## Introduction

In an increasingly competitive world economy, America's economic strength depends upon the education and skills of its workers. In the coming years, jobs requiring at least an associate degree are projected to grow twice as fast as those requiring no college experience. To meet this need, President Obama set two national goals: by 2020, America will once again have the highest proportion of college graduates in the world, and community colleges will produce an additional 5 million graduates.
"Community colleges have an impact on anyone who chooses to attend one. I continue to believe, that community colleges have this ability to transform young people's lives, adults' lives, older people's lives in very profound ways." - Arne Duncan. White House. (March 3, 2012). Issues Brief: Building American Skills Through Community Colleges. Washington, DC: White House Office of the Press Secretary. Foley, Aaron. (November 1, 2012). Education Secretary Arne Duncan on Community Colleges: They Can Transform Lives. Detroit, MI: MLive.

Figure 1. Statewide Graduation Goal For Illinois Public Community Colleges Fiscal Years 2009-2025

At the national, state, and local levels community colleges are being relied upon to play an important role in helping additional individuals develop the skills and abilities to be more productive citizens. An educated and trained workforce is a key component to strengthening the Illinois and U.S. economies and elevating the individual's standard of living. Under the leadership of Governor Quinn, Illinois public community colleges and universities have made a commitment to rise to the challenge of producing additional graduates as founding members of Complete College America (CCA). Participating CCA states agree to set state and local completion goals, create action plans and modify policy to meet them and generate information on the CCA metrics. At the time of publication, 30 states have signed up to make the production of additional college graduates a top priority http://www.completecollege.org/ alliance_of_states/. CCA and the National Governors Association (NGA) are actively partnering to encourage and promote college completion. NGA's parallel initiative is called Complete to Compete (Reyna, 2010) http://www.subnet. nga.org/ci/1011/resources.htm. Additional national collaborators in the development of a set of common metrics include the National Center for Higher Education Management Systems (NCHEMS) and the State Higher Education Executive Officers (SHEEO). Data are collected on a series of Progress, Outcome and Context metrics. SHEEO was called upon to organize the year two CCA data collection process. With support from the colleges, the Illinois Community College Board (ICCB) remains among a select group of leading state agencies with centralized longitudinal data systems in place to generate the array of CCA metrics. Illinois Board of Higher Education (IBHE) staff gathered similar data that public universities produced locally and compiled the information before forwarding it to CCA officials.

As illustrated in Figure 1, Illinois community colleges are currently exceeding the statewide Complete College America (CCA) goal. At the local level for FY2011, twice as many colleges were ahead of their local goals $(\mathrm{N}=32)$ than trailing their local goals ( $\mathrm{N}=16$ ). Continued innovation by the colleges will be necessary to meet the elevated graduation expectations that ratchet up as the years progress.

For example, in step with emerging practice in other states, a recent report by Lieutenant Governor Simon (2012) encourages the creation of a General Education Core Curriculum (GECC) transfer credential that recognizes the achievement of foundational academic skills. Relatedly, the Reverse Transfer of University Credits is another suggestion which encourages higher education institutions to work more closely to recognize and certify associate degree skill attainment. Reverse Transfer of University Credit initiatives help community college students who transfer prior to earning their associate degree. Subsequent credits earned at a partner university (ies) are combined with credits earned at the sending community college. A degree audit is conducted by community college officials to determine if the student's combined academic work at multiple institutions fulfills that community college's associate degree requirements. Simon's (2012) report contains several other suggestions for helping to elevate community college completions. Local college officials are also examining an array of innovative approaches to increasing the production of degrees and certificates.

Figure 2 provides the historical data on the number of graduates from the Illinois Community College System for fiscal years 1986 through 2011. With 61,538 earned collegiate-level degrees and certificates, fiscal year 2011 set an all time high in the number of graduates from the Illinois Community College System. The number of graduates increased 8.2 percent from fiscal year 2010 ( $+4,654$ completers). Compared to fiscal year 2007 the total number of fiscal year 2011 completions increased 19.9 percent. Comparing results from 2011 to 1986 shows that the number of annual graduates doubled during that timeframe ( $+30,988$ ).

The Annual Enrollment and Completion (A1) submission is a major source of the community college data for the CCA metrics. A1 data are reported for individuals who are officially enrolled at the college in credit coursework at any time during the specified fiscal year. This year's Annual Enrollment and Completion Report is based on fiscal year 2011 enrollments and completions. Comparative information is supplied from four previous fiscal years (2007-2010). Detailed tables comparing fiscal year 2010 and fiscal year 2011 credit headcount, full-time equivalent (FTE) enrollments, and graduates by college are included. FTE enrollments in this report are based on all credit hours attempted (including non-reimbursable credit hours). Thirty credit hours equal one FTE. Additionally, noncredit courses provide another approach to the delivery of education, training, and public service by community colleges. Therefore, the Annual Enrollment and Completion Report include information about noncredit offerings for the current year (2011) and the four previous fiscal years (20072010). Since fiscal year 1999, the Illinois Community College System has been submitting a Noncredit Enrollment (N1) annual data containing demographic and course information on the wide range of noncredit instruction they provide. The following pages contain additional information about annual credit and noncredit enrollments and credit completions.

## Highlights of Fiscal Year 2011 Annual Report

## Student Enrollments

> The Illinois Community College System served nearly one million $\mathbf{( 9 4 9 , 8 1 9 )}$ students in credit and noncredit courses during fiscal year 2011. Overall combined enrollments decreased compared to last year (-3.6 percent, $\mathrm{N}=-35,191$ ).
> Credit-generating students accounted for 75.5 percent of the overall fiscal year 2011 headcount.
> During fiscal year 2011, the 48 public community colleges in Illinois enrolled 716,797 students in instructional credit courses. This is lower than the previous year ( 730,335 ). The full-time equivalent (FTE) enrollment was 272,520, a decrease of 0.3 percent since fiscal year 2010.
> Statewide, 22,586 noncredit course sections were conducted during fiscal year 2011.
> From fiscal year 2010 to fiscal year 2011, the number of individuals receiving instruction through noncredit course offerings decreased (-8.5 percent) to 233,022 students.
> Statewide, 31,213 of 949,819 total students enrolled in both credit and noncredit courses during fiscal year 2011 (A1 and N1). While there is some overlap, these data suggest that credit and noncredit courses are meeting largely different student and community needs.
> Females comprised 55.0 percent of the fiscal year 2011 student population enrolled in credit-generating programs.
> Minority (non-white) students accounted for over one-third (38.4 percent) of the credit students enrolled. African American student representation increased ( 1.5 percent) and accounted for 16.3 percent of all credit students. Latino student representation decreased (-1.6 percent) to 16.4 percent of all credit students. Asian student representation decreased slightly from the previous year to 4.4 percent, while foreign/nonresident alien representation decreased to 0.3 percent.
> The median age of credit-generating students was 25.2 during fiscal year 2011, a slight decrease from the previous year. The average age decreased to $\mathbf{3 0 . 3}$ years.
> Baccalaureate/transfer remained the largest credit instructional program area enrolling 39.7 percent of fiscal year 2011 Illinois Community College System students. Enrollments in baccalaureate/ transfer programs decreased 3.4 percent compared to the previous year.
> Statewide, career and technical education credit program enrollments accounted for more than one-quarter of all credit students (27.8 percent). Enrollments in career and technical programs decreased 3.2 percent from last year.
> Students enrolled in adult education courses in community colleges comprised 13.0 percent of the credit-generating students. Enrollment in adult education decreased by 11.4 percent versus fiscal year 2010.
> Of the students in adult education, approximately 53.4 percent were enrolled in English as a Second Language (ESL) courses.
> Although 39.7 percent of the fiscal year 2011 credit student population was enrolled in the baccalaureate/transfer area, only 33.3 percent of all students indicated intent to transfer.
> Nearly one-half ( 46.0 percent) of the fiscal year 2011 credit students enrolled in the colleges indicated that they were not pursuing a degree, but attending to complete one or several courses. Participation in college to take courses instead of pursuing a degree or certificate remained similar compared to the previous year.
> About two out of three credit students attended on a part-time basis during both the fall ( 64.8 percent) and spring ( 68.7 percent) semesters in fiscal year 2011.

# HIGHLIGHTS OF FISCAL YEAR 2011 ANNUAL REPORT 

## (Continued)

Student Enrollments
> Nineteen percent of the credit-generating students are known to already have earned some type of college certificate or degree. This includes 34,570 who earned a bachelor's degree or higher.
> Illinois community college students were enrolled in $\mathbf{8 , 1 7 5 , 6 1 3}$ credit hours throughout fiscal year 2011 and earned 76.7 percent of those hours.
> Accumulated credit hours were available for 77.0 percent of the fiscal year 2011 student population. Just over one-third of them (35.9 percent) attained sophomore-level status by accumulating 30 or more college-level hours.
> Cumulative grade point average data was reported for 71.6 percent of the fiscal year 2011 students. Nearly one-half ( 46.8 percent) held an A-B average.
> In fiscal year 2011, Illinois community college students earned 65.6 percent of the remedial credits they attempted. This percentage is up from 65.3 percent in fiscal year 2010.
> In fiscal year 2011, more than one-fifth (21.2 percent) of Illinois community college students (not enrolled in ABE/ASE/ESL, Vocational Skills, and General Studies) were enrolled in at least one developmental course - an increase from fiscal year 2010.
> Noncredit course enrollment figures for fiscal year 2011 are from the Noncredit Course Enrollment Data submission (N1).
> Over one-half of the 2011 noncredit courses were held on main college campuses ( 57.8 percent).
> Fiscal year 2011 unduplicated noncredit headcount decreased 8.5 percent over last year. The duplicated headcount or "seatcount" was 5.7 percent lower than the previous year.
> 22,586 noncredit course sections were conducted during fiscal year 2011.
> Female students accounted for 55.2 percent of 2011 noncredit enrollments for which gender data were reported.
> Minority students accounted for almost one-third (30.2 percent) of the individuals enrolled in noncredit courses who supplied racial/ethnic data.
> The median age of noncredit students was $\mathbf{3 5 . 0}$ during fiscal year 2011. The average age was 36.8 years.
$>$ Nearly one-half of the noncredit students were 40 years of age or above among the individuals who supplied this information.
> Nearly 60 percent of the noncredit offerings (duplicated) were in the Personal and Social Development category of activity. Over onequarter of the noncredit coursework was dedicated to developing workplace skills: Professional/vocational ( 20.4 percent) and Business and Industry Contractual training ( 6.2 percent).
> Across all categories of activity, ten broad course areas (two-digit CIP) had over 5,000 noncredit students enrolled. These ten areas accounted for more than two-thirds of the students enrolled in noncredit courses with CIP data ( 72.8 percent). Approximately four out of ten enrollments in these large CIPs were in work-related courses: Transportation Workers (15.1 percent), Business Management (13.2 percent), Health Professions ( 7.3 percent), Education ( 5.3 percent), and Computer Information Systems (3.4 percent).

## HIGHLIGHTS OF FISCAL YEAR 2011 ANNUAL REPORT <br> (Continued) <br> Student Completions

$>$ A total of 61,538 collegiate-level degrees and certificates were awarded to Illinois community college students in fiscal year 2011.
> The number of community college completions in fiscal year 2011 is the highest count ever reported for the third straight year. Community colleges sustained an elevated level of completions during fiscal year 2011.
> The number of degrees and certificates awarded increased 8.2 percent from fiscal year 2010 (+ 4,654 completers). Taking a longer view compared to fiscal year 2007 - the total number of fiscal year 2011 completions increased 19.9 percent.
> Career and Technical Education accounted for the largest number of graduates $(\mathrm{N}=43,048)$ in fiscal year 2011. Two-thirds of the earned degrees and certificates were in Career and Technical Education programs during fiscal year 2011 ( 70.0 percent). Career completions increased 8.8 percent from last year.
> Baccalaureate/transfer degrees accounted for the second largest group of completers in fiscal year 2011 ( $\mathrm{N}=16,750$ ). Nearly three out of every ten graduates earned Baccalaureate/Transfer degrees (27.2 percent). The number of Transfer degrees increased 4.7 percent (+756) from last year.
> Approximately 26.3 percent of the career and technical education awards in fiscal year 2011 were AAS degrees.
> Females accounted for $\mathbf{5 6 . 7}$ percent of all 2011 completions.
> Career and Technical Education Certificates of Less Than One Year accounted for the largest number of male ( $\mathrm{N}=12,151$ ) and female ( $\mathrm{N}=13,054$ ) completers of a specific degree or certificate.
$>$ Although small in number, the Associate in Engineering Science ( $\mathrm{N}=$ 114) had the highest proportion of male graduates ( 87.7 percent, $\mathrm{N}=$ 100).
> Minority students earned 29 percent of the collegiate-level degrees and certificates awarded in the Illinois Community College System during fiscal year 2011. African American students earned 13.6 percent, Latino students earned 9.9 percent, and Asian students earned 4.6 percent of all degrees and certificates.
> Minorities accounted for 23.8 percent of total Transfer degree recipients.
> More than three times as many minority graduates completed Career and Technical Education degrees and certificates ( $\mathrm{N}=13,352$ ) were awarded compared to baccalaureate/transfer degrees ( $\mathrm{N}=3,987$ ).
> Among the largest minority groups, African American students completed 2,260 more collegiate-level awards than Latino students.
> Fourteen percent of the students who were awarded degrees and certificates during fiscal year 2011 were less than 21 years of age. The age groups with the largest percentages of graduates were 21 to 24 ( 31.3 percent), 25 to 30 (19.9 percent), 31 to 39 years of age (16.4 percent), and 40 to 55 years of age ( 15.9 percent).
> Almost three-quarters of the Transfer degree completers in 2011 indicated intent to transfer to a four-year institution.
> Approximately 20.0 percent of fiscal year 2011 Associate in Applied Science degree graduates indicated goals to complete some courses or finish a certificate.

## Overall Fiscal Year 2011 Student Enrollments

The Illinois Community College System recorded a total approaching one million $(\mathbf{9 4 9}, 819)$ students in credit and noncredit courses during fiscal year 2011. Overall combined enrollments decreased compared to last year ( -3.6 percent, $\mathrm{N}=-35,191$ ).

Table 1 provides a summary comparison of fiscal year 2007 through fiscal year 2011 credit and noncredit unduplicated enrollments. Total enrollments reflect those students who may be concurrently enrolled in credit-generating and noncredit courses during the fiscal year.

| Table 1 <br> SUMMARY COMPARISON OF ANNUAL ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2007-2011 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Unduplicated Headcount | FY07 | FY08 | FY09 | FY10 | FY11 |
| Credit | 684,964 | 682,607 | 700,072 | 730,335 | 716,797 |
| \% Change | 0.3\% | -0.3\% | 2.6\% | 4.3\% | -1.9\% |
| Noncredit | 247,424 | 251,033 | 254,324 | 254,675 | 233,022 |
| \% Change | -2.7\% | 1.5\% | 1.3\% | 0.1\% | -8.5\% |

| \% Change | -0.5\% | 0.1\% | 2.2\% | 3.2\% | -3.6\% |

*Individuals may be concurrently enrolled in credit and noncredit courses
SOURCES OF DATA: Annual Enrollment (A1) Records
Annual Noncredit Course Enrollment (N1) Records
Detailed comparisons of fiscal year 2007 through fiscal year 2011 unduplicated credit and noncredit headcount enrollments for each community college are provided in Appendix tables A-1 and B-1, respectively.

As depicted in Figure 3, credit-generating students account for 75.5 percent of the overall fiscal year 2011 headcount. Enrollments had been growing in recent years but have decreased the past year. Fiscal year 2011 credit-generating enrollments are the second highest in the most recent 5 years, while non-credit enrollments are at the lowest of the most recent 5 years.

Figure 3. Overall Annual Enrollments, FY 2007-2011
Statewide, 31,213 of 949,819 total enrolled in both credit and noncredit courses during fiscal year 2011 (A1 and N1). While there is some minimal overlap ( 3.3 percent), credit and noncredit courses are meeting largely different student and community needs.

## Fiscal Year 2011 Student Credit Enrollments

## Student Credit Enrollment by Community College

Annual credit enrollment for fiscal year 2011 was 716,797, and fulltime equivalent (FTE) students totaled 272,520. Table 2 contains comparative enrollment data for the last five years. Fiscal year 2011 saw a 1.9 percent decrease in credit headcount enrollment from the previous year. Fiscal year 2011 FTE enrollment decreased slightly by about 0.3 percent compared to last year. Compared to five years ago, fiscal year 2011 credit headcount enrollments increased by 4.6 percent. FTE enrollments have increased 14.4 percent since 2007. Historically, fiscal year 2011 credit headcount enrollments were at their seventh highest level.

Table 2
COMPARISON OF ANNUAL CREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2007-2011

| Headcount | 684,964 | 682,607 | 700,702 | 730,335 | 716,797 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\%$ Change | $0.3 \%$ | $-0.3 \%$ | $2.6 \%$ | $4.3 \%$ | $-1.9 \%$ |
| FTE | 238,288 | 239,881 | 250,328 | 273,344 | 272,520 |
| $\%$ Change | $-0.5 \%$ | $0.7 \%$ | $4.4 \%$ | $9.2 \%$ | $-0.3 \%$ |

SOURCE OF DATA: Annual Enrollment (A1) Records

Table A-1 in the Appendix provides a comparison of fiscal year 2007 through fiscal year 2011 headcount enrollments for each community college. Among Illinois’ 48 community colleges, 14 colleges reported increases in headcount while 31 exhibited decreases compared to fiscal year 2010. Three colleges experienced little or no change ( 1.0 percent or less) during fiscal year 2011. Table A-2 contains a comparison of full-time equivalent (FTE) enrollments for fiscal years 2007 through 2011. FTE calculations convert the substantial part-time enrollment into the number of students there would be if everyone attended on a full-time basis. Over the last year, 17 colleges experienced increases in FTE, 22 reported decreases, and 9 colleges experienced little or no FTE change versus fiscal year 2010.

## Male/Female Distribution

The male/female distribution of credit students typically fluctuates little from year to year with female students consistently constituting a slight majority. Females comprised 55.0 percent of the student population in fiscal year 2011. The percentage of male students has averaged 45.0 percent over the past five years (see Table A-3).

## Ethnic Origin

In fiscal year 2011, one-third (38.4 percent) of those participating in credit coursework in community colleges were minority (non-white) students (among whose ethnicity was known). Minority representation increased by 0.6 percent from fiscal year 2010 to fiscal year 2011. Similarly, during the past five years, students from minority groups comprised an average of just over one-third ( 36.4 percent) of the student population. Latino students (now numbering 112,628) became the largest minority group in 2000, followed by African American students (now numbering 112,136). Compared to last year, increases were noted in credit headcount enrollments among African Americans and decreases among Latinos. In fiscal year 2011, the number of

Latino credit students enrolled decreased by 1.6 percent and the number of African American students enrolled in Illinois community college credit courses increased by 1.5 percent (see Table A-4).

## Student Age

In fiscal year 2011, the average age of Illinois community college students in credit courses was 30.3 years which is lower than fiscal year 2010 ( $\mathrm{N}=30.5$ years). The median age was 25.2 years which is also lower than last year (25.4). The largest proportion of students over one-quarter ( 26.1 percent) - was between age 17 and 20, a decrease of 2.1 percent over fiscal year 2010. The second largest proportion of students - just over one-fifth ( 21.9 percent) - were ages 21 through 24, an increase of 1.9 percent over fiscal year 2010. The third largest proportion of students (16.3 percent) was 40 through 55 years of age, a decrease of 6.1 percent over fiscal year 2010. During fiscal year 2011, 15.4 percent were age 25 through 30 , and 13.9 percent of students were age 31 through 39. Always the smallest in size, the 16 and under age group decreased 14.3 percent, representing only 1.2 percent of the student population in fiscal year 2011. Dual credit and dual enrollment arrangements where high achieving high school students are allowed to enroll in college-level courses is contributing to enrollment among the younger student populations (see Table A-5).

## Summary of Enrollments by Instructional Program Area

Short-term, fiscal year 2011 enrollment decreased in all but one of the instructional program areas. Decreases ranged from 3.2 percent in Career and Technical Education to 11.4 percent in Adult Education and English as a second language. Baccalaureate/Transfer decreased 3.4 percent, General Studies Certificate decreased 7.3 percent, and Vocational Skills decreased 6.6 percent. General Associate was the only program to increase from fiscal year 2010 ( 41.4 percent). Longer term, between fiscal years 2007 and 2011 results were mixed as three of the instructional program areas registered growth - General

Associate, Baccalaureate/Transfer, and Career and Technical Education - while the other three reported enrollment declines Vocational Skills, General Studies Certificate and Adult Education and English as a Second Language (ESL).

Baccalaureate/transfer is the largest instructional program offered in the Illinois Community College System accounting for four out every ten credit students. This program is designed to provide individuals with the equivalent of the initial two years of a bachelor's degree. Statewide, enrollment in this program area has decreased over the past year ( -3.4 percent) and is up 3.4 percent between fiscal years 2007 to 2011.

Career and Technical Education programs are the second largest credit program in the Illinois Community College System accounting for over one-quarter of all credit enrollments. Career and Technical Education enrollments have decreased 3.2 percent compared to last year and are up 8.6 percent since 2007. In the past year, enrollment in Vocational Skills programs decreased by 6.6 percent and enrollment in General Studies Certificates decreased by 7.3 percent. Enrollment in General Associate Degree programs increased by 41.4 percent in fiscal year 2011 (see Table A-6a).

Students enrolled in community college Adult Education courses comprised 13.0 percent of the credit generating students in fiscal year 2011. Hence, less than one out of seven community college students are enrolled in Adult Education skills building coursework. Statewide, there was a 11.4 percent decrease in Adult Education enrollments over the previous year and community college Adult Education enrollments are down 15.5 percent since fiscal year 2007. In fiscal year 2011, 53.4 percent of the students in adult education were enrolled in English as a Second Language (ESL) courses.

The City Colleges of Chicago accounted for over one-third (35.4 percent) of statewide community college Adult Education enrollments in fiscal year 2011. Adult Education enrollment at the City Colleges of Chicago decreased compared to last year ( -17.8 percent). This is compared to the short-term decrease in overall enrollment (-5.1 percent) at the City Colleges of Chicago. Excluding the City Colleges of Chicago, there was a 7.5 percent decrease in Adult Education enrollment in fiscal year 2011 compared to last year (see Table A-6a and A-6b).

Longer term, excluding the City Colleges of Chicago, the rest of the system experienced an overall increase in enrollments (4.1 percent) between 2007 and 2011. Looking back across five years, analysis of instructional program area information and excluding City Colleges of Chicago data shows similar results for the rest of the system. The small General Associate programs recorded 58.2 percent growth excluding the City Colleges of Chicago. An increase was exhibited in Baccalaureate/transfer programs ( 7.5 percent) between fiscal years 2007 and 2011. There was an increase in Career and Technical Education (10.8 percent) program enrollment. Vocational Skills (-8.1 percent) enrollments and General Studies Certificate (-67.0 percent) enrollments were down long-term without the City Colleges. Longterm results in Adult Education were down moderately across the rest of the system (-15.9 percent) (see Table A-6b).

Instructional Program Enrollments by Gender. During fiscal year 2011, females outnumbered males in all instructional areas; the Career and Technical Education programs contained the highest proportion of male students ( 49.1 percent). The highest proportion of female students were enrolled in the General Associate degree programs (61.4 percent) followed by the General Studies Certificate programs (61.0 percent) and English as a Second Language programs ( 58.4 percent). Baccalaureate/Transfer programs consisted of 56.5 percent female students, while 52.5 percent of those enrolled in Vocational programs
and 51.8 percent of those enrolled in Adult Education programs were female (see Table A-7).

Figure 4. FY 2011 Minority Enrollments in Baccalaureate/Transfer and Career and Technical Education Programs

Instructional Program Enrollments by Racial/Ethnic Origin. Figure 4 illustrates the distribution of minorities in the two largest program areas, Baccalaureate/transfer and Career and Technical Education. An examination of each racial/ethnic group's representation across program areas in fiscal year 2011 indicates that the largest percentage of Asian (43.4 percent), White (44.5 percent), Native American (39.3 percent), Nonresident Alien students ( 64.9 percent), and African American ( 33.9 percent) were enrolled in Baccalaureate/transfer programs. The highest percentage of Latino ( 30.5 percent) students was enrolled in English as a Second Language programs. The highest percentage of Pacific Islander students was enrolled in Vocational Skills programs (43.9 percent). Overall, minority students (nonwhite) were least represented in the vocational skills (21.9 percent), career
and technical education (33.1 percent), and baccalaureate/transfer (33.9 percent) areas (see Table A-8).

Instructional Program Enrollments by Age. During fiscal year 2011, nearly one-half of community college credit students were under 25 years of age ( 48.9 percent). More than half of the students under 25 were enrolled in Baccalaureate/transfer programs ( 54.4 percent). Almost three out of every ten ( 29.1 percent) credit students were between 25-39 years of age. Two program areas account for the largest portion of students between 25 and 39 years of age: Career and Technical Education ( 32.5 percent) and Baccalaureate/transfer (29.6 percent). Overall, over one-fifth of Illinois' community college credit students were at least 40 years of age ( 21.2 percent). Among students 40 years of age and above, most were primarily enrolled in workforce related courses ( 56.0 percent) which includes Career and Technical Education (31.2 percent) and short-term intensive Vocational Skills (24.7 percent) courses. About one-fifth of the students 40 and above was pursuing Baccalaureate/transfer programs (20.7 percent) (see Table A-9).

Largest Career and Technical Programs. The largest Career and Technical Education curricula included Engineering Technologies, Associate Degree in Nursing, Other Health Professions and Related Clinical Sciences, Criminal Justice Technology, Child Care Provider, Nursing Assistant, Business Administration and Management, and Automobile Mechanics Technology in fiscal year 2011. Engineering Technologies was the largest program in fiscal year 2011 with 20,235 enrollments, an increase of 0.6 percent ( +112 students) from fiscal year 2010. With 19,042 students in fiscal year 2011, Associate Degree Nursing/Registered Nursing was the second largest program. Enrollment increased by 8.7 percent ( $+1,520$ students) over last year. RN program enrollments represent individuals who are pursuing the program but are not limited to individuals who have been formally admitted to the program. With a decrease of enrollments of 23.5
percent from last year, Health Professions and Related Clinical Sciences, Other was the third largest program in fiscal year 2011. Criminal Justice increased ( 9.2 percent; +605 students) and was the fourth largest program in 2011. Child Care Provider/Assistant decreased 2.5 percent ( -167 students) but was the fifth largest program in 2011. A certified Nursing Assistant (CNA) enrollment increased 0.3 percent ( +16 students) in 2011 and was the sixth largest program, while Business Administration and Management decreased 5.9 percent (-273 students) and was the sixth largest program in fiscal year 2011 (see Table A-10).

Instructional Program Enrollments by Intent. Intent data provide the primary goal that the student plans to achieve as a result of her/his studies. Initial intent data are self-reported by students when the student first enrolls at the college. College staff is asked to require students to update goal information each semester and provide a current intent, as well as retaining the student's original entry intent. Nearly three out of ten students reported a workforce goal which includes preparing for a job immediately after community college program completion ( 16.8 percent) and improving skills for a current position ( 12.5 percent). Slightly more students report a goal of preparing for transfer to a four-year institution (33.3 percent). GED preparation was the goal for 11.9 percent of the students.

In an examination of student intent by program area, over one-half of the students in Adult Education, Career and Technical Education, Baccalaureate/transfer and Vocational Skills programs reported the goal that is most often associated with a given major. More than three-quarters of the $\mathrm{ABE} / \mathrm{ASE}$ and ESL students listed a desire to remedy basic skills deficiencies or to prepare for the GED test as their reason for enrolling in these programs. Fifty-three percent of students in Career and Technical programs enrolled with the intent of preparing for a job after community college or to improve their job skills for their current position. Fifty-six percent of the students enrolled in

Baccalaureate/ transfer programs indicated an intent to transfer to a four-year institution. Sixty-four percent of the Vocational students enrolled with the intent of preparing for a job after community college or to improve job skills for their present position (see Table A-11).

Instructional Program Enrollments by Degree Objective. Degree objective data are also self-reported and are designed to assist colleges in classifying students by curriculum or course enrollee category. The objective conveys the student's expected outcome from attending the community college. In fiscal year 2011, 46.0 percent of all students indicated that they were enrolling with no intention of pursuing a degree - only to complete one or several courses. Figure 5 contains information on degree objective for the two largest community college programs. Baccalaureate/transfer students were split between degree seekers ( 59.5 percent) and course takers ( 37.7 percent). A small contingent of students in Baccalaureate/transfer programs indicated an interest in completing a certificate which would entail changing to a career or general studies major. Less than half ( 49.0 percent) of the Career and Technical Education students indicated they expected to complete an Associate degree, while 30.4 percent expected to complete one or several courses. One in five plan to complete a certificate. Many Career and Technical students plan to complete an entire program, while others simply want to improve their current skills or obtain new skills to enter a different career. More than nine out of ten students in the following program areas planned to only complete one or several courses: General Studies, Vocational, ESL, and ABE/ASE (94.9; 94.6; 94.3; and 92.0 percent, respectively) (see Table A-12).

## Enrollment Hours by Term and Type of Attendance

Part-time attendance is prevalent among community college students who are often simultaneously engaged with college coursework, careers, and family responsibilities. During the fall semester, nearly two-thirds (64.8 percent) of the students attended on a part-time basis
(less than 12 credit hours). The part-time proportion was slightly higher ( 68.7 percent) in the spring. In a pattern not typical among higher education institutions, Illinois community college enrollment during the spring semester $(449,256)$ was actually slightly higher than in the fall $(437,209)$. More than nine out of ten students $(92.1$ percent) attended on a part-time basis during the summer term of fiscal year 2011 (less than nine credit hours) (see Table A-13).

Figure 5. Degree Objective for Baccalaureate/Transfer and Career and Technical Education, FY 2011

## Highest Degree Earned by Students Prior to Attending Community College

The prior earned degree data reiterate that community colleges serve diverse populations. Figure 6 illustrates the educational background of fiscal year 2011 students. Prior degree reporting is similar compared to last year with only two-thirds of the students providing this information (adult education students would typically not possess earned degrees). Just about two-thirds of the students entered the community college with a high school diploma/GED. Nineteen
percent earned some type of postsecondary certificate or degree. About 14 percent had already earned degrees at or beyond the community college level. Seventeen percent of the students had previously taken college coursework (see Table A-14).

Figure 6. Headcount Enrollment by Prior Highest Degree Earned, FY 2011

## Attempted vs. Earned Credit Hours

At all colleges and universities, there are students who, for a variety of reasons, are unable or unwilling to complete the requirements for the class(es) in which they enroll. In fiscal year 2011, Illinois community college students completed over 6.2 million credit hours, which was 76.7 percent of the hours they attempted. Full-time and part-time students earned a similar percentage of the hours they attempted (see Table A-15).

## Accumulated College-Level Credit Hours

Of the 551,697 students ( 77.0 percent) for whom data were available, nearly two-thirds ( 64.1 percent) had accumulated less than 30 college-
level hours (freshman level). About one-fifth (21.0 percent) had accumulated between 30 and 59 credit hours (sophomore status), and 14.9 percent earned 60 or more credit hours (see Table A-16).

## Grade Point Averages

Cumulative grade point average (GPA) data were available for 71.6 percent of the students enrolled in fiscal year 2011. Pre-college coursework does not generate GPA information. Over four out of five students had grade point averages of 2.01 or higher, which is a " C " average or above ( 83.2 percent). Nearly one-half of the students (46.8 percent) achieved grade point averages in the " $B$ " to " $A$ " range ( 3.01 to 4.00 ). The remaining one-third had achieved grade point averages in the "C" to "B" range (2.01 to 3.00) (see Table A-17).

## High School Graduation Percentile Rank

High school class rank was reported for 15.8 percent of the fiscal year 2011 community college students. Of this population, 5.2 percent were in the top 10 percent of their graduating class, while 52.3 percent graduated in the top half of their class (see Table A-18).

## ACT Scores of Community College Students

ACT score data were available for 17.2 percent of the students enrolled in fiscal year 2011. Sixty-three percent of the students received a 19 or higher on the ACT exam. A minimum of 18 on the ACT exam is frequently required for acceptance into many colleges or universities. For those fiscal year 2011 students from whom data were gathered, the average ACT score was 20.2. The median score was 20.0 (see Table A-19).

## Developmental Enrollment

During fiscal year 2011, just over one-fifth ( 21.2 percent) of students enrolled in Illinois community colleges - not enrolled in ABE/ASE/ESL, Vocational Skills or General Studies - took at least one developmental course $(117,055)$. This represents an increase of

1,213 students since last year when there were 115,842 students enrolled in developmental courses. Over the most recent five-year period (2007-2011), the number of students enrolled in at least one developmental course increased 21.0 percent (see Table A-21).

Nationally in Fall 2000, 42 percent of entering freshman at public 2year degree-granting institutions enrolled in a remedial course (mathematics, reading, or writing). Over one-third were enrolled in remedial mathematics courses ( 35 percent). About one in five was enrolled in remedial reading (20 percent) and remedial writing (23 percent) courses (National Center for Education Statistics, 2011).

The appendices provide additional information on the academic area(s) in which students enrolled in developmental course work at Illinois community colleges for fiscal years 2007 through 2011 (see Table A23). Generally, community college students enrolled in developmental courses required assistance in only one academic area. Most of the time the area was Mathematics. In fiscal year 2011, nearly 6 out of every 10 students participating in developmental coursework needed assistance in just Math ( 55.8 percent). Compared to last year, Math Only developmental enrollments decreased 0.3 percent. Since fiscal year 2007, there was an increase of 14.8 percent among students with the need to take developmental Math exclusively. In fiscal year 2011, English Only comprised 8.3 percent of the population requiring developmental assistance. About 5.2 percent of the developmental course enrollments were in Reading Only. Reading difficulties are particularly problematic since they impede an individual's ability to acquire new knowledge through written documents which is a foundational skill in every academic course. Additionally, 4.9 percent of the fiscal year 2011 students who enrolled in developmental coursework took both English and Reading courses. Combinations of Math, English, and Reading developmental needs shows that more than four-fifths ( 81.6 percent) of community college students who enrolled in developmental courses required assistance with their Math
skills - alone or in combination with other areas. From fiscal years 2010 to 2011, the population requiring help in Math - either alone or in combination with other areas - remained about the same. Similarly long term, the proportion of students requiring Math skills enhancement - either alone or combined with other areas - also remained about the same.

More than 9 percent of the students in developmental courses ( $\mathrm{N}=$ 10,837 ) needed assistance in all three areas - Math, English, and Reading. Requiring assistance in all three areas is a particularly serious situation since weaknesses exist across the spectrum of skills required to acquire and process new information.

As depicted in Table A-22, overall during fiscal year 2011, Illinois Community College System students earned almost two-thirds (65.6 percent) of the developmental credits they attempted. This is a slight increase from fiscal year 2010 when students earned 65.3 percent of remedial credits attempted. Over the five-year period of 2007 to 2011, the percent of developmental credits earned has increased each year from 62.2 percent in 2007 to 65.6 percent in 2011 (see Table A-22).

## Fiscal Year 2011 Student Noncredit Course Enrollments

## Student Noncredit Course Enrollment by Community College

Illinois community colleges provide a wide range of noncredit instruction to meet a variety of community needs. Table 3 contains comparative noncredit enrollment data for the last five years. Fiscal year 1994 was the first year in which annual noncredit course enrollment data were collected. Beginning in fiscal year 2002, data are from the Noncredit Course Enrollment database (N1) which includes individual records for each student.

## Table 3

COMPARISON OF ANNUAL NONCREDIT ENROLLMENTS IN ILLINOIS PUBLIC COMMUNITY COLLEGES FISCAL YEARS 2007-2011

| FISCAL YEARS 2007-2011 |  |  |  |  |  |  |

| \% Change | $-1.8 \%$ | $-3.0 \%$ | $-0.6 \%$ | $-2.1 \%$ | $-7.7 \%$ |  |

SOURCES OF DATA: Noncredit Course Enrollment Data submission (N1)

Fiscal year 2011 is the thirteenth year that the Illinois Community College System has undertaken data collection through a noncredit course enrollment database (N1). The transition period from the paper survey to the database is complete.

During fiscal year 2011, Illinois community colleges conducted 22,586 noncredit course sections, about 7.7 percent fewer than the previous year. From fiscal years 2007 to fiscal year 2011, the total number of course sections offered through the colleges decreased 12.9 percent. Despite a decrease in course offerings over the past five years, noncredit offerings continue to be an important part of college efforts to meet community and employer needs. Figure 7 illustrates that unduplicated student enrollments had been increasing from fiscal year 2008 through fiscal year 2010. During fiscal year 2011, the unduplicated noncredit headcount (in which students are counted only once, regardless of the number of noncredit courses in which they enroll) decreased 8.5 percent. Over a longer time frame, unduplicated noncredit headcounts have decreased 5.8 percent over the last five fiscal years. The duplicated headcount (also known as "seatcount") during fiscal year 2011 was 5.7 percent lower than the previous fiscal year and 7.3 percent lower than five years earlier.

The number of noncredit course offerings and enrollments at the community colleges often varies from year to year, depending on the needs of the surrounding communities. Comparisons of fiscal years 2007 through fiscal year 2011 noncredit headcount enrollments and course sections conducted for each community college are provided in Appendix Tables B-1, B-2, and B-3. Reasons for the recent declines in noncredit activity and participation vary by locality. Local community college budgets continue to be tight and, generally, noncredit courses are only offered if they break even or are profitable. Additionally, there has been some resurgent resistance to reporting individual participant data. Records are not added to the noncredit database unless the category of activity information is supplied business/industry contract; professional/vocational development; personal/social development; and youth programs.

Figure 7. Noncredit Course Enrollments, FY2007-2011

## Characteristics of Noncredit Students

Information is available to provide additional detail about the characteristics of the students enrolled in noncredit coursework at community colleges in fiscal year 2011. Still, there tends to be more unknown/unreported information in the noncredit data than in the credit submission. Cited percentages among noncredit enrollments are based on the reported data. Student characteristic information is based on unduplicated counts. Information pertaining to course offerings is based on duplicated counts, since course attributes change and individuals can and do enroll in multiple courses.

Noncredit Student Gender. Similar to the distribution for credit programs, female students accounted for 55.2 percent of 2011 noncredit enrollments for which gender data were reported. Approximately 12.5 percent of students did not provide gender data. Gender data by category of activity show that most missing gender information was among individuals enrolled in personal and social development courses (see Table B-4).

Noncredit Student Ethnic Origin. Racial/ethnic reporting among noncredit students was less complete than among credit students, as more than one-third ( 34.9 percent) of noncredit records were missing racial/ethnic data. Minority students accounted for nearly one-third ( 30.2 percent) of the individuals enrolled in noncredit programs who supplied racial/ethnic information. In credit programs during the past five years, minorities accounted for an average of about one-third of the student population. Available noncredit data indicated the following racial/ethnic distribution: White (69.8 percent), African American (14.8 percent), Latino ( 8.4 percent), Asian ( 3.3 percent), Alien ( 3.2 percent), Native American ( 0.3 percent), and Pacific Islander ( 0.2 percent) (see Table B-5).

Figure 8. Age Distribution of Noncredit Students, FY 2011

Noncredit Student Age. Based on available data, the average age of students enrolled in noncredit coursework during fiscal year 2011 was 36.8 years and the median age was 35.0 years. Age information was missing for just under one-quarter ( 24.5 percent) of noncredit students during 2011. Noncredit programming served a more mature clientele than credit courses. Available age data are depicted in Figure 8. Onehalf ( 49.2 percent) of noncredit students were 40 years of age or older. Nearly one-third (28.6 percent) of noncredit students were ages 40 to 55 and another quarter ( 23.4 percent) were between 25 and 39 years of age. Just over one-fourth ( 27.3 percent) of noncredit students were under 25 years of age (see Table B-6).

Figure 9. Category of Activity, Noncredit Course Enrollments (Dup), FY 2011

## Noncredit Category of Activity (Duplicated)

For state reporting purposes, noncredit coursework is grouped into four broad categories: Business and Industry Contract, Professional/ Vocational Development, Personal and Social Development, and Youth Programs. Records were not added to the database unless the category of activity information was supplied. Duplicated noncredit enrollment counts are used in the category of activity information depicted in Figure 9 (also see Table B-12).

Based on a duplicated count, 58.4 percent of the noncredit offerings were in the Personal and Social Development category. Personal and Social Development programming is an important community service provided by the colleges. Typically, these courses are offered as long as demand is sufficient to at least cover the cost of course delivery. They can also serve as a gateway to other credit or workforce-oriented courses offered by the college. Just over one-quarter ( 26.6 percent) of the noncredit coursework was dedicated to developing workplace skills: Professional/vocational (20.4 percent) and Business and Industry Contractual Training ( 6.2 percent). These courses meet the needs of area residents who are interested in acquiring specific skills without earning academic credit. Providing customized training is an important economic development activity in which colleges collaborate with local employers to tailor content and instructional delivery to their specific requirements. Illinois community colleges are extensively relied upon to develop and deliver coursework addressing the unique training requirements of area businesses, industries, and governmental organizations. The remaining 15.0 percent helped serve the needs of youth in the community (i.e., academic enrichment activities, athletic skills building, study skills, etc.).

## Largest Noncredit Offerings (Duplicated)

Two-digit classifications of instructional program (CIP) codes provide additional information about the areas where noncredit instruction was provided. Percentages cited are based on known CIP codes.

Across all categories of activity, ten programs (two-digit CIP) had over 5,000 noncredit students enrolled. These ten program areas accounted for over two-thirds (72.8 percent) of the students enrolled in noncredit courses where CIP data were reported. Four out of ten enrollments accounted for in Figure 10 are in work-related programs: Transportation Workers (15.1 percent), Business Management (13.2 percent), Health Professions ( 7.3 percent), Education ( 5.3 percent),
and Computer Information Systems ( 3.4 percent). The two largest programs, each enrolling more than 50,000 students, were in the following areas: Leisure and Recreation ( 25.0 percent) and Self Improvement ( 22.8 percent). Liberal Arts and Sciences, General Studies, and Humanities accounted for 3.0 percent, Visual and Performing Arts accounted for 2.7 percent, and Basic Skills accounted for 2.3 percent of those enrolled in these ten programs (see Table B-7).

Figure 10. Largest Noncredit Offerings (Dup), FY 2011

## Noncredit Term of Attendance (Duplicated)

Term of enrollment was provided for all noncredit coursework for fiscal year 2011 (see Table B-9). The distribution of enrollments by term was as follows: Spring ( 40.9 percent), Fall ( 34.0 percent), and Summer (25.1 percent). Overall, the distribution is similar to fiscal year 2011 credit offerings with somewhat higher summer and spring noncredit activity and lower fall noncredit enrollments. There were no noncredit winter offerings in fiscal year 2011.

## Noncredit Enrollment Distribution by Site/Location (Duplicated)

For state reporting purposes, five instructional site locations have been identified: Main Campus, Off-campus College Owned, Off-campus College Leased, Community Based, and Business Based. Acquiring more complete information about community college facility utilization and needs was one of the underlying reasons for collecting more detailed noncredit data. Complete data were available on the instructional site and Figure 11 shows that over half of the enrollment occurred on main college campuses (See Table B-8).

Further information about the differences between the categories follows. Community-based sites are rented or leased, with site maintenance and upkeep the responsibility of the organization furnishing the space. Off-campus college-leased sites are controlled by the college with site maintenance and upkeep the responsibility of the college. Off-campus college-owned facilities are college-controlled branch or extension center sites located away from the main campus. Business-based sites are provided by businesses that contract for training services.

Figure 11. Noncredit Distribution by Site/Location, FY 2011

## Fiscal Year 2011 Completions

## Degrees and Certificates Awarded by Community College

The number of collegiate-level degrees and certificates awarded to Illinois community college students in fiscal year 2011 totaled 61,538. The number of community college completions in fiscal year 2011 is the highest level ever reported for the third straight year. Table 4 contains comparative completion data for the last five years. The number of degrees and certificates awarded increased 8.2 percent from the previous year. Compared to fiscal year 2007, the total number of fiscal year 2011 completions increased 19.9 percent.
Table C-1 in the appendix provides a comparison of fiscal year 2007 through fiscal year 2011 duplicated completions for each community college. Compared to last year among the 48 colleges, 32 experienced increases in degree and certificate awards, while 14 exhibited decreases in the past year. Two colleges experienced little or no change.

## Table 4

SUMMARY COMPARISON OF ANNUAL COMPLETIONS IN ILLINOIS PUBLIC COMMUNITY COLLEGES

FISCAL YEARS 2007-2011

|  | $\underline{\text { FY 07 }}$ | $\underline{\text { FY 08 }}$ | $\underline{\text { FY 09 }}$ | $\underline{\text { FY 10 }}$ | $\underline{\text { FY 11 }}$ |

SOURCE OF DATA: Annual Enrollment and Completion (A1) Records

## Degrees and Certificates Awarded by Program Categories

Over two-thirds of the 61,538 completers during fiscal year 2011 received Career and Technical Education degrees or certificates (70.0 percent). Baccalaureate/transfer degrees were the second most frequently awarded and accounted for 27.2 percent of all the collegiate-level completions (see Table C-2).

Looking at the trends over time, overall Career and Technical Education completions increased ( 8.8 percent) compared to last year. Historically, the fiscal year 2011 career completion counts are the highest level that has been recorded. Accordingly, a comparison of overall fiscal year 2011 Career and Technical Education completions to those granted five years earlier reveals that the total number of awards grew by 21.3 percent. Career and Technical awards recorded nearly across the board long-term increases. Since 2007, there has been an increase in short-term career certificates (5,428 graduates, or 27.4 percent). The number of longer-term career certificates awarded also grew ( 882 graduates or 15.7 percent). Likewise, between fiscal years 2007 and 2011, there was an overall increase in Associate in Applied Science degrees (1,426 graduates or 14.4 percent). Vocational Skills was the exception as 183 fewer certificates were awarded in fiscal year 2011 compared to 2007 (-92.4 percent).

A closer examination of the categories of formal awards issued within Career and Technical Education in fiscal year 2011 shows that more than one-half ( 58.6 percent) of the completions were Career Certificates of Less than One Year. More than one-fourth was Associate in Applied Science degrees (26.3 percent). Longer-term Career Certificates accounted for 15.1 percent of the career program completions. The number of Vocational Skills Certificates awarded was less than 1 percent of career completions in fiscal year 2011 (see Table C-2).

The total number of Baccalaureate/transfer degrees awarded increased 4.7 percent compared to the last fiscal year. The overall number of Baccalaureate/transfer degrees awarded in fiscal year 2011 increased from fiscal year 2007 (14.5 percent, $\mathrm{N}=2,119$ ).

Among Baccalaureate/transfer degrees granted, the Associate in Arts (AA) degree was most commonly awarded ( 59.0 percent). The proportion of AA degrees granted has been remarkably stable over the past five years, with an increase of 12.9 percent in fiscal year 2011. Almost one-third ( 32.3 percent) of the Baccalaureate/ transfer degrees earned was Associate in Science degrees (see Table C-2).

## Summary of Graduates by Degree Categories

Gender of Graduates by Degree Category. As indicated in Table C-3, during fiscal year 2011, nearly six out of ten degrees and certificates were earned by females ( 56.7 percent). The three degrees and certificates attained by the highest proportion of females were the General Studies Certificate (94.1 percent), the Associate in Teaching (86.7 percent), and the General Associate ( 64.5 percent). Although small in overall number, the Associate in Engineering Science ( $\mathrm{N}=$ 114) - one of the newest degree programs in the Illinois Community College System - had the highest proportion of male graduates (87.7 percent, $\mathrm{N}=100$ ). Short-term Certificates of Less Than One Year were the specific award category with the largest number of male graduates ( $\mathrm{N}=12,151$ ). The male/female distribution within the Baccalaureate/transfer degree and Career and Technical Education degree and certificate areas drive the overall gender proportion.

Racial/Ethnic Origin of Graduates by Degree Category. Nearly onethird (29.2 percent) of all degrees and certificates in fiscal year 2011 were awarded to minority students (nonwhite). According to Table C-4, more than three times as many minority graduates completed Career and Technical Education degrees and certificates ( $\mathrm{N}=13,352$ ) than Baccalaureate/transfer degrees ( $\mathrm{N}=3,987$ ).

Nearly one out of every five (23.8 percent) fiscal year 2011 Baccalaureate/transfer degrees was earned by minority students. The majority of the transfer degrees earned by minorities were Associate in Arts degrees ( 68.3 percent), while 27.8 percent were Associate in Science degrees. The overall proportion of minority Baccalaureate/transfer completers was similar to last year.

One-and-a-third times as many African American students ( $\mathrm{N}=8,381$ ) completed collegiate-level programs than did Latino students ( $\mathrm{N}=$ 6,121 ) in fiscal year 2011. Figure 12 illustrates the distribution of minority students who successfully completed degree and certificate programs in the Illinois Community College System during fiscal year 2011 (see Table C-4).

$\square$ Bacc/Trans ■CTE $\square$ Gen Assoc
Figure 12. Associate Degrees Earned by Minority Student, Fiscal Year 2011

Age of Graduates by Degree Category. Fourteen percent of all completers were in the under 21 year old age group ( 13.7 percent). The youngest graduates were in Career and Technical Education (58.9 percent) and Transfer ( 40.3 percent) programs. The 21-24 age group accounted for nearly one-third ( 31.3 percent) of all graduates. Graduates between 25 and 30 accounted for almost one-fifth (19.9 percent) of the total, and the 31-39 age group accounted for 16.4 percent.

Over one-third ( 36.1 percent) of students 30 and under completed Baccalaureate/transfer degrees, while only 10.9 percent of graduates over the age of 30 completed Baccalaureate/transfer programs. Nearly nine out of ten ( 85.5 percent) graduates over 30 earned Career and Technical Education degrees and certificates. In general, the proportion of Career and Technical Education graduates increased as student age advanced (see Table C-5).

Intent of Graduates by Degree Category. Self-reported intent data disclose the primary goal a student wants to achieve as a result of his/her studies. The community colleges examine current intent versus student intent at the time of initial enrollment at the college. In these analyses, available current intent was examined to reflect the changing needs and desires of the community college student. Seven out of every ten students who attained a Baccalaureate/transfer degree in fiscal year 2011 indicated that they intended to prepare for transfer to a four-year institution. Just over one-tenth (11.7 percent) of these successful students indicated a desire to either prepare for a job immediately after community college or to improve present job skills — intent that would most often be associated with seeking a Career and Technical Education degree or certificate.

Similarly, 56.0 percent of those students who attained a Career and Technical Education degree or certificate indicated they were preparing for a job immediately after completing community college
or improving present job skills. More than one-fifth ( 22.3 percent) of the Career and Technical Education graduates indicated that they were preparing for transfer to a four-year institution. Pursuing a Career and Technical Education degree does not preclude a student from transferring to a four-year institution (see Table C-6).

Degree Objective of Graduates by Degree Category. The self-reported degree objective provides an indication of the student's expected outcome from attending the community college. One might anticipate that they would mirror student completion patterns. Four out of five (80.3 percent) students who earned Baccalaureate/transfer degrees in fiscal year 2011 indicated that they enrolled with a desire to complete an associate degree. However, one in six (16.0 percent) indicated that they wanted to complete only one or several courses and were not pursuing a degree.

A review of Career and Technical Education graduates reveals a similar pattern: 79.7 percent of the Career and Technical Education students who earned an Associate in Applied Science degree had listed completing an associate degree as their objective. Nearly one-fifth (20.0 percent) of the students who had planned to only complete one or several courses or a certificate ended up surpassing their goal by earning an Associate in Applied Science degree (see Table C-7).

## Closing Comments

Demand for the programs and services delivered by Illinois community colleges remain strong and completions are up. During fiscal year 2011, the Illinois Community College System provided education and training to nearly one million $(949,819)$ students in credit and noncredit courses. Three quarters of these students were in credit courses. The 61,538 degrees and certificates awarded in fiscal year 2011 set an all time high for the number of Illinois Community College System graduates. This is an increase of 8.2 percent over last year and is up 19.9 percent from 2007.
