college Adult Education enrollments are down 9.0 percent since fiscal year 2005. In fiscal year 2009, 55.3 percent of the students in adult education were enrolled in English as a Second Language (ESL) courses.

The City Colleges of Chicago accounted for over one-third (36.9 percent) of statewide community college Adult Education enrollments in fiscal year 2009. Adult Education enrollment at the City Colleges of Chicago increased compared to last year ( 8.4 percent). This is larger than the short-term change in overall enrollment ( 5.7 percent) at the City Colleges of Chicago. Excluding the City Colleges of Chicago, there was a 0.2 percent increase in Adult Education enrollment in fiscal year 2009 compared to last year. (see Table A-6a and A-6b).

Longer term, excluding the City Colleges of Chicago, the rest of the system experienced an overall increase in enrollments (1.5 percent) between 2005 and 2009. Looking back across five years, analysis of instructional program area information and excluding City Colleges of Chicago data shows similar results for the rest of the system. The small General Associate programs recorded 26.3 percent growth excluding the City Colleges of Chicago. A moderate increase was exhibited in Baccalaureate/transfer programs (1.7 percent) between fiscal years 2005 and 2009. There was a slight decrease ( -1.3 percent) in Career and Technical Education program enrollment and an increase (11.1 percent)
in Vocational Skills enrollment. General Studies Certificate enrollments were down long term ( -11.0 percent) without the City Colleges of Chicago. Long-term results in Adult Education were down moderately across the rest of the system ( -5.0 percent). (See Table A-6b)

Instructional Program Enrollments by Gender. During fiscal year 2009, females outnumbered males in all instructional areas; the Adult Education programs contained the highest proportion of male students (49.4 percent). The highest proportion of female students were enrolled in the General Associate Degree program ( 60.0 percent) followed by the Baccalaureate/transfer programs (57.2 percent). The Career and Technical Education programs consisted of 50.8 percent female students, while 54.9 percent of those enrolled in Vocational programs and 56.8 percent of those enrolled in the General Studies Certificate program were female (see Table A-7).

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 2 illustrates the distribution of minorities in the two largest program areas, Baccalaureate/transfer and Career and Technical Education. An examination of each racial/ethnic group's representation across program areas in fiscal year 2009 indicates that the largest percentage of Asian (42.3 percent), White (42.8 percent), Native American (39.0 percent), Nonresident Alien students ( 53.0 percent), and African American (39.6 percent) were enrolled in Baccalaureate/transfer programs. The highest percentage of Latino ( 37.9 percent) students were enrolled in English as a Second Language programs. Overall, minority students were least represented in the vocational skills ( 13.9 percent), general studies certificate ( 22.2 percent), career and technical education ( 30.4 percent), and baccalaureate/transfer (31.3 percent) areas (see Table A-8).

Fig. 2. Fiscal Year 2009 Minority Enrollments in Baccalaureate/Transfer and Career and Technical Education Programs

Instructional Program Enrollments by Age. During fiscal year 2009, nearly one-half of community college credit students were under 25 years of age ( 47.9 percent). More than half of the students under 25 were enrolled in Baccalaureate/transfer programs ( 54.6 percent).

Almost three out of every ten ( 28.8 percent) credit students were between 25-39 years of age. Two program areas account for the largest portion of students between 25 and 39 years of age: Career and Technical Education (31.7 percent) and Baccalaureate/transfer (29.6 percent).

Overall, over one-fifth of Illinois' community college credit students were at least 40 years of age ( 22.7 percent). Among students 40 years of age and above, most were primarily enrolled in workforce-related courses (58.2 percent) which includes Career and Technical Education (28.9 percent) and short-term intensive Vocational Skills (29.3 percent) courses. About one-fifth of the students age 40 and above were pursuing Baccalaureate/transfer programs (19.6 percent) (see Table A-9).

Largest Career and Technical Programs. The largest Career and Technical Education curricula included Associate Degree in Nursing, Child Care Provider, Criminal Justice Technology, and Nursing Assistant in fiscal year 2009. With 16,016 students in fiscal year 2009, Associate Degree Nursing/Registered Nursing remained the largest program. Enrollment increased by 7.3 percent ( $+1,091$ students) over last year. RN program enrollments represent individuals who are pursuing the program but are not limited to individuals who have been formally admitted to the program. Child Care Provider/Assistant remained the second largest program despite a decrease of -2.4 percent ( -149 students). Criminal Justice decreased (-9.3 percent; -544 students) and remained the third largest program in 2009. Certified Nursing Assistant (CNA) enrollments decreased -0.4 percent (-17 students) in 2009 and CNA remained the fourth largest program. (see Table A-10) .

Instructional Program Enrollments by Intent. Intent data provide the primary goal that the student plans to achieve as a result of her/his studies. Initial intent data are self-reported by students when the student first enrolls at the college. College staff are asked to require students to update goal information each semester and provide a current intent, as well as retaining the student's original entry intent. Nearly three out of ten students reported a workforce goal which includes preparing for a job immediately after community college program completion (15.8 percent) and improving skills for a current position (13.7 percent).Slightly more students report a goal of preparing for transfer to a four-year institution ( 30.5 percent). GED preparation was the goal for 11.5 percent of the students.

In an examination of student intent by program area. Over one-half of the students in Adult Education, Career and Technical Education, Baccalaureate/transfer, and Vocational Skills programs reported the goal that is most often associated with a given major. About two-thirds of the ABE/ASE and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for enrolling in these programs. Similarly, almost six out of ten students in Career and Technical programs enrolled with the intent of preparing for a job after community college or to improve their job skills for their current position. Nearly 60 percent of the students enrolled in Baccalaureate/ transfer programs indicated an intent to transfer to a four-year institution. Almost 63 percent of the Vocational students enrolled with the intent of preparing for a job after community college or to improve job skills for their present position (see Table A-11).

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 2009, over half of community college students indicated that they were attending to complete courses rather than formal awards. Nearly 51 percent of all students indicated that they were enrolling with no intention of pursuing a degree - only to complete one or several courses. Figure 3 contains information on degree objective for the two largest community college programs. Baccalaureate/transfer students were split between degree seekers ( 60.5 percent) and course takers ( 37.0 percent). A small contingent of students in Baccalaureate/transfer programs indicated an interest in completing a certificate which would entail changing to a career or general studies major. Less than half ( 43.7 percent) of the Career and Technical Education students indicated they expected to complete an associate degree, while 33.2 percent expected to complete one or several courses. One in five plan to complete a certificate. Many Career and Technical students plan to complete an entire program, while others simply want to improve their current skills or obtain new skills to enter

Fig 3: Degree Objective for Baccalaureate/Transfer and Career and Technical Education, Fiscal Year 2009
a different career. More than nine out of ten students in the following program areas planned to only complete one or several courses: General Studies, Vocational, ESL and ABE/ASE (97.6; 94.6; 94.5; and 94.0 percent, respectively). (See Table A-12).

## Enrollment Hours by Term and Type of Attendance

Part-time attendance is prevalent among community college students who are often simultaneously engaged with college coursework, careers, and family responsibilities. During the fall semester, two-thirds (66.9 percent) of the students attended on a part-time basis (less than 12 credit hours). The part-time proportion was slightly higher ( 69.6 percent) in the spring. In a pattern not typical among higher education institutions, Illinois community college enrollment during spring semesters $(434,041)$ was actually slightly higher than in the fall $(416,784)$.

More than nine out of ten students ( 92.7 percent) attended on a part-time basis during the summer term of fiscal year 2009 (less than nine credit hours). (See Table A-13).

## Highest Degree Earned by Students Prior to Attending Community College

The prior earned degree data reiterate that community colleges serve diverse populations. Figure 4 illustrates the educational background of fiscal year 2009 students. Prior degree reporting has decreased compared to last year with only two-thirds of the students providing this information (adult education students would typically not possess earned degrees). Just about two-thirds of the students entered the community college with a high school diploma/GED. Nearly nineteen percent earned some type of postsecondary certificate or degree. About 14 percent had already earned degrees at or beyond the community college level. Nearly 18 percent of the students had previously taken college coursework. (see Table A-14).

Fig. 4. Headcount Enrollment by Prior Highest Degree Earned, FY 2009

## Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In fiscal year 2009, Illinois community college students completed over 5.7 million credit hours, which was 76.7 percent of the hours they attempted. Full-time and part-time students earned a similar percentage of the hours they attempted (see Table A-15).

## Accumulated College-Level Credit Hours

Of the 517,041 students ( 73.9 percent) for whom data were available, nearly two-thirds ( 65.1 percent) had accumulated less than 30 collegelevel hours (freshman level). About one-fifth (20.3 percent) had accumulated between 30 to 59 credit hours (sophomore status), and 14.5 percent earned 60 or more credit hours (See Table A-16).

## Grade Point Averages

Cumulative grade point average (GPA) data were available for 68.5 percent of the students enrolled in fiscal year 2009. Pre-college coursework does not generate GPA information. Over four out of five students had grade point averages of 2.01 or higher, which is a " C " average or above (83.2 percent). Nearly one-half of the students (47.1 percent) achieved grade point averages in the " $B$ " to " $A$ " range ( 3.01 to 4.00). The remaining one-third had achieved grade point averages in the "C" to "B"range (2.01 and 3.00). (See Table A-17).

## High School Graduation Percentile Rank

High school class rank was reported for 15.6 percent of the fiscal year 2009 community college students. Of this population, 5.3 percent were in the top 10 percent of their graduating class, while 52.2 percent graduated in the top half of their class (see Table A-18).

## ACT Scores of Community College Students

ACT score data were available for 17.0 percent of the students enrolled in fiscal year 2009. Sixty-one percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is frequently required for acceptance into many colleges or universities.

For those fiscal year 2009 students from whom data were gathered, the average ACT score was 20.0. The median score was 20.0 (see Table A19).

## Developmental Enrollment

During fiscal year 2009, just under one-fifth (19.5 percent) of students enrolled in Illinois community colleges - not enrolled in ABE/ASE/ESL, Vocational Skills or General Studies - took at least one developmental course $(98,408)$. This represents a slight increase of 1,054 students since last year when there were 97,354 students enrolled in developmental courses. Over the most recent five-year period (2005-2009), the percent of students enrolled in at least one developmental course decreased 0.6 percent. (See Table A-21).

Nationwide, according to the National Postsecondary Student Aid Study, 23.2 percent of the students enrolled in two-year public institutions took at least one developmental course (fiscal year 2000).

The appendices provide additional information on the academic area(s) in which students enrolled in developmental coursework at Illinois community colleges for fiscal years 2005 through 2009. (See Table A-23). Generally, community college students enrolled in developmental courses required assistance in only one academic area. Most of the time the area was Mathematics. In fiscal year 2009, nearly six out of every ten students participating in developmental coursework needed assistance in just Math ( 58.0 percent). Compared to last year, Math Only developmental enrollments increased slightly ( 0.0 percent; +11 ). Since fiscal year 2005, there was a decrease of 2.5 percent among students with the need to take developmental Math exclusively. In fiscal year 2009, English Only comprised 8.2 percent of the population requiring developmental assistance. About 4.6 percent of the developmental course enrollments were in Reading Only. Reading difficulties are particularly problematic since they impede an individual's ability to acquire new knowledge through written documents which is a foundational skill in every academic course. Additionally, 4.6 percent of the fiscal year 2009 students who enrolled in developmental coursework
took both English and Reading courses. Combinations of Math, English, and Reading developmental needs shows that more than four-fifths (82.6 percent) of community college students who enrolled in developmental courses required assistance with their Math skills - alone or in combination with other areas. From fiscal years 2008 to 2009, the population requiring help in Math - either alone or in combination with other areas - increased by 0.6 percent. Similarly long term, the proportion of students requiring Math skills enhancement - either alone or combined with other areas - also increased by 0.2 percent.

Nine percent of the students in developmental courses ( $\mathrm{N}=8,837$ ) needed assistance in all three areas - Math, English, and Reading. Requiring assistance in all three areas is a particularly serious situation since weaknesses exist across the spectrum of skills required to acquire and process new information.

As depicted in Table A-22, overall during fiscal year 2009, Illinois Community College System students earned almost two-thirds (64.2 percent) of the developmental credits they attempted. This is a slight increase from fiscal year 2008 when students earned 63.4 percent of remedial credits attempted. Over the five-year period of 2005 to 2009, the percent of developmental credits earned decreased from 63.1 percent in 2005 to a low of 62.0 percent in 2006, but rose in 2007, 2008, and 2009. (see Table A-22).

## Fiscal Year 2009 Student Noncredit Course Enrollments

## Student Noncredit Course Enrollment by Community College

Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. Fiscal year 1994 was the first year in which annual noncredit course enrollment data were collected. Beginning in fiscal year 2002, data are from the Noncredit Course Enrollment database (N1) which includes individual records for each student.

| Table 3 <br> COMPARISON OF ANNUAL NONCREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2005-2009 |  |  |  |  |  |

SOURCES OF DATA: FY2005 - FY2009 Noncredit Course Enrollment Data submission (N1)

Fiscal year 2009 is the eleventh year that the Illinois Community College System has undertaken data collection through a noncredit
course enrollment database (N1). The transition period from the paper survey to the database is complete.

During fiscal year 2009, Illinois community colleges conducted 25,016 noncredit course sections, about -0.6 percent fewer than the previous year. From fiscal years 2005 to fiscal year 2009, the total number of course sections offered through the colleges decreased -10.1 percent.

Despite a decrease in course offerings over the past five years, noncredit offerings continue to be an important part of college efforts to meet community and employer needs. Figure 5 illustrates that student enrollments have been increasing since last fiscal year. During fiscal year 2009, the unduplicated noncredit headcount (in which students are counted only once, regardless of the number of noncredit courses in which they enroll) increased 1.3 percent. Over a longer time frame, unduplicated noncredit headcounts have decreased -1.5 percent over the last five fiscal years. The duplicated headcount (also known as "seatcount") during fiscal year 2009 was 6.5 percent higher than the previous fiscal year and 2.0 percent higher than five years earlier.

The number of noncredit course offerings and enrollments at the community colleges often varies from year to year, depending on the needs of the surrounding communities. Comparisons of fiscal years 2005 through fiscal year 2009 noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3.

Reasons for the recent declines in noncredit activity and participation vary by locality. Local community college budgets continue to be tight and, generally, noncredit courses are only offered if they break even or are profitable. Additionally, there has been some resurgent resistance to reporting individual participant data. Records are not added to the noncredit database unless the category of activity information is supplied

- business/industry contract; professional/vocational development; personal/social development; and youth programs.

Characteristics of Noncredit Students

Fig. 5. Noncredit Course Enrollments, FY2005-2009
Information is available to provide additional detail about the characteristics of the students enrolled in noncredit coursework at community colleges in fiscal year 2009. Still, there tends to be more unknown/unreported information in the noncredit data than in the credit submission. Cited percentages among noncredit enrollments are based on the reported data. Student characteristic information is based on unduplicated counts. Information pertaining to course offerings is based on duplicated counts, since course attributes change and individuals can and do enroll in multiple courses.

Noncredit Student Gender. Similar to the distribution for credit programs, female students accounted for 55.5 percent of 2009 noncredit enrollments for which gender data were reported. Approximately 20.8 percent of students did not provide gender data. Gender data by category of activity show that most missing gender information was among individuals enrolled in personal and social development courses (see Table B-4).

Noncredit Student Ethnic Origin. Racial/ethnic reporting among noncredit students was less complete than among credit students, as more than one-fourth ( 29.3 percent) of noncredit records were missing racial/ethnic data. Minority students accounted for one-fourth (26.1 percent) of the individuals enrolled in noncredit programs who supplied racial/ethnic information. In credit programs during the past five years, minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: White (73.9 percent), African American (11.5 percent), Latino ( 8.5 percent), Asian ( 3.3 percent), Alien ( 2.6 percent), and Native American ( 0.3 percent) (see Table B-5).

Fig. 6. Age Distribution of Noncredit Students, FY 2009

Noncredit Student Age. Based on available data, the average age of students enrolled in noncredit coursework during fiscal year 2009 was 40.7 years and the median age was 38.8 years. Age information was missing for just over one-quarter ( 25.1 percent) of noncredit students during 2009. Noncredit programming served a more mature clientele than credit courses. Available age data are depicted in Figure 6. Onehalf ( 49.7 percent) of noncredit students were 40 years of age or older. Nearly one-third (31.1 percent) of noncredit students were ages 40 to 55 and another quarter ( 24.9 percent) were between 25 and 39 years of age. Just over one-fourth ( 25.4 percent) of noncredit students were under 25 years of age (see Table B-6).

Fig. 7. Category of Activity for Noncredit Course Enrollments (Dup), FY 2009

## Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework is grouped into four broad categories: Business and Industry Contract, Professional/ Vocational Development, Personal and Social Development, and

Youth Programs. Records were not added to the database unless the category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information depicted in Figure 7 (also see Table B-12).

Based on a duplicated count, 59.5 percent of the noncredit offerings were in the Personal and Social Development category. Personal and Social Development programming is an important community service provided by the colleges. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. They can also serve as a gateway to other credit or workforce-oriented courses offered by the college. Just over one-quarter ( 26.9 percent) of the noncredit coursework was dedicated to developing workplace skills: Professional/vocational (18.9 percent) and Business and Industry Contractual Training ( 8.0 percent). These courses meet the needs of area residents who are interested in acquiring specific skills without earning academic credit. Providing customized training is an important economic development activity in which colleges collaborate with local employers to tailor content and instructional delivery to their specific requirements. Illinois community colleges are extensively relied upon to develop and deliver coursework addressing the unique training requirements of area businesses, industries, and governmental organizations. The remaining 13.6 percent helped serve the needs of youth in the community (i.e., academic enrichment activities, athletic skills building, study skills, etc.).

## Largest Noncredit Offerings (Duplicated)

Two-digit classification of instructional program (CIP) codes provide additional information about the areas where noncredit instruction were provided. Percentages cited are based on known CIP codes.

Across all categories of activity, nine programs (two-digit CIP) had over 6,000 noncredit students enrolled. These nine program areas accounted for over two-thirds ( 71.3 percent) of the students enrolled in noncredit courses where CIP data were reported. Four out of ten enrollments
accounted for in Figure 8 are in work-related programs: Business Management (14.4 percent), Transportation Workers (11.7 percent), Education ( 5.2 percent), Health Professions (4.9 percent), and Computer Information Systems ( 3.1 percent). The two largest programs, each enrolling more than 60,000 students, were in the following areas: Self Improvement ( 32.1 percent) and Leisure and Recreation (23.9 percent). Liberal Arts and Sciences, General Studies, and Humanities accounted for 2.6 percent and Visual and Performing Arts accounted for 2.3 percent of those enrolled in these nine programs (see Table B-7).

Fig. 8. Largest Noncredit Offerings (Dup), FY 2009

## Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 2009 (see Table B-9). The distribution of enrollments by term was as follows: Spring (42.1 percent), Fall (31.8 percent), and Summer (26.1 percent). Overall, the distribution is similar to fiscal year 2008 credit offerings with somewhat lower spring noncredit
activity and higher summer and fall noncredit enrollments. Noncredit winter offerings are very low ( $\mathrm{N}=108$ students).

## Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five instructional site locations have been identified: Main Campus, Off-campus College Owned, Off-campus College Leased, Community Based, and Business Based. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site and Figure 9 shows that half of the enrollment occurred on main college campuses (See Table B-8).

Fig. 9. Noncredit Distribution by Site/Location, FY 2009

Fiscal Year 2009
Further information about the differences between the categories follows. Community-based sites are rented or leased, with site maintenance and upkeep the responsibility of the organization furnishing the space. Off-campus college-leased sites are controlled by the college with site maintenance and upkeep the responsibility of the college. Off-campus college-owned facilities are collegecontrolled branch or extension center sites located away from the main campus. Business-based sites are provided by businesses who contract for training services.

## Fiscal Year 2009 Completions

## Degrees and Certificates Awarded by Community College

The number of collegiate-level degrees and certificates awarded to Illinois community college students in fiscal year 2009 totaled 53,053. The number of community college completions in fiscal year 2009 is the highest level ever reported. Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded increased 3.4 percent from the previous year. Compared to fiscal year 2005, the total number of fiscal year 2009 completions increased 3.1 percent.

Table C-1 in the appendix provides a comparison of fiscal year 2005 through fiscal year 2009 duplicated completions for each community college. Compared to last year among the 48 colleges, 28 experienced increases in degree and certificate awards, while 18 exhibited decreases in the past year. Two colleges experienced little or no change.

Table 4

## SUMMARY COMPARISON OF ANNUAL COMPLETIONS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2005-2009

|  | $\underline{\text { FY 05 }}$ | FY 06 | FY 07 | FY 08 | FY 09 |

| \% Change | $7.2 \%$ | $-3.5 \%$ | $3.4 \%$ | $-0.0 \%$ | $3.4 \%$ |

SOURCE OF DATA: Annual Enrollment and Completion (A1)

## Degrees and Certificates Awarded by Program Categories

Over two-thirds of the 53,053 completers during fiscal year 2009 received Career and Technical Education degrees or certificates (69.3 percent). Baccalaureate/transfer degrees were the second most frequently awarded and accounted for 28.1 percent of all the collegiate-level completions (see Table C-2).

Looking at the trends over time, overall Career and Technical Education completions increased ( 3.4 percent) compared to last year. Historically, the fiscal year 2009 career completion counts are the highest level that has been recorded. Accordingly, a comparison of overall fiscal year 2009 Career and Technical Education completions to those granted five years earlier reveals that the total number of awards grew by 2.1 percent. Career and Technical awards recorded nearly across the board long-term increases. Since 2005, there has been an increase in short-term career certificates ( 313 graduates, or 1.5 percent). The number of longer term career certificates awarded also grew ( 203 graduates or 3.6 percent). Likewise, between fiscal years 2005 and 2009, there was an overall increase in Associate in Applied Science degrees (471 graduates or 4.8 percent). Vocational Skills was the exception as -222 fewer certificates were awarded in fiscal year 2009 compared to 2005.

A closer examination of the categories of formal awards issued within Career and Technical Education in fiscal year 2009 shows that more than one-half ( 56.2 percent) of the completions were Career Certificates of Less than One Year. More than one-fourth were Associate in Applied Science degrees ( 27.8 percent). Longer term Career Certificates accounted for 16.0 percent of the career program completions. The number of Vocational Skills Certificates awarded was less than 1 percent of career completions in fiscal year 2009. (See Table C-2).

The total number of Baccalaureate/transfer degrees awarded increased 1.9 percent compared to the last fiscal year. The overall number of

Baccalaureate/transfer degrees awarded in fiscal year 2009 increased from fiscal year 2005 ( 3.4 percent, $\mathrm{N}=490$ ).

Among Baccalaureate/transfer degrees granted, the Associate in Arts (AA) degree was most commonly awarded ( 59.6 percent). The proportion of AA degrees granted has been remarkably stable over the past five years. Almost one-third ( 32.7 percent) of the Baccalaureate/ transfer degrees earned were Associate in Science degrees.(See Table C$2)$.

## Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. As indicated in Table C-3, during fiscal year 2009, nearly six out of ten degrees and certificates were earned by females ( 56.2 percent). The three degrees and certificates attained by the highest proportion of females were the General Studies Certificate ( 90.5 percent), the Associate in Applied Science (62.9 percent), and Associate in Arts (61.1 percent). Although small in overall number, the Associate in Engineering Science ( $\mathrm{N}=94$ ) — one of the newest degree programs in the Illinois Community College System had the highest proportion of male graduates ( 87.2 percent, $\mathrm{N}=82$ ). Short-term Certificates of Less Than One Year were the specific award category with the largest number of male graduates ( $\mathrm{N}=10,445$ ). The male/female distribution within the Baccalaureate/transfer degree and Career and Technical Education degree and certificate areas drive the overall gender proportion.

Racial/Ethnic Origin of Graduates by Degree Category. Nearly one-third (30.9 percent) of all degrees and certificates in fiscal year 2009 were awarded to minority students (nonwhite). According to Table C-4, more than three and one-half times as many minority graduates completed Career and Technical Education degrees and certificates ( $\mathrm{N}=$ 12,427 ) than Baccalaureate/transfer degrees ( $\mathrm{N}=3,495$ ).

Nearly one out of every five ( 23.4 percent) fiscal year 2009 Baccalaureate/transfer degrees were earned by minority students. The
majority of the transfer degrees earned by minorities were Associate in Arts degrees ( 68.3 percent), while 27.8 percent were Associate in Science degrees. The overall proportion of minority Baccalaureate/transfer completers was similar to last year.

One-and-a-half times as many African American students ( $\mathrm{N}=7,836$ ) completed collegiate-level programs than did Latino students $(\mathrm{N}=$ 5,026 ) in fiscal year 2009. Figure 10 illustrates the distribution of minority students who successfully completed degree and certificate programs in the Illinois Community College System during fiscal year 2009. (See Table C-4).

Fig. 10. Associate Degrees Earned by Minority Students, Fiscal Year 2009

Age of Graduates by Degree Category. Fourteen percent of all completers were in the under 21 year old age group (13.9 percent). The youngest graduates were in Career and Technical Education (59.6 percent) and Transfer ( 39.6 percent) programs. The 21-24 age group accounted for nearly one-third (31.1 percent) of all graduates. Graduates between 25 and 30 accounted for almost one-fifth ( 17.0 percent) of the total, and the 31-39 age group accounted for 14.2 percent.

Over one-third ( 35.4 percent) of students 30 and under completed Baccalaureate/transfer degrees, while only 5.4 percent of graduates over the age of 30 completed Baccalaureate/transfer programs. More than nine out of ten ( 91.2 percent) graduates over 30 earned Career and Technical Education degrees and certificates. In general, the proportion of Career and Technical Education graduates increased as student age advanced (see Table C-5).

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, available current intent was examined to reflect the changing needs and desires of the community college student. Seven out of every ten students who attained a Baccalaureate/transfer degree in fiscal year 2009 indicated that they intended to prepare for transfer to a four-year institution. Just over one-tenth (10.8 percent) of these successful students indicated a desire to either prepare for a job immediately after community college or to improve present job skills - intent that would most often be associated with seeking a Career and Technical Education degree or certificate.

Similarly, 56.7 percent of those students who attained a Career and Technical Education degree or certificate indicated they were preparing for a job immediately after completing community college or improving present job skills. Nearly one-fifth (19.7 percent) of the Career and

Technical Education graduates indicated that they were preparing for transfer to a four-year institution. Pursuing a Career and Technical Education degree does not preclude a student from transferring to a fouryear institution (see Table C-6).

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college. One might anticipate that they would mirror student completion patterns. Four out of five (81.0 percent) students who earned Baccalaureate/transfer degrees in fiscal year 2009 indicated that they enrolled with a desire to complete an associate degree. However, nearly one in five ( 15.7 percent) indicated that they wanted to complete only one or several courses and were not pursuing a degree.

A review of Career and Technical Education graduates reveals the same pattern: 82.2 percent of the Career and Technical Education students who earned an Associate in Applied Science degree had listed completing an associate degree as their objective. Nearly one-fifth (17.5 percent) of the students who had planned to only complete one or several courses or a certificate ended up surpassing their goal by earning an Associate in Applied Science degree (see Table C-7).
