### Introduction

Dual credit allows academically prepared high school students to simultaneously earn credits that count toward a high school diploma and a college degree. Dual credit instruction delivers a “win-win” arrangement for all parties: students gain access to challenging college-level coursework to make their junior and senior years of high school more productive; students can prove to others and themselves that they have the ability to succeed in college; college costs can be reduced for parents and students; time to degree at college can be shortened; and the enhanced high school and college faculty dialogue can contribute to a better alignment between secondary and postsecondary education. Consequently, as dual credit instruction has a positive impact on postsecondary completion, there is a growing emphasis among policy makers on the value of dual credit enrollment for all students and especially those who are traditionally underserved in higher education.

The recent figures for dual credit document the importance of this growing phenomenon:

- ❖ Nationally, over 1.4 million high school students took over 2 million dual credit courses from postsecondary institutions in the 2010-11 school year. This represents 10 percent of high school students, mostly juniors and seniors. Nearly 15,000 public high schools (82 percent) offered dual credit courses in the 2010-2011 school year. Dual enrollment had an annual growth rate of over seven percent from the 2002-03 school year to the 2010-11 school year and even higher growth rates were seen in high schools where a majority of students are ethnic or racial minorities (12 percent) and in rural schools (12 percent). About thirty percent of enrollments in dual credit courses were in courses with a career and technical/vocational focus. (<http://www.nacep.org/research-policy/fast-facts/>)
- ❖ **In Illinois, during fiscal year 2015, a total of 51,718 individual (i.e., “unduplicated”) Illinois high school students enrolled in one or more community college dual credit courses.** Illinois community colleges offered a total of 9,714 dual credit courses in fiscal year 2015, which was an increase of 43.0 percent from fiscal year 2006 (N = 6,791), 10.6 percent from fiscal year 2011 (N = 8,780) and a decrease of 1.9 percent from the previous year (N = 9,903). Overall, in fiscal year 2015, dual credit duplicated enrollment (N = 99,153) increased 74.1 percent compared to ten years ago (N = 56,963), increased 19.6 percent compared to 5 years ago (N = 82,895) and increased 4.7 percent compared to one year ago (N = 94,689).

Data for this report derive from the Illinois Community College Board’s (ICCB) student-level Annual Student Enrollment and Completion (A1) submission (Appendix A Tables) and course-level Course Enrollment and Resources (SU/SR) submission (Appendix B Tables) from Illinois community colleges. Information from the **A1 submission** is used in the report to describe the characteristics of high school students who enrolled in dual credit courses. A1 data are required for all students who are officially enrolled in a credit course at an Illinois community college any time during the specified fiscal year. A1 enrollments are **unduplicated** end of year counts. Duplicated enrollment and course data derive from ICCB **SU/SR submissions**. SU/SR data are collected by ICCB to determine enrollment (credit hour) based funding and are combined with additional data collection to study facilities utilization. SU/SR enrollments are **duplicated** meaning students are counted for each course they enroll in (e.g., a student enrolling in three dual credit courses is counted as three enrollments). The SU/SR record submission

### Dual Credit Definition and Illinois Legislative Background

Dual credit is an instructional arrangement where an academically qualified high school student enrolls in a college-level course and, upon successful course completion, concurrently earns both college credit and high school credit. Dual credit reflects strong and well established secondary-to-postsecondary articulation and alignment.

The Dual Credit Quality Act (Public Act 96-0194) was approved by the Governor on August 10, 2009 with an effective date of January 1, 2010. The Act requires the Illinois Community College Board (ICCB) and the Board of Higher Education (IBHE) to develop policies regarding dual credit. Dual credit instructors teaching credit, college-level courses must meet the same requirements as on-campus faculty, and dual credit instructors teaching career and technical education courses must have appropriate credentials and teaching competencies.

Dual credit course content is prescribed by the community college in accordance with established course requirements. According to ICCB Administrative Rules: “Course prerequisites, descriptions, outlines, requirements, learning outcomes, and methods of evaluating students shall be the same as for on-campus offerings.” (<http://www.iccb.org/pdf/manuals/systemrules10-08.pdf>)

High school instructors must be provided with orientation, assessment methods, and administrative requirements before teaching dual credit courses, and they must be able to participate in all activities available to adjunct faculty. (<http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=3117&ChapterID=18>).

### Characteristics of Dual Credit Students (unduplicated)

#### OVERALL HEADCOUNT

The Illinois Community College System recorded a total of 51,718 high school students enrolled in dual credit courses during fiscal year 2015. Currently, **all** Illinois community colleges offer dual credit courses. Appendix Table A-1 provides annual dual credit headcount enrollment in fiscal years 2011 through 2015 for each community college. Annual dual credit enrollments increased 3.2 percent compared to the previous year (N = 50,091) and 24.2 percent compared to five years ago (N = 41,645). Among Illinois’ 48 colleges, 17 colleges reported more than 1,000 dual credit enrollments in fiscal year 2015. College of DuPage reported the most dual credit enrollments (N = 4,874) followed by Joliet Junior College (N = 4,072) and Lewis & Clark Community College (N = 3,915).

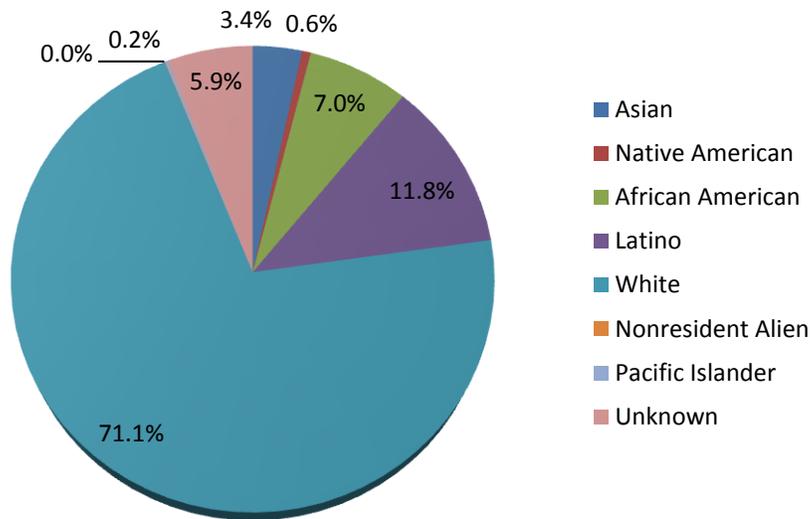

Each of the 48 community colleges in Illinois provided dual credit courses in fiscal year 2015

**GENDER AND RACIAL/ETHNICITY CHARACTERISTICS**

Overall, Table 1 shows nearly equal proportions of female (51.1 percent) and male (48.9 percent) high school students took community college courses in fiscal year 2015 (Appendix Table A-2). Figure 1 depicts the race/ethnicity of high school students taking community college dual credit courses in fiscal year 2015. In general, minority high school students were less likely to pursue dual credit than white students. Seven in ten dual credit students were White (71.1 percent). Latino dual credit students accounted for 11.8 percent and African American students for 7.0 percent in fiscal year 2015. Asian (3.4 percent), Native American (0.6 percent), Pacific Islander (0.2 percent), and Nonresident Alien (0.0 percent) represented a small portion of dual credit students (Appendix Table A-3).
