This handbook is designed to be a guide in developing, submitting and administering the Perkins grant provided by the Carl D. Perkins Career and Technical Education Improvement Act of 2006. It is intended to be utilized as a reference tool only and is subject to revision. Please contact the Illinois Community College Board CTE staff with specific grant-related questions or concerns (See Appendix A).
The Carl D. Perkins Career and Technical Education Improvement Act of 2006 (Perkins IV) is the most important piece of legislation affecting career and technical education (CTE) in Illinois. Perkins IV focuses state and local efforts on continuously improving programs to facilitate the academic achievement of CTE students by:

- strengthening the connections between secondary and postsecondary education;
- restructuring the way stakeholders, high schools, community colleges, universities, business and parents work together; and
- increasing state and local accountability standards.

The intent of Illinois postsecondary career and technical education is to provide students with the skills and knowledge necessary to excel in the global economy as outlined in the State Plan required by Section 122 of the Act. Perkins IV created a paradigm shift in the expectations and opportunities provided by CTE. Through the Programs of Study (POS) model, career and technical education equips students with the foundational knowledge to explore a cluster of occupations and careers. As a student evolves through their educational experience, their focus is narrowed to a particular program. This process allows students to transition seamlessly while providing them with hands-on exploration, rigorous academics and the support necessary to succeed.

Section 1: Funding & Requirements

Eligibility
To receive federal Postsecondary Perkins Title I funds, an institution must meet the definition of an "eligible institution or recipient" as defined by Section 3 (13a-14b) of the Carl D. Perkins Career and Technical Education Improvement Act of 2006. All public Illinois community colleges are eligible to receive Postsecondary Perkins funding. Illinois community colleges must submit an annual grant plan to the Illinois Community College Board for approval. Specific formatting and requirements for these plans vary slightly each year; however, the general requirements are consistent with those prescribed in Section 134 of the Act.

Allocation
As outlined in Perkins IV, states must allocate at least 85 percent of funds to eligible recipients by formula allocation. Up to ten percent of the funds can be used for leadership activities and up to five percent can be used for administration.

In Illinois, federal Perkins Title I funds are divided 60/40 between the secondary and postsecondary career and technical education systems where administration is shared between the Illinois State Board of Education (ISBE) and the Illinois Community College Board (ICCB). The 57 Education for Employment (EFE) regions receive funds from ISBE to support secondary CTE programs, and the 39 community college districts receive funds from the ICCB to support postsecondary CTE programs.

After the state receives the total allocation, the ICCB utilizes a formula based on CTE Pell count to divide and disseminate Perkins funds among the community colleges. In previous years, total college Pell count was used to derive the formula. Upon guidance from the Department of Education, the methodology was changed to utilize CTE Pell count. To minimize significant shifts in funding a five percent loss limit between methodologies will be implemented in fiscal years 2017, 2018, and 2019. Each year, allocations are released after the Governor has signed the state budget passed by the Illinois General Assembly. Although the ICCB aims to release the notice of allocation amounts prior to the Perkins plan submission deadlines, it is not always feasible due to prolonged budget processes. Colleges are notified via email about the release of allocations. The allocation notice can also be found at www.iccb.org/cte/?page_id=13.

Leadership Funds
The ICCB administers several other funding opportunities that support postsecondary CTE in Illinois. Many are made available through Title I Leadership funds. These grants are offered at various times throughout the year and have specific, targeted purposes.

The ICCB issues both competitive and non-competitive grant opportunities. As per the Government Accountability and Transparency Act and regulations, a notice of funding opportunity will be posted for 45 days on the ICCB website and disseminated to all eligible recipients for all competitive grants.
Section 1.2: Reporting

REPORTING
In order to comply with federal EDGAR guidelines and the Grant Accountability and Transparency Act (GATA), postsecondary Perkins grant recipients are required to submit Quarterly Reports. Quarterly Reports are due 30 days after the end of each quarter of the current fiscal year. The Online Final Expenditure Report is due on October 15th following the end of the fiscal year. Quarterly and Final Summary Report templates are posted on the Illinois Community College Board's CTE website and disseminated via email by ICCB's staff.

To access Perkins report templates visit the ICCB's CTE website: www.iccb.org/cte

STEVENS AMENDMENT
When issuing statements, press releases, bid solicitations and other documents describing programs funded in whole or in part with federal money, providers must follow the guidelines of the Stevens Amendment:

- Information provided must document the percentage of total program costs that will be financed with federal money.
- The total amount of federal funds used for the program must also be documented.

EXAMPLE STATEMENT
This publication was funded pursuant to a grant from the Illinois Community College Board and funded 100% through the Carl D. Perkins Career and Technical Education Improvement Act of 2006.
REQUIRED USE OF FUNDS
Section 135b of the Carl D. Perkins Act of 2006 outlines the nine required uses of funds. All required uses of funds are built into the annual Perkins Plan forms. Funds made available to eligible recipients under this section shall be used to support career and technical education programs that:

1. Improve CTE program components through the integration of academics with technical programs through a coherent sequence of courses, such as CTE programs of study, to ensure learning in:
   a. the core academic subjects (as defined in Section 9101 of the Elementary and Secondary Education Act of 1965) and
   b. CTE subjects;

2. Link CTE at the secondary and postsecondary levels, by offering the relevant elements of not less than one (1) career and technical program of study;

3. Provide students with strong experience in, and understanding of, all aspects of industry, which may include work-based learning experiences;

4. Develop, improve or expand the use of technology in CTE, including:
   a. training of CTE teachers, faculty and administrators to use technology, which may include distance learning;
   b. providing CTE students with the academic and career and technical skills (including the mathematics and science knowledge that provides a strong basis for such skills) that lead to entry into the technology fields; and,
   c. encouraging schools to collaborate with technology industries to offer voluntary internships and mentoring programs, including programs that improve the mathematics and science knowledge of students.

5. Provide professional development programs that are consistent with Section 122 to secondary and postsecondary teachers, faculty, administrators and career guidance and academic counselors who are involved in integrated CTE programs including:
   a. in-service and pre-service training on the effective integration and use of challenging academic and CTE provided jointly with academic teachers to the extent practicable, effective teaching skills based on research that includes promising practices, effective practices to improve parental and community involvement, effective use of scientifically based research and data to improve instruction;
   b. support of education programs for teachers of career and technical education in public schools and other public school personnel who are involved in the direct delivery of educational services to CTE students to ensure that such teachers and personnel stay current with all aspects of an industry;
   c. internship programs that provide relevant business experience; and
   d. programs designed to train teachers specifically in the effective use, and application of technology to improve instruction.

6. Develop and implement evaluations of the CTE programs carried out with funds under the Perkins Act, including an assessment of how the needs of special populations are being met;

7. Initiate, improve, expand and modernize quality CTE programs, including relevant technology;

8. Provide services and activities that are of sufficient size, scope and quality to be effective; and

9. Provide activities to prepare Special Populations who are enrolled in career and technical education programs for high-skill, high-wage or high-demand occupations that will lead to self-sufficiency.

PERMISSIBLE USE OF FUNDS
When expending Perkins funds (programs must address and meet ALL nine required activities before they can use Perkins funds to address permissive activities (Section 135c). Funds made available to an eligible recipient under this title may be used:

1. To involve parents, businesses and labor organizations, as appropriate, in the design, implementation and evaluation of CTE programs;

2. To provide career guidance and academic counseling that:
   a. improves graduation rates and provides information on postsecondary and career options, including baccalaureate degree programs, for secondary students, which activities may include the use of graduation and career plans; and
   b. provides assistance for postsecondary students, including for adult students who are changing careers or updating skills.

3. For local education and business (including small business) partnerships, including for:
   a. work-related experiences for students, such as internships, cooperative education, school-based enterprises, entrepreneurship and job shadowing;
   b. adjunct faculty arrangements for qualified industry professionals; and
   c. industry experience for teachers and faculty.

4. To provide programs for special populations;

5. To assist Career and Technical Student Organizations (CTSO);

6. For mentoring and support services;
7. To lease, purchase, upgrade or adapt equipment, including instructional aids and publications (including support for library resources) designed to strengthen and support academic and technical achievement;

8. For teacher preparation programs that address the integration of academic and technical education and that assist individuals who are interested in becoming CTE teachers and faculty, including individuals with experience in business and industry;

9. To develop and expand postsecondary program offerings at times and in formats that are accessible for students, including working students, through the use of distance education;

10. To develop initiatives that facilitate the transition of sub baccalaureate career and technical education students into baccalaureate degree programs, including:
   a. articulation agreements between community colleges and baccalaureate degree granting postsecondary educational institutions;
   b. dual credit and concurrent enrollment programs;
   c. academic and financial aid counseling;
   d. other initiatives-
      i. encourage the pursuit of a baccalaureate degree; and
      ii. overcome barriers to enrollment in and completion of baccalaureate degree programs, including geographic and other barriers affecting rural students and special populations.

11. To provide activities to support entrepreneurship education and training;

12. To improve or develop new CTE courses, including the development of new proposed career and technical programs of study for consideration by the eligible agency and courses that prepare individuals academically and technically for high-skill, high-wage or high-demand occupations and dual or concurrent enrollment opportunities by which CTE students at the secondary level could obtain postsecondary credit to count towards an associate or baccalaureate degree;

13. To develop and support small, personalized, career-themed learning communities;

14. To provide support for family and consumer science programs;

15. To provide CTE programs for adults and school dropouts to complete their secondary school education or upgrade their technical skills;

16. To provide assistance to individuals who have participated in services and activities under this Act in continuing their education or training for finding an appropriate job, such as through referral to the system established under Section 121 of Public Law 105-220;

17. To support training and activities (such as mentoring and outreach) in nontraditional fields;

18. To provide support for training programs in automotive technologies;

19. To pool a portion of such funds with a portion of funds available to not less than one other eligible recipient for innovative initiatives, which may include:
   a. improving the initial preparation and professional development of CTE teachers, faculty, administrators and counselors;
   b. establishing, enhancing or supporting systems for-
      i. accountability data collection; or
      ii. reporting data;
   c. implementing career and technical programs of study;
   d. implementing technical assessments.

20. To support other CTE activities that are consistent with the purpose of the Perkins Act.

**BASIC COST PRINCIPLES**

In addition to adhering to the required and permissive uses of funds outlined in the Perkins Act, all expenditures made by recipients with federal Perkins funds must meet the basic cost principles delineated in 2 CFR, Part 220 and 2 CFR, Part 225. 2 CFR, Part 225 establishes cost principles for state, local and Indian tribal governments, and 2 CFR, Part 220 establishes cost principles for educational institutions. These cost principles are the basic guidelines describing permissible ways federal funds may be spent.

The general principles in 2 CFR, Part 225 and 2 CFR, Part 220 state that for costs to be allowable, they must be:

- Reasonable and necessary (meaning that, for example, sound business practices were followed, and purchases were comparable to market prices).
  - A cost may be reasonable if the nature of the goods or services acquired and the amount involved reflect the action that a prudent person would have taken under the circumstances prevailing at the time the decision to incur the cost was made. See 2 CFR, Part 225.
• Allocable to the federal award [meaning that the federal grant program, in this case Perkins, derived a benefit in proportion to the funds charged to the program—for example, if fifty percent (50%) of an instructor’s salary is paid with Perkins funds, then that instructor must spend at least fifty percent (50%) of his or her time on a Perkins program].

• Legal under state and local law.

• Properly documented (and accounted for on a consistent basis with generally accepted accounting principles).

• Consistent with the provisions of the grant program.

• Not used for cost-sharing or matching any other grant agreement.

For more information on the Code of Federal Regulations, cost principles:

Section 1.5: Frequently Asked Funding Questions

Congress wrote the Carl D. Perkins Career and Technical Education Act with the intention to be vague and general in order to ensure flexibility among the states and local providers. Many uses of funds are explicit, while others are open to interpretation so they may fit the unique needs of each state. The states are responsible for releasing guidance on the local use of Perkins funds. Below is the ICCB’s longstanding interpretation of the following allowable, unallowable, and circumstantial types of activities. This list is not all inclusive, and there are several activities that are allowable only under specific circumstances. For additional guidance, from the Department of Education, Office of Career, Technical, and Adult Education (OCTAE) (See Appendix D, item 14 or contact the Director for CTE).

1. **WHO DECIDES, AT THE COLLEGE, HOW PERKINS FUNDS WILL BE SPENT?**

   There are several different processes colleges use to make decisions on how to distribute their Perkins allocation while also addressing the nine required uses of funds. Faculty members, deans and administrators typically make requests of funds to support certain activities, equipment and materials to be used by CTE programs based on need. Prioritizing the requests and incorporating them into the annual Perkins Plan should be inclusive of all relevant staff and not solely determined by one or few personnel. A team approach is an effective strategy used by colleges to make decisions on how to better serve students in their CTE programs. The team or committee of stakeholders ranges from administrators, deans and faculty members to counselors and advisors, adult education staff and the IR department.

2. **ARE COLLEGES ALLOWED TO COVER TUITION AND FEES USING PERKINS FUNDS?**

   Tuition and fees are considered direct student support and cannot be covered for students or instructional and administrative staff. However, if approved by the ICCB, fees may be covered for students meeting the requirements detailed in the guidance on direct student support (Question 4).

3. **IS INSTRUCTION AN ALLOWABLE EXPENSE OF PERKINS?**

   Instruction is typically paid for by the institution and should not be supplanted by Perkins funding. However, new CTE programs can use Perkins funding for instruction while the institution is developing a plan to absorb future costs. Instructors and deans may be paid stipends for additional work outside of their regular duties for Perkins-related activities including attendance at relevant meetings, curriculum development and alignment, grant management, externship activities, etc.
7. **IS "DIRECT STUDENT SUPPORT" AN ALLOWABLE EXPENSE OF PERKINS?**

Students are never to receive Perkins funds directly. However, under certain limited circumstances, Perkins funds may be used to provide direct assistance (e.g., transportation, childcare, textbooks, supplies) to students who are members of a Special Population as defined by Perkins. The following conditions must be met:

i. Students must be a member of a Special Population and must be participating in a career and technical education program.

ii. Assistance is provided to address an overwhelming barrier to successful participation.

iii. Assistance must be part of a larger set of strategies to address the needs of the Special Population.

iv. Funds must supplement and not supplant assistance that is otherwise available from non-federal sources.

**NOTE:** Colleges must document each case and outline the long-term solution, through intensive case management or advisement, which moves the student off direct Perkins assistance as quickly as possible. For additional guidance from the USDOE, OCTAE (See Appendix D, item 14).

8. **WHAT TYPES OF ACTIVITIES AND EXPENSES RELATED TO INTERNSHIPS CAN BE COVERED BY PERKINS FUNDING?**

Perkins funds may be used to support expenses related to 1) CTE work-based experiences for students, such as internships, entrepreneurship, and job shadowing; 2) adjunct faculty arrangements for qualified industry professionals; and 3) industry experience for teachers and faculty [see Perkins IV, Section 135 (c)(3)]. Other expenses might include equipment and safety gear necessary for a student's successful completion of the internship; and partnership meetings between the college and employers/internship sites.

**NOTE:** Students are never to receive Perkins funds directly.

9. **CAN PERKINS FUNDS BE USED FOR CAPITAL IMPROVEMENTS?**

Capital improvements to buildings to increase the value of the building are generally not allowed. However, some retrofitting may be allowed to upgrade equipment or to improve safety. Please seek guidance through ICCB's CTE staff, in writing, prior to this expenditure.

10. **CAN POSTSECONDARY PERKINS FUNDS BE USED TO SUPPORT ACTIVITIES FOR STUDENTS BELOW THE POSTSECONDARY LEVEL?**

Postsecondary Perkins funds can be used to support activities, such as recruitment and career exploration, for students beginning in the 8th grade.

11. **CAN PERKINS FUNDS BE USED TO SUPPORT ADULT EDUCATION AND/OR BRIDGE PROGRAMS?**

Perkins funds can be used to support the CTE portion of integrated basic skills instruction (e.g., Integrated Career and Academic Pathway Systems/Accelerating Opportunity Programs) as long as the related expenses are allowable under Perkins. However, Perkins funds may not be used to support the adult education (WIOA Title II) portion of integrated basic skills instructional programs.

12. **PERKINS FUNDING CANNOT BE USED FOR REMEDIAL COURSES, BUT WHAT ABOUT REMEDIAL SERVICES?**

The definition of career and technical education in Section 3(5) of Perkins IV specifically excludes prerequisite courses that are remedial. However, institutions may use Perkins funds for remedial services that are part of a CTE class or program including mentoring and support services [Perkins IV Section 135 (c)(6)]. These types of activities include curriculum modification, supportive personnel, tutoring, and instructional aides for CTE students (Perkins IV Section 3(31)). (See Appendix D, item 14).
13. CAN MEMBERSHIP FEES BE PAID FOR BY PERKINS FUNDS?
Perkins funds can be used to pay for student or staff (including faculty and administrators) membership fees if the membership provides access to resources that will benefit students.

Allowable: The costs of the membership in business, technical, and professional organizations, and the costs of the institution's subscriptions to business, professional and technical periodicals.

Unallowable: The costs of membership in any civic or community organization, and the costs of membership in any country club or social club or dining club or organization.

14. CAN FUNDS BE USED TO SUPPORT CAREER AND TECHNICAL STUDENT ORGANIZATIONS (CTSO)?
Perkins permits the use of grant funds to support career and technical student organizations (CTSO) and related activities if the CTSO is an integral part of a career-technical program. Funds can be used to purchase supplies or equipment for the organization or to fund instructional activities if the activity is made available to all students in a program without regard to membership in the CTSO. (See Appendix D, item 14).

15. CAN COLLEGES RESERVE A PORTION OF THEIR PERKINS GRANT FUNDS FOR EMERGENCIES THAT MAY ARISE?
Holding reserve funds for emergency purposes is not allowable. If necessary, budget modifications should be requested and approved to fund expenditures of this nature.

16. WHAT TYPES OF ACTIVITIES, IN ALL CIRCUMSTANCES, ARE NOT ALLOWED TO BE PAID FOR USING PERKINS FUNDS?
Costs for alcoholic beverages, bad debt and related legal costs, donations and contributions, fines and penalties, entertainment, lobbying activities, fundraising, intramural activities, student publications, and student clubs are not allowed. (This list is not all inclusive. Please check with ICCB's CTE staff with specific funding questions.)

SUPPLANTING
Perkins funds should supplement, not supplant, non-federal funds expended for career and technical education activities. Supplanting is presumed to occur in the following three circumstances.

An eligible recipient uses Perkins funds to provide services that the recipient:
(1) was required to make available under other federal, state, or local law, except as permitted by Section 324(c) of Perkins IV.
(2) was provided with non-federal funds the year prior.
(3) was provided with non-federal funds for non-CTE students but charged to Perkins for CTE students.

It is very important the provider maintain good financial records to be able to document that the Perkins federal funds supplement rather than supplant funding.
## Section 2: Perkins Annual Plan

Perkins grant funding follows the State's fiscal year which begins July 1st and ends June 30th. However, the Perkins planning process begins prior to the start of the fiscal year. All activities funded by the Carl D. Perkins Act must occur within the grant period. Below is a general timeline of Perkins-related events and deadlines.

<table>
<thead>
<tr>

### Section 2.1: Perkins Administration

While titles may vary, each institution is required to have a designated Perkins Administrator. The Administrator has certain responsibilities that are essential to the institution's successful attainment of the Perkins Core Indicators of Performance and the relationship with ICCB's CTE staff.

These responsibilities include, but are not limited to, the following:

2. Prepare the Perkins application (in collaboration with college faculty, deans, staff and relevant support service providers).
3. Serve as a central point of contact for communications concerning the Perkins grant.
4. Engage in technical assistance meetings as needed.
5. Prepare all documents and reports as required for programmatic monitoring.
6. Be knowledgeable of additional Perkins-funded grants.
7. Submit all necessary reports.
8. Be knowledgeable of CTE data and performance (see Section 3).
9. Maintain fiscal integrity in the use of Perkins funds.
10. Attend all mandatory and otherwise necessary professional development workshops.

### Section 2.2: Annual Plan Guidelines

On an annual basis, eligible recipients of Federal Postsecondary Perkins funds must prepare a Perkins Plan to submit to the ICCB for approval (Perkins IV [Section 134]). A framework for the Plan is outlined in the Perkins Grant Guidelines provided by the ICCB. The guidelines provide instructions for completing all required components of the Plan. Forms vary slightly each year but always include activities that support the goals of Perkins. To assist colleges in completing their Plans, the ICCB holds an annual spring meeting to provide an overview of the expectations set forth in the Perkins Grant Guidelines.

To organize the goals outlined in Perkins IV legislation, Illinois developed the Six Guiding Principles.

1. Leadership, Organization and Support
2. Access, Equity and Opportunity
3. Alignment and Transition
4. Enhanced Curriculum and Instruction
5. Professional Preparation and Development
6. Program Improvement and Accountability

The Guiding Principles serve as the structure around which the annual Perkins plan narrative is organized. To learn more about the Guiding Principles, see Section 4.

The Annual Perkins Plan consists of the following components:

- Annual Plan Cover Page
- Form 1: Accountability Data Snapshot Worksheet
- Form 2: Performance Improvement Plan
- Form 3: Perkins Salary Information Sheet
- Form 4: Program Narrative Worksheet
- Form 5: Perkins Budget Worksheet
- Form 6: Programs of Study Inventory

ANNUAL PLAN COVER PAGE
The Annual Plan Cover Page displays basic information about the college, including the:

- Address of the college,
- Primary Perkins contact (the person responsible for monitoring or performing grant-related activities who will serve as the main contact for the ICCB),
- Additional Perkins contact(s) (e.g., deans or other administrators pertinent to the Perkins grant activities and programs),
- Fiscal contact,
- Number of students served (the total number of students served through Perkins dollars in the most recent fiscal year. Estimated and duplicated counts are acceptable. These students may have received support services directly or may have been impacted by activities such as the purchase of equipment/materials or professional development received by faculty and staff), and
- Allocation received for the upcoming fiscal year.

FORM 1: ACCOUNTABILITY DATA SNAPSHOT WORKSHEET
This worksheet requires each community college to review their most recent performance data obtained through the Perkins Online Data System (PODS). This interactive worksheet not only reveals the college's performance compared to State performance goals but also allows colleges to view longitudinal trends along with a three-year average. If a college does not meet one or multiple State goals, Form 2 must be utilized to outline program improvement activities focused on addressing the performance gap(s). The Postsecondary Core Indicators of Performance Measures are as follows:

1P1: Technical Skill Attainment
2P1: Credential, Certificate, or Diploma Completers
3P1: Student Retention or Transfer
4P1: Student Placement
5P1: Nontraditional Participation
5P2: Nontraditional Completion

For definitions of each Core Indicator and additional information see Section 3.1.

FORM 2: PERFORMANCE IMPROVEMENT PLAN
If any Perkins Accountability Measure falls below the State goal (as demonstrated in Form 1), the college must develop and submit a Performance Improvement Plan (PIP). Colleges should collaborate with colleagues to review the PODS data, identify specific demographics and Special Populations that are negatively impacting overall performance and develop targeted activities to improve performance.

All PIP activities must be incorporated within the Program Narrative Worksheet (Form 4).

FORM 3: PERKINS SALARY INFORMATION SHEET
Documentation must be provided for all staff supported, in full or in part, by the Perkins grant. Colleges must provide the names and titles of staff supported by the Perkins grant as well as their percent of time on the grant, total Perkins salary, benefits and a brief description of each individual's responsibilities. Salary-related activities must be included on the Program Narrative Worksheet (Form 4) and be easily identified.

FORM 4: PROGRAM NARRATIVE WORKSHEET
Community colleges will utilize the Program Narrative Worksheet to describe the activities that will be carried out to support grant goals. The narrative matrix is designed around the required and permissible uses of funds detailed in Perkins IV legislation as well as the Six Guiding Principles for the implementation and evaluation of Programs of Study.

THE PROGRAM NARRATIVE SHOULD DETAIL THE FOLLOWING:

1. The ACTIVITY consists of the activities that will be carried out to support the grant goals.
   - At least one activity must be indicated per element. However, lines can be added for multiple activities that apply to the element.
   - Activities may be repeated in other elements. However, they must clearly relate to each element.

2. RESOURCES are funds being applied to the activity and should be listed in dollar amounts.
   - Perkins, institutional funds or other funds can be used to support activities in the grant plan. Specific amounts must be listed if using Perkins funds. The column for institutional or other funds can be estimated and is not required to be noted.

3. The EXPECTED OUTCOMES for the activity are specific short-term or long-term measurable results that address the direct and indirect effects of an element's activity.
   - Colleges should denote their method of measurement.

For further guidance, see the Expected Outcomes Sheet in Appendix E.
FORM 5: PERKINS BUDGET WORKSHEET

The Budget Worksheet contains seven Expenditure Accounts and seven Expenditure Categories. All expenditures of Perkins funds must comply with the required and permissible uses of funds listed in Section 1.4 of this manual and must directly enhance, support or assist the college's career and technical education students and/or programs. The first six Expenditure Accounts relate directly to the Six Guiding Principles; the seventh is for general administration. Additional information is provided for the Expenditure Categories below.

*NOTE: Up to five percent of the total budget may be spent for general administration. General administration refers to organized administrative activities that provide assistance and support to CTE students, including activities specifically designed to provide administrative or managerial support for CTE programs and any special services provided for CTE students. This support may include administrative travel, support staff and other administrative costs directly associated with the management of the Perkins-approved CTE programs.

EXPENDITURE CATEGORIES

**SALARIES** — Salaries and wages paid to an employee for personal services rendered to the community college district prior to any deductions. Information must be provided on all staff (other than tutors) supported in full or in part by Perkins funds. These may include administrative staff, professional/technical staff, academic support staff, clerical staff and student employees.

**EMPLOYEE BENEFITS** — The cost of all employee benefits, including the portion of insurance paid for by the college (not including the portion withheld from the employee's wages when both the employee and the college contribute toward the benefit).

**CONTRACTUAL SERVICES** — Charges for services rendered by firms or persons not employed by the local board of trustees may include audit services, consultants, office services, instructional service contracts, and other contractual services.

**GENERAL MATERIALS AND SUPPLIES** — Costs of general materials and supplies may include: office, instructional, or library supplies; printing, audio or visual materials; computer software; postage, books, and binding costs; publications and dues; and advertising.

**TRAVEL, CONFERENCE OR MEETING EXPENSES** — Travel costs may include conference and meeting expenses and travel (in or out of state). Out-of-state travel must be approved by the ICCB's Director for CTE.

**CAPITAL OUTLAY** — Capital Outlay includes all expenditures for fixed and movable equipment, and may include costs for office and instructional equipment.

**OTHER EXPENDITURES** — Costs for other expenditures must apply to CTE students or programs, and include a short description of any costs listed under this category. All expenditures of Perkins funds must comply with the "Uses of Funds" listed and must directly enhance, support or assist the college's career and technical education students and/or programs.

FORM 6: PROGRAMS OF STUDY INVENTORY

Colleges are required by law to have at least one fully developed and fully articulated CTE Program of Study (POS). As part of the postsecondary Perkins Annual Plan submission, community colleges must submit a Programs of Study Inventory (Form 6) using the Illinois Programs of Study Expectations Tool to ensure Programs of Study meet the State's minimum expectations as well as the federal Programs of Study requirements [Section 112c(1)(A)].

Section 2.3: Budget Modification

During the fiscal year, Perkins Administrators may need to make adjustments to their grant budgets. If a project needs major adjustments in funding or in scope, then the ICCB must review and approve those changes. The last day a budget modification may be submitted is May 30th.

Parameters:
Grantees are allowed to make modifications up to ten percent (10%) of their total allocation, less a major change in scope, prior to seeking approval. Modifications that require a major change in scope or are greater than ten percent (10%) of their total allocation require the submission of a budget modification request (2 C.F.R. 200.308).

To request a budget modification, submit the Budget Modification Form along with a revised Budget Worksheet to cte@iccb.state.il.us. The budget modification form can be accessed on the CTE website: [www.iccb.org/cte](http://www.iccb.org/cte).
Accountability is a central focus of Perkins IV, which outlines performance requirements for states and local programs “to assess the effectiveness of the state in achieving statewide progress in career and technical education and to optimize the return of investment of Federal funds in career and technical education activities” [Perkins IV, Section 113(a)]. For each state receiving Perkins CTE funds, performance levels for the Perkins CTE Core Indicators are required as described in Section 113(b) of Perkins IV. These levels, known as the Final Agreed Upon Performance Levels (FAUPL) are established through negotiations with the Illinois Community College Board (ICCB), the Illinois State Board of Education (ISBE) and officials from the U.S. Department of Education, Office of Career, Technical, and Adult Education (OCTAE).

Proposed performance levels take into account the following factors:

1. how the levels of performance involved compare with the state-adjusted levels of performance established for other states; and
2. the extent to which such levels of performance promote continuous improvement on the indicators of performance by such state.

States are required to continuously progress toward improving the performance of CTE students. If a college fails to meet one or more of the state-adjusted performance measures, the college must plan and carry out program improvement activities that target low performing CTE student populations at their college. These activities are denoted in Form 2, the Performance Improvement Plan (PIP) of the college’s Perkins Annual Plan. The ICCB provides technical assistance and training for program improvement as necessary to community college Perkins Administrators. Failure on the part of the state to meet its performance requirements may result in the withholding of all or part of its CTE funding.

Section 3.1: Core Indicators of Performance

To assess the extent to which states and local recipients have improved the quality of CTE programs, Perkins legislation set forth thirteen Core Indicators of performance: seven secondary and six postsecondary. The ICCB is required to report annually on the six postsecondary core indicators of performance described below. States are also required to report student performance data disaggregated by Special Populations, as well as gender, race and ethnicity. To collect this data from each community college, the ICCB utilizes student-level data from the Annual Student Enrollment and Completion (A1) submission. The A1 submission is required for all students who are officially enrolled in a credit course at the college any time during the fiscal year.

As referenced in the subsequent text for the core indicators, concentrators and participants are defined as follows:

CTE Concentrator Definition
A credential seeking CTE student who:
(1) within one fiscal year earns at least 12 academic or CTE credits within a single program area sequence that is comprised of 12 or more academic and technical credits and terminate in the award of an industry-recognized credential, certificate, or degree; or
(2) completes a short-term CTE program sequence of less than 12 credit units that terminates in an industry-recognized credential, certificate, or degree;
(3) CTE concentrators are preparing for a future job immediately after attending the community college or are participating in higher education to improve their skills for their current employment.

CTE Participant Definition
A postsecondary student who has earned one (1) or more credits in any Career and Technical Education (CTE) program area.

1P1 TECHNICAL SKILL ATTAINMENT
Numerator: Number of CTE concentrators who completed a degree or occupational certificate or who are still enrolled in the institution or have transferred within 4 years of enrollment
Denominator: Number of CTE concentrators

2P1 CREDENTIAL, CERTIFICATE, OR DIPLOMA COMPLETERS
Numerator: Number of CTE concentrators who received an industry-recognized credential, a certificate, or a degree during the reporting year
Denominator: Number of CTE concentrators in the postsecondary education tracking cohort for the reporting year
3P1 FALL-TO-FALL STUDENT RETENTION OR TRANSFER

Numerator: Number of CTE concentrators who remained enrolled in their original postsecondary institution or transferred to another 2-year or 4-year postsecondary institution during the reporting year and who were enrolled in postsecondary education in the fall of the previous reporting year.

Denominator: Number of CTE concentrators who were enrolled in postsecondary education in the fall of the previous reporting year and who did not earn an industry-recognized credential, certificate, or degree in the previous reporting year.

4P1 STUDENT PLACEMENT

Numerator: Number of CTE concentrators who completed a program and were working, placed or retained in employment or placed in military service or apprenticeship programs in the 2nd post program quarter (e.g., unduplicated placement status for CTE concentrators who graduated by June 30, 2015, would be assessed between October 1, 2015, and December 31, 2015).

Denominator: Number of CTE concentrators who completed and left postsecondary education during the reporting year.

5P1 NONTRADITIONAL PARTICIPATION

Numerator: Number of CTE participants from underrepresented gender groups who participated in a program that leads to employment in nontraditional fields during the reporting year.

Denominator: Number of CTE participants who enrolled in a program that leads to employment in nontraditional fields during the reporting year.

5P2 NONTRADITIONAL COMPLETION

Numerator: Number of CTE concentrators from underrepresented gender groups who completed a program that leads to employment in nontraditional fields during the reporting year.

Denominator: Number of CTE concentrators who completed a program that leads to employment in nontraditional fields during the reporting year.

Section 3.2: Perkins Online Data System (PODS)

PERKINS ONLINE DATA SYSTEM

Illinois community colleges have access to a resource to promote program improvement and advance dialogue about strengthening performance—the Perkins Online Data System (PODS). PODS is available in a series of Excel spreadsheets. All colleges have the ability to view their own data, information from other institutions, and statewide figures. The Postsecondary Perkins Online Data System can be accessed at http://iccdbsrvicccb.org/perfmeasure/home.html.

To begin in PODS, click the “Overview of College Results” link. This will be located halfway down the page.

This section provides:

1. overall institutional outcomes for each specific college,
2. statewide results, for comparative purposes,
3. local and state trends over time, and
4. local results, as compared to statewide results.

Spreadsheets can be sorted to allow college officials to make a quick assessment of how local institutional performance compares with best-in-class performing colleges (be sure to include all the columns in the sort range designated). Benchmarking local performance with peer institutions also provides useful information. The spreadsheets have been formatted to make them easy to print and save on the computer (using the "save as" function).

Use this data to collaborate with colleagues, develop plans, identify milestones and timelines and responsible parties to elevate performance. Look more closely at demographic and special populations breakouts to determine which group(s) is impacting overall performance. Prioritize local initiatives by starting with those measures where performance is relatively low or stagnant, and then go back to identify opportunities to build on the measures where local performance is relatively high. If the number of students in a particular measure is low, consider options for increasing participation as appropriate.

Although PODS has a wealth of information, it takes some practice to learn how to navigate the system. There are several self-paced training materials and tutorials to help users understand how to collect and process their institution’s data. New Perkins Administrators are also encouraged to attend the PODS trainings made available through the Illinois Professional Development Network, the Illinois Community College System’s professional development resource.

Jana Ferguson
Associate Director for Research and Policy Studies
jana.ferguson@illinois.gov
217.558.2163
In anticipation of the passage of Perkins IV, Illinois postsecondary CTE leaders from across the state helped to develop Six Guiding Principles, each with specific design elements, to guide the implementation and evaluation of Programs of Study under the 2006 law. Guiding Principles are designed to foster systems thinking and change at all levels of education and are based on research and promising practices that support systemic reform, educational change, and continuous improvement. The purpose of using Guiding Principles is to enable informed decision-making about implementation, innovation, and evaluation while allowing for local adaptation to meet specific needs and conditions. The Illinois Community College Board (ICCB) uses the Guiding Principles as the framework for the program narrative of the Annual Perkins Plan.

**Section 4: The Six Guiding Principles**

**Section 4.1: Leadership, Organization and Support**

Principle 1 focuses on engaging partners in the development, implementation and evaluation of CTE programs at each college. Highlighted in this section are the potential benefits of successful partnerships along with the various roles played by each partner.

**PARTNERSHIPS**

Partnerships allow for college and program administrators to not only leverage additional funding for their projects, but to also gain other less tangible resources, including

a. expertise in a particular field,

b. equipment and supplies through donation,

c. connections to additional partners,

d. access to industry facilities (e.g., internships, tours),

e. community awareness and support, and

f. funding for expenses not allowed by Perkins.

The following text outlines various partners that colleges are encouraged to engage along with potential roles and benefits of each partnership.

**SECONDARY INSTITUTIONS**

Partnering with secondary institutions is not only important but a requirement of Perkins IV through the development and implementation of a Program of Study. Postsecondary and secondary institutions should work collaboratively and pool resources to serve their students. Below are some common means of successfully partnering with secondary institutions:

- covering substitute teacher costs to encourage participation in various meetings and professional development
- meeting at both locations or a neutral location
- interacting with all groups including administrators, teachers, counselors and students;
- maintaining a positive relationship with Regional Offices of Education (ROE) and Education for Employment (EFE) Regional Delivery Systems

**BUSINESS AND INDUSTRY**

Quality CTE programs have close ties with business and industry. Advisory committees are required for Programs of Study. These partnerships are critical to ensuring CTE programs meet current occupational needs. Local Advisory Committees are one of the most effective methods to establish and strengthen these partnerships.

An Advisory Committee is a group of persons that includes employers and employees who advise CTE educators and administrators on the development, implementation and evaluation of CTE programs to ensure programs are tailored to meet the workforce developments needs of the community. The committee should be comprised of a diverse set of individuals with experience and expertise in an occupational field that the CTE program serves.

Specific roles and functions of the committee:

1. Promote and assist in maintaining quality CTE programs through expertise and/or resource support;

2. Provide a communication link between local CTE and the business community;

3. Review and modify curriculum;

4. Assist in identifying work-based learning experiences and placement opportunities for both students and faculty;

5. Short- and long-term program planning;

6. Provide input on equipment needs;

7. Assist in competency assessment;

8. Provide input during program reviews; and

9. Serve as a resource for speakers, fieldtrips, etc.
PARENTS
Many community college students have followed the traditional path and transitioned directly from high school to college. By including parents in the partnership, colleges can help young adult students gain additional guidance and support to aid them as they make decisions about their academic and career future. Strategies to involve parents include:

- inform parents about nontraditional work opportunities;
- provide parents with strategies to support the academic success of their children;
- include parents in professional development programs;
- make available educational opportunities geared toward parents’ interests;
- involve and inform parents to share responsibility and decision making with regards to curriculum and delivery of instruction; and
- use parents as advocates and resources (e.g., guest speakers).

COMMUNITY-BASED ORGANIZATIONS
Community-based organizations not only act as a means of advertising and disseminating information to potential students but they can also help students access various support services.

- Workforce Innovation and Opportunity Act (WIOA) and other federally funded entities can help students tap into additional resources such as childcare services and transportation.
- Health departments may be able to offer free or reduced health services (e.g., physicals, immunizations and testing as required by certain CTE programs).
- Various organizations may be able to offer facilities for events or employment for students.

Section 4.2: Access, Equity and Opportunity
Each and every learner has access to educational opportunities and services that enable success.

Principle 2 emphasizes educational opportunities such as, providing students with strong experience in and understanding of all aspects of industry, exploring work-based learning opportunities and career guidance, and academic counseling. This section highlights topics such as support services, internships, work-based learning activities and strategies for serving Special Populations students.

SUPPORT SERVICES
Programs will provide learners with a comprehensive array of support and follow-up services as needed. Services may be provided by the program or in coordination with internal and external partnerships. These activities may include but are not limited to the following:

- tutoring;
- academic advising and follow-up;
- testing services;
- improvement of student attendance;
- interventions to assist students dealing with problems involving home, school and community;
- counseling activities with students regarding learning styles/problems;
- assistance for students in transitioning to job training, job placement, or future education;
- assistive and adaptive equipment;
- special services and projects for target populations and specialized services for individuals with special learning needs; and
- financial literacy workshops.

INTERNSHIPS
Internship opportunities help learners connect classroom and work-based learning experiences. Students are placed in a work setting to give them exposure to work and a career interest. Internships may be offered as paid experiences related to skill training with or without credit.
WORK-BASED LEARNING

CTE programs provide work-based learning opportunities through various means. The following are examples of such experiences as well as supplementary activities.

- Provide students with opportunities for career exploration.
- Integrate information about high-wage, high-skilled, nontraditional occupations and access to role models in nontraditional careers.
- Incorporate job shadowing or mentored experiences.
- Conduct interviews of employers and/or workers.
- Include soft skills training (e.g., interview and workplace etiquette, employee rights and legal issues).
- Assist students in obtaining resource materials on labor market needs and career opportunities in the community.
- Invite business members into classrooms.
- Use real world examples for problem-solving.

ACADEMIC COUNSELING AND CAREER GUIDANCE

Perkins states that students should be offered academic counseling and career guidance that provide information regarding career awareness and planning with respect to an individual’s occupational and academic future. This information should include career opportunities, financial aid and postsecondary options, including baccalaureate degree programs.

The college should clarify the roles of academic advisors and career counselors as they are often separate individuals. Despite their separate duties, their processes and efforts should be integrated to provide a more holistic approach for student transitions. Therefore, cross-training staff and/or housing both services in the same office are great ways to begin integrating these services.

SPECIAL POPULATIONS

Perkins grant recipients must meet the needs of Special Populations students by ensuring program accessibility and assisting them in overcoming barriers that may limit opportunities for success. Although colleges may target specific subpopulations on their campus, it is important to note that gender, race, ethnicity, and military status are not Special Populations as defined by the Carl D. Perkins Act of 2006. Perkins funds may be used to support these students if enrolled in CTE courses. However, colleges must demonstrate how they are meeting the needs of each Special Populations group. Support and wrap around services are the most common strategies used in serving Special Population students. Below is each Special Population as defined by Perkins accompanied by various support strategies that can be used.

Displaced Homemaker

An individual who has worked primarily without remuneration to care for a home and family, and for that reason has diminished marketable skills; has been dependent on the income of another family member but is no longer supported by that income; or is a parent whose youngest dependent child will become ineligible to receive assistance under Part A of Title IV of the Social Security Act (42 U.S.C. 601 et seq.) not later than two years after the date on which the parent applies for assistance under such title; and is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

Effective Strategies:
- Assist students in identifying skills that have applicability in the workplace.
- Organize student groups which teach self-advocacy skills.
- Refer students to the college resource center where they can explore interest and aptitudes.
- Designate a single point of contact to walk individuals through the initial enrollment steps and to provide ongoing support.

Individuals With Limited English Proficiency

A secondary student, adult or out-of-school youth who has limited ability in speaking, reading, writing, or understanding of the English language, and whose native language is a language other than English; or who lives in a family or community environment in which a language other than English is the dominant language.

Effective Strategies:
- Provide bilingual instruction and supplemental materials when possible.
- Provide professional development to faculty and staff to increase cultural awareness.
- Encourage faculty to support small group activities, and use visuals in their instruction.
- Embed abstract concepts in real, concrete situations.
Individuals With Disabilities

A student who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires. The term "disability" means with respect to an individual with a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment or being regarded as having such an impairment.

Effective Strategies:
- Link students with work incentives benefits and counseling services.
- Offer fully accessible testing facilities and school materials.
- Ensure transportation is available and accessible.
- Provide peer support/cohort groups for sharing and problem solving strategies.

NOTE: Programs are legally responsible to adhere to administrative requirements according to the Americans with Disabilities Act. Each college must have a designated ADA coordinator. See Section 7 for more information.

Individuals From Economically Disadvantaged Families

Individuals from economically disadvantaged families, including foster children.

Effective Strategies:
- Provide assistance with financial aid forms and scholarships.
- Network with community agencies to provide needed support (shelter, food, etc.)
- Assist with transportation cost (bus passes and bicycle racks).
- Create a lending library for textbooks.
- Highlight nontraditional occupations that provide a higher earning potential.

Individuals Preparing For Nontraditional Fields

Individuals who are pursuing a nontraditional field for their gender. The term ‘nontraditional fields’ means occupations or fields of work, including careers in computer science, technology, and other current and emerging high skill occupations, of which individuals from one gender comprise less than 25 percent of the individuals employed in each such occupation or field of work.

Effective Strategies:
- Ensure that marketing materials do not reflect gender bias.
- Provide field trips and presenters featuring nontraditional employees.
- Establish a mentor program.
- Encourage job shadowing opportunities and internships.

Single Parents

A student who is unmarried or legally separated from a spouse and has a minor child or children for which the parent has either custody or joint custody or is pregnant.

Effective Strategies:
- Provide information on affordable quality childcare (partner with campus childcare).
- Offer schedules and delivery options that allow students to care for children.
- Coordinate student support groups.
- Offer free or low cost parenting and stress management classes.

FOR MORE INFORMATION ON HOW TO SUPPORT SPECIAL POPULATIONS, CONTACT:

Dr. Aimee LaFollette Julian
Director
Illinois Center for Specialized Professional Support
alafoll@ilstu.edu
309.438.5122
www.icsps.illinoisstate.edu
Section 4.3: Alignment and Transition

Education and training providers, with input from business and industry, enhance alignment that facilitates student transition through the educational pipeline.

Principle 3 focuses on offering CTE Programs of Study that: contain fully articulated curricula from secondary to postsecondary education; lead to a certificate, credential or degree; provide opportunities for students to participate in dual credit courses; and are aligned to the local labor market.

PROGRAMS OF STUDY

Perkins IV calls for the creation of secondary-to-postsecondary sequences of academic and career and technical coursework that starts no later than the 9th grade and continues through the postsecondary level with potential to earn credentials, certificates and/or degrees. All recipients must offer a minimum of one fully developed and fully articulated Program of Study.

The federal Programs of Study requirements are detailed in the Carl D. Perkins Career and Technical Education Act of 2006 [Section 122(c)(1)(A)], which states that career and technical education Programs of Study must:

1. incorporate secondary and postsecondary education elements;
2. include coherent and rigorous content aligned with challenging academic standards and relevant career and technical content in a coordinated, non-duplicative progression of courses that align secondary education with postsecondary education to adequately prepare students to succeed in postsecondary education;
3. may include the opportunity for secondary education students to participate in dual or concurrent enrollment programs or other ways to acquire postsecondary education credits; and
4. lead to an industry-recognized credential or certificate at the postsecondary level or an associate or baccalaureate degree.

EFFECTIVE PRACTICES FOR PROGRAMS OF STUDY

Effective practices for programs of study to facilitate students’ transition through the educational pipeline may include:

- robust and active partnerships that include secondary, postsecondary, and business and industry representatives;
- integration of academics and CTE;
- career exploration and development;
- internship and work-based learning opportunities;
- rigorous content (CCR standards);
- dual credit opportunities;
- involvement from business and industry;
- multiple measures of assessment; and
- use of technology.

For more information, access the following resources:

Office of Career, Technical and Adult Education’s (OCTAE) Programs of Study Design Framework [pdf]

Programs of Study Expectations Tool [doc]

Pathways Resource Center’s Illinois Programs of Study Guide [pdf]
DUAL CREDIT
In Illinois, dual credit is defined as an instructional arrangement where an academically qualified high school student enrolls in a college-level course and, upon successful course completion, concurrently earns both college credit and high school credit. It is a college course offered for high school credit. These offerings are established through local agreements between the community college and participating high school(s).

Dual credit programs must adhere to:

- ICCB Administrative Rules [Section 1501.507(b)(11)]
- Dual Credit Quality Act

### BENEFITS OF DUAL CREDIT

- Facilitates the transition between high school and college
- Reduces the cost of a college education
- Reduces the time needed to complete a degree program
- Reduces high school drop-out rates
- Prepares students for college work
- Reduces remediation
- Raises student motivation and aspiration
- Offers greater advanced credit opportunities in rural areas
- Increases postsecondary enrollment

FOR MORE INFORMATION REGARDING DUAL CREDIT REGULATIONS IN ILLINOIS, CONTACT:

Whitney Thompson
Director for Career and Technical Education
whitney.thompson@illinois.gov
217.558.0318

Section 4.4: Enhanced Curriculum and Instruction

Curriculum and pedagogy involve rigorous and relevant instruction and career development that enhance learning and enable students to attain credentials.

**Principle 4 focuses on strengthening the academic and career and technical skills of students in CTE programs through integrating academics with CTE programs; including the same coherent and rigorous content standards in CTE programs as other college programs; and developing, improving or expanding the use of technology in CTE programs. This section highlights strategies of curriculum integration as a means of dually strengthening the academic and career and technical skills of students in CTE programs.**

**CURRICULUM INTEGRATION**

Recent iterations of Perkins legislation represent a major development in CTE—notably, an increased emphasis on academic achievement as well as occupational skills. Perkins IV requires the integration of rigorous and challenging academic and career and technical education in POS/career pathways.

Curriculum integration can be described as an approach to teaching and learning that is based on both philosophy and practicality. It can generally be defined as a curriculum approach that purposefully draws together knowledge, skills, attitudes and values from within or across subject areas to develop a more powerful understanding of key ideas. Curriculum integration occurs when components of the curriculum are connected and related in meaningful ways by both the students and teachers. At its core, integrated curriculum

- connects various curricular disciplines by structuring learning around meaningful themes and concepts;
- offers opportunities to apply learned skills;
- encourages active participation in relevant real-life experiences;
- provides a deeper understanding of content; and
- accommodates a variety of learning styles.
Integrating core academic subjects such as math, science and reading with hands-on CTE instruction is a proven method for improving students’ academic performance.

Some examples of integration are

- blended classrooms;
- co-teaching;
- cohort models;
- contextualized math, reading, and science;
- learning communities;
- work-based learning; and
- technology-enhanced instruction.

ADDITIONAL RESOURCES ON CURRICULUM INTEGRATION

National Resource Center for Career and Technical Education (NRCCTE):
http://www.nrccte.org/core-issues/curriculum-integration

Connect Ed, The California Center for College Career- Designing Multidisciplinary Integrated Curriculum Units:

Section 4.5: Professional Preparation and Development

Principle 5 focuses on providing professional development opportunities for faculty, guidance counselors and administrators to ensure they stay current with all aspects of an industry; to provide internship programs that offer relevant business experience; and to provide trainings on the effective use and application of technology to improve instruction. Below are strategies and topics colleges should consider when exploring professional development options.

REQUIRED PROFESSIONAL DEVELOPMENT TOPICS

Perkins law requires that, at a minimum, the colleges will provide professional development on the following:

- effective integration of academics and CTE,
- effective teaching skills based on research,
- effective practices to engage stakeholders, and
- effective use of scientifically based research and data to improve instruction.

ADDITIONAL PROFESSIONAL DEVELOPMENT TOPICS

In addition to the required professional development activities set forth in Perkins law, there are several permissible topics and strategies that we encourage colleges to offer to their faculty and staff. They include:

- legislation affecting CTE and special populations,
- work-based learning,
- interpersonal skills,
- critical thinking,
- cooperative learning,
- adapting existing instructional materials for CTE programs,
- strategies for training community members and business and industry,
- adaptive equipment and assistive devices for learners with disabilities,
- programs of study, and
- dual credit, dual enrollment, or early college.

Colleges often claim lack of participation as a challenge in offering professional development opportunities. To increase participation, provide faculty members with incentives such as stipends. Also, under a professional leave, colleges can arrange for faculty members to visit other schools or industry sites. Finally, colleges can provide faculty members with access to, and training on, the use of state-of-the-art technology and equipment which can be accommodated by industry partners.
STATE-SUPPORTED PROFESSIONAL DEVELOPMENT

Annually, the Illinois Community College Board (ICCB) orchestrates and supports statewide professional development opportunities for the community college system. These events are a great resource for Perkins Administrators as well as other staff in order to stay up-to-date on emerging trends in CTE as well as best practices from other states and within Illinois. These events also allow the colleges to network with one another and share common challenges and solutions to various obstacles. Examples include training on civil rights reviews by Illinois Center for Specialized Professional Support (ICSPS) and continuous improvement through Office of Community College Research and Leadership (OCCR). Listed below are a few examples of the learning opportunities and technical assistance provided to the system.

Illinois Professional Development Network
The Illinois Community College Board in collaboration with ICSPS offers a variety of targeted professional development opportunities to the field through the Illinois Professional Development Network. Topics are decided by the system through surveys and evaluations. The workshops are offered in a face-to-face or online format to better serve the system and increase participation. For upcoming professional development events through the Illinois Professional Development Network, see: http://icsps.illinoisstate.edu/pd/pdn/.

Forum for Excellence
The Forum for Excellence is the State's premier Career and Technical Education conference hosted by the ICCB and facilitated by ICSPS. The conference offers Career and Technical Education Administrators and Coordinators the opportunity to engage with National and State experts, dialogue with peers on a range of vital topics, and experience new and innovative effective CTE strategies from across Illinois. Colleges are invited to share their expertise by submitting a request for presentations (RFP). The event is traditionally held in September in the central part of the State. To learn more visit http://icsps.illinoisstate.edu/pd/forum-for-excellence/.

Perkins Administrator Cohort
The Perkins Administrator Cohort (PAC) is comprised of postsecondary CTE subrecipients of the Carl D. Perkins Career and Technical Education Grant. It is designed to update and inform such administrators and to build awareness and understanding of the processes, compliance, and best practices for implementing the Perkins grant. The cohort structure utilizes a networking model to disseminate information, share resources, and provide details on opportunities for professional development.

Section 4.6: Program Improvement and Accountability

Data is collected and shared to demonstrate accountability and improve outcomes.

Principle 6 was designed around Perkins IV's emphasis on data and accountability to ensure colleges are using data to improve programs to increase student success measures. To fulfill Principle 6, colleges must focus on the following activities: continuously evaluating and improving CTE programs; assessing how the needs of Special Populations are being met; assisting and enabling Special Populations to meet State-adjusted levels of performance; ensuring program quality is improved, expanded, modernized and includes relevant technology; and ensuring services and activities are of sufficient size, scope, and quality.

Continuous quality improvement (CQI) activities are a fundamental part of Perkins' nine required uses of funds. Typically, colleges have their own institutional processes for CQI; however, there are other methods that may be utilized to ensure these requirements are being met. Many institutions use the Academic Quality Improvement Program (AQIP) provided by the Higher Learning Commission. Institutions may also use the Pathways to Results (PTR) process as part of their CQI plan.

PATHWAYS TO RESULTS
PTR was created to assist community colleges in reviewing and improving CTE Programs of Study. It is aimed at improving student transitions to and through postsecondary education and into employment. This five-part, continuous improvement process empowers organizations to use various inquiry methods, templates, and tools to continuously improve pathways and Programs of Study by addressing inequities in student outcomes. Improved outcomes for all students groups, pathways, organizations and systems are the ultimate goals of PTR. Funding opportunities vary (available through Perkins Leadership) and are offered through a two part model facilitated by the OCCRL where teams participate in intensive institutes, webinars, and workshops as they plan and implement their projects.
The following illustration outlines the five phases of the PTR process.

FOR MORE INFORMATION REGARDING PATHWAYS TO RESULTS, CONTACT:

Edmund Graham
PTR Project Coordinator/ Graduate Research Assistant
Office of Community College Research and Leadership
Egraha3@illinois.edu
217.244.9251
SECTION 5: PROGRAMMATIC MONITORING

The purpose of Perkins Programmatic Monitoring is to review compliance with the Carl D. Perkins Career and Technical Education Act of 2006 as well as to observe evidence of progress on program activities and services. During the monitoring process, information is requested and analyzed to determine the compliance of specific review items. In general, Perkins CTE site visits are completed in one day and are conducted by The Illinois Community College Board's CTE staff.

SCHEDULE

Programmatic Monitoring is based on a two-year cycle with a minimum of 24 colleges receiving on-site monitoring visits each fiscal year. On-site monitoring focuses mostly on the previous fiscal year's grant plan and activities; however, current fiscal year technical assistance issues are also addressed as needed. It is important to note that colleges are not exempt from back-to-back reviews if problems occur or issues arise with executing their Perkins Plan. The programmatic monitoring schedule can be found in Appendix F.

Colleges that are not scheduled for on-site monitoring will receive informal but targeted technical assistance throughout the year. This technical assistance may involve an on-site visit, determined on an as needed basis.

PROCESS

The Perkins Programmatic Monitoring process involves six steps.

Step 1. The self-assessment along with all requested materials is submitted to the ICCB prior to the on-site visit.

Step 2. The on-site monitoring visit takes place.

Step 3. The final report is issued by the ICCB, including any findings and/or recommendations from the on-site visit. This report is sent to the Perkins Administrator and the Chief Academic Officer (CAO) within 30-45 calendar days.

Step 4. A Corrective Action Plan is developed if unsatisfactory elements continue to be relevant.

Step 5. The Corrective Action Plan is submitted and reviewed, and a follow-up visit is conducted.

Step 6. Findings are resolved, or further follow-up may be required.

MONITORING GUIDE

To aid the monitoring process and communication between the State and the colleges, a Monitoring Guide was developed. The Monitoring Guide contains review items that are specific to the Six Guiding Principles and their respective elements.

Each review item is rated as one of the following:

(S) Satisfactory. The activity or service clearly met or exceeded the necessary requirement.

(OFI) Opportunity for Improvement. The activity or service needs improvement but does not require corrective action.

(U) Unsatisfactory. The activity or service did not meet the necessary requirements. An Unsatisfactory rating requires the recipient to develop and submit a Corrective Action Plan.

The Monitoring Guide can be accessed at the following link: https://www.iccb.org/cte/?page_id=55.

PRIOR TO ON-SITE VISIT

Colleges are asked to complete and submit their self-assessment two weeks prior to the on-site monitoring visit. The self-assessment is done by completing and reflecting on the elements listed throughout Sections 1-5 in the Monitoring Guide. The self-assessment can be accessed at any time and has been used by many colleges as an annual assessment of their Perkins program. This assessment helps colleges evaluate the services and activities provided through Perkins funds and determine areas that are in need of quality improvement.

In addition to the self-assessment, other documents must be made available for review both prior to and during the on-site visit. A Programmatic Monitoring Checklist, containing the specific materials requested along with a timeline for submission, will be provided to each college. (Appendix G) Information requests will be sent to the designated Perkins Administrator who will ensure that all required documentation is submitted prior to the visit or ready for review upon arrival.

The ICCB’s CTE staff will provide an agenda to the Perkins Administrator for the on-site review which may include requests for interviews with specific college faculty and/or staff. The Perkins Administrator is responsible for notifying the appropriate college staff and arranging a sufficient meeting location. At a minimum, the Perkins Administrator, career dean(s), CTE faculty and related coordinators should participate in the meeting.

2016 Postsecondary CTE Grant Manual
THE ON-SITE VISIT
During the review, the ICCB's CTE staff will review various documents and meet with college administrators. The ICCB's staff may also interview faculty and students and review CTE program facilities and equipment. (Tours of CTE program facilities will be conducted without disrupting classroom instruction.)

Documentation Review
The ICCB's staff will spend much of the on-site visit reviewing the information that was requested. These materials should be organized and readily accessible for the review.

Exit Interview
The exit interview is the final activity of the on-site visit during which clarification will be sought and a summary of general findings will be provided to the college.

AFTER THE ON-SITE VISIT
A letter detailing the findings from the review along with a draft monitoring report will be issued within 30-45 calendar days following the on-site review. This communication will be sent electronically to both the college's Chief Academic Officer and the Perkins Administrator.

Upon receipt of the monitoring findings, the institution has 30 calendar days to review, comment and/or correct any factual errors. If no response is received, the monitoring report becomes final. If a college receives an Unsatisfactory rating, a Corrective Action Plan must be submitted within 60 calendar days for the ICCB's approval.

SECTION 6: FISCAL MONITORING

The objective of the fiscal monitoring process is to confirm providers are expending funds according to Perkins Grant Guidelines. The Illinois Community College Board’s staff will conduct a fiscal monitoring review a minimum of once every five years. For each provider there may be a scheduled on-site visit for some programs, but the majority of fiscal monitoring will be completed through a desk review.

SCHEDULE
Providers will be contacted by the ICCB’s staff in advance of the fiscal monitoring visit. The Fiscal Monitoring Schedule can be found in Appendix H. Once the provider is chosen for monitoring, which is based on a rotating cycle, a checklist (Appendix I) will be sent to the provider to assist them in preparing for the review. It is important to note that colleges are not exempt from back-to-back reviews if problems occur or issues arise with executing their Perkins Plan.

FISCAL MONITORING REVIEW
The beginning of the fiscal monitoring process consists of reviewing the provider’s revenue and expenditures in the general ledger for the Perkins grant of the requested fiscal year. From each year’s ledger, purchase/requisition orders are requested. The intent is to get a broad range of the orders consisting of various dollar amounts from each expenditure category. After the initial review, there will often be a second request for back-up documentation on sampled items from the initial review. The following five categories outline the specific types of expenditures and information that are reviewed to ensure fiscal compliance:

1. Equipment
   Equipment is used by Perkins-approved programs and/or staff.
   - An inventory log is kept, and items are tagged to ensure the provider has adequate safe
guards in place to prevent loss, damage, or theft of property.
   - Inventory disposal guidelines are in place. (Additional information regarding Equipment is
located on page 48.)

2. Salaries
   If salaries are paid from grant funds, the provider’s payroll accounting, timesheets and any
other salary or benefit documents are reviewed to confirm that each employee is performing
Perkins-related functions and is being paid appropriately. (Additional information on salaries
is on page 50.)

3. Student Information
   If student expenses are paid with grant funds, then verification that the student was registered and
enrolled in a CTE program and was a member of an eligible special populations sub-group will be
examined. This is typically done by reviewing a sample of student transcripts.

4. Transit of Funds
   If the provider, to which the ICCB has distributed funds, transits funds through to other entities, they
are responsible for monitoring and documenting the validity of expenditures made by the sub-
grantee. The ICCB’s staff will verify that there is a process in place to ensure the grant funds are
spent properly. The following are suggestions for monitoring and communicating with sub-grantees:
hold regular meetings, require semi-annual reports and final expenditure reports and review a
sample of sub-grantees each year.

5. Cash on Hand
   Cash on hand is reviewed using the provider’s general ledger. (Additional information on Cash
Management can be found on page 51.)

AFTER THE FISCAL REVIEW
Once the fiscal monitoring review is completed, a summary report is written and sent to the
provider for their review and response. This report includes any compliance findings or advisory
recommendations. A compliance finding is an issue that does not meet the allowable guidelines
for the use of funds.

- A compliance finding will require the recipient to correct the issue and submit a written
response to the ICCB.
- An advisory recommendation will not require the recipient to take corrective action but is
a suggested improvement from the ICCB.

FOR MORE INFORMATION REGARDING FISCAL MONITORING, CONTACT:

Kris Pickford
Director for Financial Compliance
kris.pickford@illinois.gov
217.558.4680
EQUIPMENT

The following are guidelines for meeting the accountability requirements for equipment purchases with Perkins funding.

- The purchase of new or used equipment is permissible with grant funds.
- The ICCB and the grantee maintain joint ownership of all such equipment.
- Purchased equipment must be reasonable and necessary to effectively operate the CTE program. Reasonable means the cost is reasonable; necessary means that existing equipment is not sufficient.

NOTE: Sections 74.2 and 80.32 of EDGAR provide guidance on equipment issues. These sections state “Equipment means tangible, nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5,000 or more per unit. However, consistent with recipient policy, lower limits may be established.” Regardless of the existing capitalization threshold ($5,000 or more per unit or less if consistent with the provider/recipient capitalization threshold policies), the ICCB does require the provider/recipient to maintain accountability for certain items purchased with federal funds that are nonexpendable in nature.

Expendable or Nonexpendable?

A distinction must be made between supply and equipment purchases. This distinction will help ensure that items purchased that are nonexpendable (not consumable) by nature are tangible with an estimated useful life of over one year; have a value of more than $500.00; and are properly safeguarded, monitored and accounted for within the normal course of operations. This distinction often times will affect the classification of the expenditure between equipment/capital outlay and supplies.

This distinction is important to make since certain items below the $5,000 threshold (or the provider’s threshold) may be tangible, nonexpendable personal property that should have controls in place to safeguard the asset. If the item purchased is more properly classified as a supply and is expendable in that it is used up within a limited period of time, then the item should be considered expendable and consumable and should not need to be inventoried. Examples of expendable items include computer print cartridges, paper, other office supplies, etc. Non-expendable items include furniture, computers, printers, instructional equipment, etc.

Accountability and Inventory

At minimum, the program should implement a nonexpendable asset listing for items costing over $500.00 (but not capitalized) and having a useful life over one year. This asset listing should be in place and used to maintain accountability and control over assets acquired using funds to make purchases that by nature are tangible, nonexpendable personal property. An asset listing ensures the provider/recipient will have an audit trail in place to document relevant information pertaining to equipment purchases.

A local equipment inventory is required for all items of equipment purchased with State or federal funds that have a usable life of more than one year. The local grantee should inventory all such items of equipment, documenting:

- the date of purchase;
- item description;
- serial/model number;
- institutional tag number, if applicable;
- purchase price;
- location of equipment;
- funds used for purchase;
- date of disposal;
- method of disposal; and
- fair market value at the date of disposal.

The program need not maintain a separate asset listing if the assets are maintained in the entity-wide inventory listing.

Disposal of Equipment

When equipment is no longer needed for the original project or program for which it was acquired, the equipment shall be used in other federal projects or programs. The program should notify the ICCB, and if the equipment is not needed in any other project or program, it may be retained, sold or otherwise disposed of. To eliminate any item from the local inventory, the program must follow these guidelines:

- Items of inventory may be sold or otherwise disposed of without further financial obligation to the ICCB if the equipment item has a per-unit current fair market value of less than $5,000. The disposal of such items should be so noted on the equipment inventory.
- Items of equipment with per-unit current fair market value of $5,000 or more may not be disposed of without approval from the ICCB’s Director for CTE. A request to dispose of such equipment must be submitted in writing to the ICCB. Permission to dispose of the designated equipment will be granted in writing following a review of the request.
TIME AND EFFORT GUIDANCE

Recipients of federal funds are required to comply with 2 CFR, Part 220 and 2 CFR, Part 225, which mandate time and effort reporting. Per federal guidelines, there must be time and effort documentation to support payroll charges for personnel working on multiple federal awards or cost objectives. This applies to all federally funded grant programs.

Compliance with federal requirements is necessary to prevent cost disallowances and penalties by the federal government. Thus, it is important for institutions that receive federal funding to maintain accurate and auditable systems and records that document how individuals paid with federal funds actually spend their time.

Time and Effort Reporting

Time and Effort reporting is used to document and verify salary expenses charged to federally funded programs. The purpose is to ensure salaries and benefits are properly expended and that actual effort is consistent with the originally anticipated (budgeted) effort. Recipients should at least annually evaluate whether their time and effort documentation is still appropriate for tasks, activities and staff paid from federal sources of funding. The following methods can be used to document time and effort.

- **Semi-annual certifications** may be used to document the time and effort for employees paid from a single federal source.

- **Time distribution documentation** is required for employees that are paid from more than one source of funds. This documentation must be prepared at least monthly and reflect an after-the-fact distribution of the actual activity of each employee. It should also, coincide with one or more pay periods, be signed by the employee and account for 100% of the employee’s time. An example of an acceptable Time Distribution Sheet, with instructions, can be found in Appendix J.

- **Substitute systems** for documenting salaries may also be used. These systems may include techniques for random sampling or quantifiable measures used for analysis of the time spent on tasks performed by the employee. In certain cases, time studies may be appropriate and used as a substitute for continuous time and effort documentation. Generally, time studies are best for programs involving tasks that are repetitive in nature. The processes and procedures and results thereof must be maintained for any substitute system in order to support the salaries charged to the federal program.

CASH MANAGEMENT

Pursuant to 34 CFR Part 74, the Grantee is required to maintain advances of federal funds in an interest bearing account with some exceptions:

- Grantees should manage cash-on-hand to avoid holding cash in excess of 30 days.
- Any interest earned annually totaling $100 or less must be expended on the program or returned to the Department of Education through the Board.
- Any interest earned annually over $100 must be returned to the Department of Education through the ICCB.

Excess Cash Holding Period

The ICCB has designated 30 days as the maximum amount of time a provider may hold cash without exceeding a reasonable period of time that cash may be held on hand before being spent. It is the responsibility of the provider to monitor its available federal cash on hand for the CTE grant program. As stated above in the Fiscal Monitoring section, the ICCB’s staff conducting fiscal monitoring activities will also examine the college’s policies, procedures and practices in place designed to comply with minimizing cash held in excess of 30 days. Annual earned interest amounts less than $100 need not be repaid but should be spent on program initiatives and objectives.
The United States Department of Education, Office of Civil Rights (OCR), mandates civil rights reviews for entities that receive federal funding through the Carl D. Perkins Career and Technical Education Act of 2006 to ensure equal access to education and to promote educational excellence throughout the nation. The Illinois Community College Board (ICCB) is responsible for reviewing community colleges, on an annual basis, to determine compliance with the following standards and guidelines:

- Title VI of the Civil Rights Act of 1964 (prohibiting race, color, and national origin discrimination)
- Title IX of the Education Amendments of 1972 (prohibiting sex discrimination)
- Section 504 of the Rehabilitation Act of 1973 (prohibiting disability discrimination)
- Title 11 of the Americans with Disabilities Act of 1990 (prohibiting disability discrimination by public entities, including public schools, public colleges and universities, public vocational schools, and public libraries) whether or not they receive Federal financial assistance.
- Vocational Education Program Guidelines

To determine which colleges will receive an on-site review, the ICCB utilizes the following selection criteria, which have been approved by the Department of Education, Office of Civil Rights: 1) enrollments by gender; 2) enrollments by disability; 3) enrollments by race; and 4) prior review. No community college will be reviewed more than once every five years.

NOTE: Every college must designate at least one employee who is responsible for coordinating compliance with Title IX and Section 504.

Appendix B: Definitions

The following definitions will assist in understanding many of the activities and effective practices described in this guide and in completing an application for Perkins Grant funding.

Advisory Committee: a group of persons which includes employers and employees who advise CTE educators and administrators on the development, implementation and evaluation of CTE programs to ensure programs are tailored to meet the workforce developments needs of the community. The committee should be comprised of a diverse set of individuals with experience and expertise in an occupational field that the CTE program serves.

Articulation Agreement: Courses designed to meet lower-division baccalaureate degree requirements shall be applicable to associate transfer degrees. For each baccalaureate course offered, the college shall either obtain approval for the course to be listed as a statewide articulated transfer course by a general education or baccalaureate major panel of the Illinois Articulation Initiative or maintain current written articulation agreements or transfer equivalency documents with: A) at least three Illinois public universities, or B) at least three baccalaureate degree-granting institutions to which a majority (51%) of the college’s students, majoring in the field for which the course is required, transfer. [ICCB Rule 1501.309d1]

Associate Degree: An award for satisfactory completion of a curriculum of 60 semester credit hours or more. [Section 1501.301 ICCB Administrative Rules]

Career and Technical Education: (A) a sequence of courses that [i] provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in current or emerging professions; [ii] provides technical skill proficiency, an industry-recognized credential, a certificate, or an associate degree; and [iii] may include prerequisite courses (other than a remedial course) and (B) includes competency-based applied learning that contributes to the academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, general employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of an industry. [Section 3(5) Perkins IV]

Career Guidance and Academic Counseling: Guidance and counseling that (A) provides access to information regarding career awareness and planning with respect to an individual’s occupation and academic future; and (B) provides information with respect to career options, financial aid, and postsecondary options, including baccalaureate degree programs. [Section 3(7) Perkins IV]

Certificate: An award for satisfactory completion of a series of courses or curriculum of 50 semester credit hours or less. [Section 1501.301 ICCB Administrative Rules]

Occupational Certificate: An award for satisfactory completion of a prescribed curriculum intended to prepare an individual for employment in a specific field. [Section 1501.301 ICCB Administrative Rules]
Completer: A postsecondary student who has completed a program of study or earned an industry recognized credential.

Concentrator: Someone who (1) Within one fiscal year earns at least 12 academic or CTE credits within a single program area sequence that is comprised of 12 or more academic and technical credits and terminates in the award of an industry-recognized credential, certificate, or degree; or (2) Completes a short-term CTE program sequence of less than 12 credit units that terminates in an industry-recognized credential, certificate, or degree. (3) CTE concentrators are preparing for a future job immediately after attending the community college or are participating in higher education to improve their skills for their current employment.

Core Indicators of Performance: Accountability system used to assess the effectiveness of the State and local funding recipients in achieving progress in CTE. [Section 113 Perkins IV]

Corrective Action Plan: A corrective action plan is a plan developed by the college when an unsatisfactory finding in which activities or services did not meet the necessary requirement(s) is made. If a college receives an unsatisfactory rating, a Corrective Action Plan must be submitted within 60 days for the ICCB’s approval.

Displaced Homemaker: An individual who: has worked primarily without remuneration to care for a home and family, and for that reason has diminished marketable skills; has been dependent on the income of another family member but is no longer supported by that income; or is a parent whose youngest dependent child will become ineligible to receive assistance under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) not later than 2 years after the date on which the parent applies for assistance under such title; and is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment. [Section 3(10)A-B Perkins IV]

Eligible Institution: An institution is eligible for Perkins’s funding if they are: (A) a public or nonprofit private institution of higher education that offers career and technical education courses that lead to technical skill proficiency, an industry-recognized credential, a certificate, or a degree; (B) a local education agency providing education at the postsecondary level; (C) an area career and technical education school providing education at the postsecondary level; (D) a postsecondary educational institution controlled by the Bureau of Indian Affairs or operated by or on behalf of any Indian tribe; (E) an educational service agency; or (F) a consortium of 2 or more of the entities described above. [Section 3(13 A-F Perkins]

Individuals with Disabilities: An individual student who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires. The term “disability” means with respect to an individual with a physical or mental impairment that substantially limits one or more major life activities, a record of such an impairment, or being regarded as having such an impairment.

Individuals from Economically Disadvantaged Families, Including Foster Children: The term is also applied to students enrolled in public two-year colleges and school districts who are the recipients of PELL grants.

Limited English Proficiency: Individuals with limited ability in speaking, reading, writing, or understanding English, and (A) whose native language is a language other than English; or (B) who lives in a family or community environment in which a language other than English is the dominant language. [Section 3(16) Perkins IV]

Nontraditional Training and Employment: Occupations or fields of work, including careers in computer science, technology, and other current and emerging high skill occupations, for which individuals from one gender comprise less than 25 percent of the individuals employed in each such occupation or field of work. [Section 3(20) Perkins IV]

Participant: Postsecondary student who has earned one (1) or more credits in any Career and Technical Education (CTE) program area.

Program of Study: The career and technical programs of study, which may be adopted by local educational agencies and postsecondary institutions to be offered as an option to students when planning for and completing future coursework, for career and technical content areas that 1) incorporate secondary education and postsecondary education elements; 2) include coherent and rigorous content aligned with challenging academic standards and relevant career and technical content in a coordinated, non-duplicative progression of courses that align secondary education with postsecondary education to adequately prepare students to succeed in postsecondary education; 3) may include the opportunity for secondary students to participate in dual or concurrent enrollment programs or other ways to acquire postsecondary credits; and 4) lead to an industry-recognized credential or certificate at the postsecondary level or an associate or baccalaureate degree. [Section 122 (c) (A) Perkins IV]

Single Parents: A student who is unmarried or legally separated from a spouse and has a minor child or children for which the parent has either custody or joint custody or is pregnant.

Special Populations: The Carl D. Perkin’s Act focuses on serving underrepresented groups which include (A) individuals with disabilities; (B) individuals from economically disadvantaged families, including foster children; (C) individuals preparing for nontraditional fields; (D) single parents, including single pregnant women; (E) displaced homemakers; and (F) individuals with limited English proficiency. [Section 3(29) Perkins IV]

Statements should begin with Students, Faculty, or Business partners "will be able to (insert verb)."*

Be very clear about what you are trying to assess. The expected outcome should be the result of the activity described for the element in order to meet the goals of the principle. Questions to consider when writing outcomes:

1. Is the outcome measurable?
2. Is the method of measurement documented?
3. Is the outcome realistic and achievable?
4. Does the outcome reflect the same specified population as the activity?
5. Does it relate to and clearly impact one or more of the Performance Measures?
6. Will relevant parties find the information generated credible and applicable to decisions that need to be made?

Principle 1 (Leadership, Organization, and Support)
Activity: Host four professional development sessions for CTE high school and college administrators and faculty on curriculum integration and alignment.

Expected Outcome: High school and college CTE instructors will be able to integrate and employ an aligned and integrated curriculum, while enhancing and forming a stronger relationship. (Method of Measurement: Use feedback and evaluations from sessions to improve programming)

Principle 2 (Access, Equity and Opportunity)
Activity: Invite business and industry guest speakers to present industry information to students and/or conduct field trips to allow students to view the various aspects of industry and visit potential employers.

Expected Outcome: Students will be able to interpret the information presented by the businesses as it relates to their courses. Students will also be able to network with potential employers in the area. (Method of Measurement: instructor observations, student reports, documented follow up required by students)

Principle 3 (Alignment and Transition)
Activity: Provide NASSSA testing for Automotive students to prepare them to take their industry-recognized credential test.

Expected Outcome: Over 80% of the automotive students will be able to successfully complete an industry-recognized credential test. (Method of Measurement: test results)

Principle 4 (Enhanced Curriculum and Instruction)
C. Use of Technology in CTE programs
Activity: Purchase and provide simulator equipment, modules, and software to allow students to improve knowledge and skills through hands-on demonstrations and innovative technology used by industries for the following clusters/pathways: Health Science, TDL, and Corrections and Security.

Expected Outcome: 70% of the students will be able to demonstrate proficiency of the technologies and skills necessary to be successful in their field of study. (Method of Measurement: comprehensive exams and project observations)

Principle 5 (Professional Preparation and Development)
J. Transition to Teaching
Activity: Department Chairs will provide a mentoring and training for faculty who are transitioning from business and industry to adjunct faculty positions.

Expected Outcome: Adjunct faculty, fluent in their sector of expertise, will be able to use innovative strategies in teaching the students in their selected courses. (Method of Measurement: evaluations and lesson plans)

Principle 6 (Program Improvement and Accountability)
E. Services and Activities
Activity: Implement Truck Driving and Construction Tech CTE programs.

Expected Outcome: The College will increase the number of quality high-wage, high-demand CTE programs offered to students. At least 30 students per semester will enroll in the newly implemented programs. (Method of Measurement: industry data, course roster, enrollment data)

Appendix I: Fiscal Monitoring Checklist

Postsecondary Perkins

Illinois Community College Board (ICCB) staff will review and examine Postsecondary Perkins sub-recipients to ensure funds are being expended according to grant guidelines.

The following checklist is intended to aid providers in preparation for the fiscal monitoring visit. Its intent is to provide a general overview of most items and/or materials which will be reviewed in conjunction with all fiscal monitoring visits of ICCB Postsecondary Perkins.

Upon completion of the review, a final narrative report detailing any findings will be forwarded to the sub-recipient and kept on file at the ICCB. If corrective action is required, the sub-recipient will have 30 days to follow-up with the ICCB.

☐ Review revenue and expenditure accounting in the provider’s general ledger for the requested fiscal year.

☐ Request specific purchase/requisition orders for various expenditure classifications from the general ledger.

☐ Review purchase/requisition orders to confirm they are allowable expenditures under the grant guidelines.

☐ Review the provider’s inventory list and inventory purchases from the general ledger.

☐ Confirm the inventory purchased is being used for allowable programs and is allowable under the grant guidelines.

☐ Confirm inventory is being tagged and there are safeguards in place for equipment purchased with grant funds.

☐ Review the provider’s inventory disposal guidelines.

☐ Review any student transcripts and ensure they are members of a Special Population if any expenses are being reimbursed with Perkins funds.

☐ Verify cash on hand from grant by reviewing revenues, expenditures, and obligations to ensure the provider maintains proper cash management of the grant.

### INSTRUCTIONS

This form should be completed by persons who are being paid from two or more grant funds.

1. Use one form for each month.

2. Each sheet should include the employee name, position, month/year covered, signature of employee, date of submission and signature of supervisor.

3. **DATE:** In the boxes below a specific date, enter the percentage of time spent that day on a particular task for a particular funding source. The total for each date must equal 100%.

4. **DESCRIPTION:** Enter the “Activity” and “Funding Source” applicable for the portion of time. Programs may use the numbers provided or abbreviations that are appropriate to their organization detail for the activities and for the funding source. If “Other” Activity (#16) and/or Funding Source (#7) is utilized, please write in a specific description.

5. If the detail for a staff member indicates work under Federal Funding that involves travel, there must be correlation between the time distribution sheets and the travel documents for Federal Funding.

This is a sample form that may be used or modified by the program. Time distribution is not required to be documented in this format. However, it must reflect the appropriate activity and amount of time spent on activities funded with Federal Sources. Each day must account for 100% of the employee’s time and activities. Expenditure claims for charges to the Federal Funding Source should align with the information included on the time distribution sheets.
