Introduction to the 2017 Illinois ESL Content Standards

This new edition of the Illinois ESL Content Standards is designed to increase the academic rigor of ESL programming in Illinois in order to strengthen the educational pathways from ESL instruction to ABE/ASE instruction, post-secondary education, and career training. This revision addresses the focus of the Workforce Innovation and Opportunity Act (WIOA), which was signed into law in July 2014. According to the U.S. Department of Education, WIOA strengthens the alignments between adult education, postsecondary education, and employers:

WIOA recognizes that the core purpose of adult education is to prepare individuals with the skills and knowledge needed to succeed in postsecondary education and the workforce. The Act:

- Expands the purpose of adult education to emphasize that activities should increase an individual's ability to transition to postsecondary education and obtain employment.
- Promotes the integration of adult education with occupational education and training, as well as development of career pathways systems; authorizes the use of funds for integrated education and training and workforce preparation activities.¹

The WIOA final rules were released in the fall of 2016. As stated in the final rules, a major purpose of the Adult Education and Family Literacy Act is to assist immigrants and other individuals who are English language learners (ELLs) to:

- Improve their reading, writing, speaking, and comprehension skills in English
- Improve their mathematics skills
- Acquire an understanding of the American system of government, individual freedom, and the responsibilities of citizenship.²

WIOA requires states to align content standards for adult education with state-adopted challenging academic content standards. This edition of the Illinois ESL Content Standards addresses this requirement by expanding the standards to include three new components, described in this Introduction:

1. English Language Proficiency (ELP) Standards for Adult Education³
*correlated to the College and Career Readiness (CCR) Standards*⁴
2. Applicable Illinois ABE/ASE Mathematics Standards
3. The Illinois Technology Skills Checklist for Students

What Are Content Standards?

Content standards describe what learners should know and be able to do in specific content areas. The Illinois ESL Content Standards define what adult ELLs should know and be able to do as a result of instruction at a particular level.

The Illinois ESL Content Standards are not a curriculum. In addition, they are not:

- A Checklist of Competencies
- A Scope and Sequence of Study
- Performance Indicators, Benchmarks, or Exit Criteria

The Illinois ESL Content Standards are broader than the curricular components above. The standards should serve as the basis for curriculum design, which may include these components. The standards should also function as a tool for selecting or designing appropriate instructional materials and effective standards-based lessons. Section 4 contains sample standards-based lesson plans for a range of ESL levels.

How Are the 2017 ESL Content Standards Different from the 2007 Standards?

The 2007 ESL Content Standards are comprised of leveled language standards for listening, speaking, reading, and writing. While these standards have not changed, the academic rigor of the standards has significantly increased by expanding the standards to include three new components.

1. The English Language Proficiency (ELP) Standards for Adult Education⁵

In November 2016, a new set of federal standards for adult ELLs was released by the U.S. Department of Education, Office of Career, Technical and Adult Education to complement the CCR Standards published in 2013. The new ELP standards are part of the three-year national project, *Preparing Adult ELLs for Rigorous CCR Standards*. The goal of this project is to develop products that support educational programs in assisting adults to achieve competency in English language acquisition as well as rigorous academic content.⁶

The ELP standards are correlated to the CCR standards and are designed to function in tandem with them to meet the needs of ELLs. Because the CCR standards are designed for native speakers of English, they are insufficient as a sole set of standards for ELLs:

To fully and successfully participate in AE programs that are based on college and career readiness (CCR) standards, ELLs must simultaneously acquire English language proficiency (ELP) and achieve across multiple content areas. When it comes to providing instruction, two sets of standards must work together—academic content standards and ELP standards.⁷

It is important to note that the ELP Standards reflect the three key instructional advances prompted by the CCR Standards:

- Advance #1: Regular practice with complex text and its academic language
- Advance #2: Reading, writing, and speaking grounded in evidence from text (both literary and informational)
- Advance #3: Building knowledge through content-rich nonfiction

⁷ U.S. Department of Education, Office of Career, Technical and Adult Education, *Adult English Language Proficiency Standards for Adult Education*. Washington, DC, 2016 <http://lincs.ed.gov/publications/pdf/elp-standards-adult-ed.pdf>

There are 10 main ELP Standards with a number of descriptors. Standards 1–7 highlight the language skills required for ELLs to engage in content-specific practices necessary for full engagement in English language arts and literacy, mathematics, and science. Standards 8–10 highlight the linguistic skills needed to support Standards 1–7. For example, ELP Standard 8 (*An ELL can determine the meaning of words and phrases in oral presentations and literary and informational text*) is necessary in order for ELLs to engage with ELP Standard 1 (*An ELL can construct meaning from oral presentations and literary and informational text through level-appropriate listening, reading, and viewing*).

As a whole, the ELP Standards focus on all four areas of language acquisition: listening, speaking, reading, and writing. ELP Standards 1 and 8 focus on receptive skills (i.e., listening and reading) while the focus of ELP Standards 3, 4, and 7 is on productive skills (i.e., speaking and writing). ELP Standards 2, 5, and 6 are interactive in that they require collaborative use of both receptive and productive skills. ELP Standards 9 and 10 focus on the linguistic structures of English.

The chart below lists the 10 ELP Standards and summarizes their functions.

<p style="text-align: center;">ELP Standards</p> <p style="text-align: center;">An ELL can....</p>	<p style="text-align: center;">Functions of Standards</p>

Appendix A provides additional information about the ELP Standards including the guiding principles that underlie the standards and practical suggestions for scaffolding instruction in the classroom.

2. Illinois ABE/ASE Mathematics Standards

As stated on page 1, WIOA includes mathematics as a goal of instruction for ELLs. Under WIOA, mathematics should be integrated into ESL curricula to help prepare ELLs for success in acquiring a high-school equivalency certificate, transitioning to post-secondary or career education, or entering the workforce. For this reason, each level of the Illinois ESL Content Standards includes standards from the Illinois ABE/ASE Mathematics Standards.

It is important to note that only select ABE/ASE mathematics standards appear in this document. The Illinois ABE/ASE Mathematics Standards are comprised of standards that correspond to the six NRS Educational Functioning Levels for ABE, i.e., from Beginning ABE Literacy through High Adult Secondary. However, the levels of the NRS ABE levels exceed those of the NRS ESL levels as illustrated in the chart on page 6. For this reason, standards selected for inclusion are those which 1) correspond to the target NRS Educational Functioning Levels for ESL and 2) focus on math skills ELLs need in everyday life and in the workplace.

For each ESL level, four math-related elements are included:

1. Mathematics standards appropriate to the language of that level
2. Examples of how the standards are used in real life, i.e., how they are tied to language functions, specific life skills, or foundational math skills needed in the workplace
3. Corresponding Illinois ESL Content Standards
4. Examples of math and ESL integration activities in the classroom

The Mathematics Standards are presented in two ways:

- By ESL Level: Section 1 contains the mathematics standards organized by NRS level, along with the Illinois ESL Content Standards and the ELP Standards.
- As a Sequential List: Appendix B contains the mathematics standards as a single sequential list, i.e., from Beginning ESL Literacy through Advanced ESL. This sequential list is designed to assist programs with curriculum development and to assist instructors with lesson planning, particularly in the case of multilevel classrooms where ELLs have differences in math ability and prior math education.

Appendix B also provides additional information about integrating math standards in the ESL classroom, while sample lesson plans for integrating math with ESL appear in Section 4.

3. The Illinois Technology Skills Checklist for Students

WIOA recognizes the crucial role that digital literacy plays in college and career readiness and successful transition of adult education students to family-sustaining employment. Section 3 contains the ICCB *Illinois Technology Skills Checklist for Students* that was developed by the ICCB Advisory Committee. A chart correlating the technology skills with applicable Illinois ESL Content Standards by level is included.

Illinois ABE/ASE English Language Arts Standards (Appendix C)

Appendix C contains an alignment of applicable standards from the 2016 edition of the Illinois ABE/ASE Language Arts Standards and the Illinois ESL Content Standards. This alignment may be useful to programs in designing curricula for ELLs who will transition from ESL instruction to ABE/ASE instruction or for ABE/ASE instructors who have ELLs in their classrooms.

Design of the Illinois ESL Content Standards

The Illinois ESL Content Standards have six levels corresponding to the NRS Educational Functioning Levels for ESL. Section 1 contains the ESL Standards, the ELP Standards, and the Mathematics Standards organized by these six levels.

The chart below shows the correlation of the NRS Levels with the ELP, CCR, and Illinois ABE/ASE Language Arts and Mathematics Standards Levels.

Guide to the Standards

Section 1 contains the Illinois ESL Content Standards organized by NRS Educational Functioning Level for ESL. For each of the six NRS levels, the Standards appear in this order:

- Illinois ESL Content Standards
- English Language Proficiency (ELP) Standards for Adult Education*
correlated to the Illinois ESL Content Standards and the CCR Standards--see the correlation guide on the following page
- Applicable Illinois ABE/ASE Mathematics Content Standards**
correlated to the Illinois ESL Content Standards—see the correlation guide on page 9

These three sets of standards complement one another and work together to increase the academic rigor of ESL instruction and thus strengthen the educational pathways from ESL instruction to ABE/ASE instruction, post-secondary education, and career training.

The Illinois ESL Content Standards are organized by level using these abbreviations:

BL	=	Beginning ESL Literacy
LB	=	Low Beginning ESL
HB	=	High Beginning ESL
LI	=	Low Intermediate ESL
HI	=	High Intermediate ESL
AE	=	Advanced ESL

Each level includes standards in four skill areas, with the following abbreviations:

L	=	Listening
S	=	Speaking
R	=	Reading
W	=	Writing

Each standard is coded according to the level and the skill.

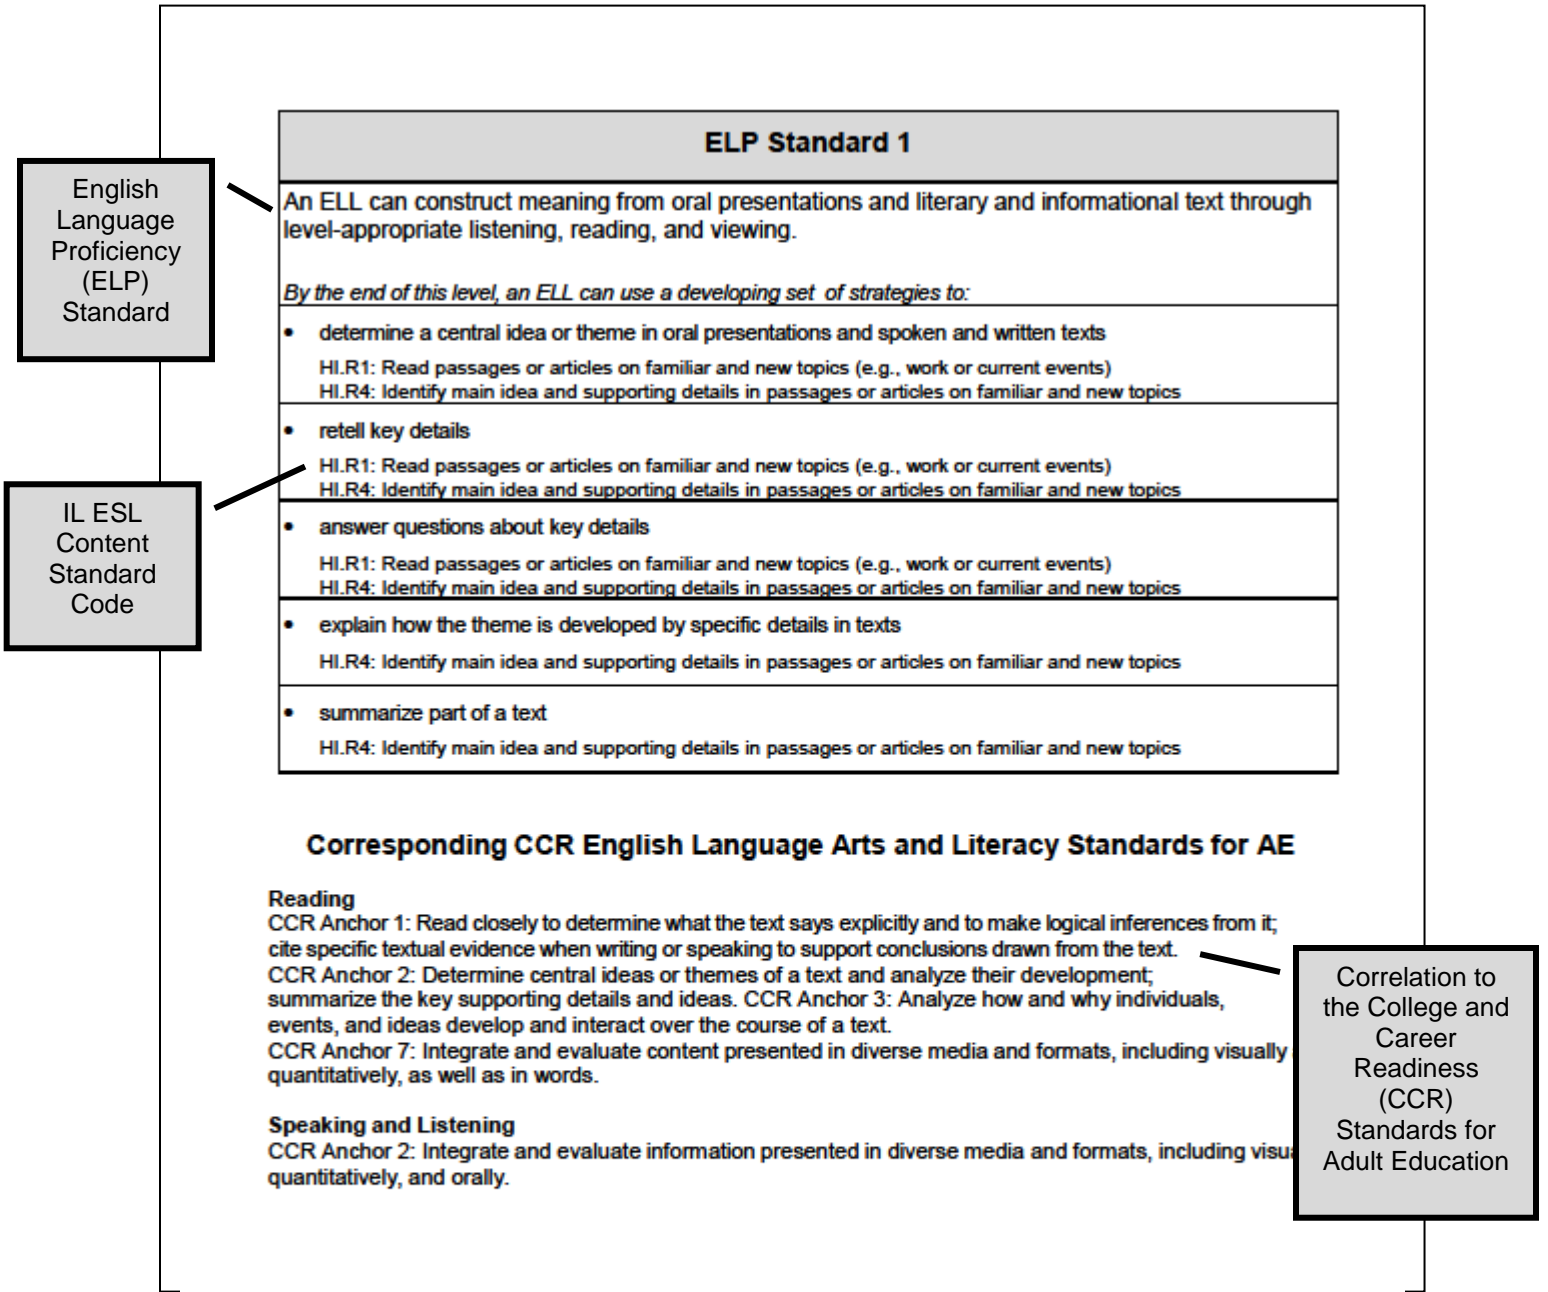

For example, Standard “BL.S1” means “Beginning ESL Literacy, Speaking Standard #1.”

Note about examples: Many of the standards include examples in order to clarify the standards and to provide instructors with possible contexts for teaching those standards. However, instructors do not have to teach the examples provided and should feel free to include other contexts based on the needs, skills, and interests of their students.

* For more information about the ELP Standards, see the Introduction and Appendix A.

** For more information about the Mathematics Standards, see the Introduction and Appendix B.

LISTENING	
BL.L1	Identify English alphabet letter names
BL.L2	Identify cardinal numbers 0-100
BL.L3	Demonstrate understanding of basic greetings and polite expressions (e.g., <i>Good morning. How are you? Thank you.</i>)
BL.L4	Demonstrate understanding of requests for basic personal information (e.g., <i>What's your name? What's your address?</i>)
BL.L5	Follow simple oral classroom instructions (e.g., <i>Repeat, Copy, Listen</i>)
BL.L6	Demonstrate understanding of basic life skills vocabulary (e.g., family, days, months, time, money)
SPEAKING	
BL.S1	Name the letters of the English alphabet
BL.S2	Use cardinal numbers 0-100
BL.S3	Use basic greetings and polite expressions (e.g., <i>Good morning. How are you? Thank you.</i>)
BL.S4	Respond to questions about basic personal information (e.g., <i>What's your name? What's your address?</i>)
BL.S5	Say money amounts
BL.S6	Ask for and give the time (e.g., <i>What time is it? It's 10:30.</i>)
BL.S7	Express lack of understanding (e.g., <i>I don't understand.</i>)
BL.S8	Ask and respond to simple questions using basic life skills vocabulary (e.g., family, days, months, time, money)

Examples may include, but are not limited to, those listed.

English Language Proficiency Standards for Adult Education
and Applicable IL ESL Content Standards

ELP Standard 1

An ELL can construct meaning from oral presentations and literary and informational text through level-appropriate listening, reading, and viewing.

By the end of English language proficiency level 1, an ELL can use a very limited set of strategies to:

- identify a few key words and phrases in oral communications and simple spoken and written texts.
 - BL.L3: Demonstrate understanding of basic greetings and polite expressions (e.g., *Good morning. How are you? Thank you.*)
 - BL.L4: Demonstrate understanding of requests for basic personal information (e.g., *What's your name? What's your address?*)
 - BL.L5: Follow simple oral classroom instructions (e.g., *Repeat, Copy, Listen*)
 - BL.L6: Demonstrate understanding of basic life skills vocabulary (e.g., family, days, months, time, money)
 - BL.R3: Recognize the relationship between letters and their sounds when reading familiar words
 - BL.R4: Recognize simple personal information words (e.g., *first, last, address*)
 - BL.R5: Recognize simple signs related to basic needs (e.g., *Men, Women, Exit*)
 - BL.R6: Read simple classroom instructions (e.g., *Copy, Circle, Match*)
 - BL.R7: Read short sentences of previously learned vocabulary

Reading

CCR Anchor 1: Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.

CCR Anchor 2: Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.

CCR Anchor 3: Analyze how and why individuals, events, and ideas develop and interact over the course of a text.

CCR Anchor 7: Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.

Speaking and Listening

CCR Anchor 2: Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.

ELP Standard 2

An ELL can participate in level-appropriate oral and written exchanges of information, ideas, and analyses, in various social and academic contexts, responding to peer, audience, or reader comments and questions.

By the end of this level, an ELL can...

- actively listen to others.
 - BL.L3: Demonstrate understanding of basic greetings and polite expressions (e.g., *Good morning. How are you? Thank you.*)
 - BL.L4: Demonstrate understanding of requests for basic personal information (e.g., *What's your name? What's your address?*)
 - BL.L5: Follow simple oral classroom instructions (e.g., *Repeat, Copy, Listen*)

- participate in short conversations and written exchanges about familiar topics and in familiar contexts.
 - BL.L3: Demonstrate understanding of basic greetings and polite expressions (e.g., *Good morning. How are you? Thank you.*)
 - BL.L4: Demonstrate understanding of requests for basic personal information (e.g., *What's your name? What's your address?*)
 - BL.L5: Follow simple oral classroom instructions (e.g., *Repeat, Copy, Listen*)
 - BL.S3: Use basic greetings and polite expressions (e.g., *Good morning. How are you? Thank you.*)
 - BL.S4: Respond to questions about basic personal information (e.g., *What's your name? What's your address?*)
 - BL.S6: Ask for and give the time (e.g., *What time is it? It's 10:30.*)
 - BL.S7: Express lack of understanding (e.g., *I don't understand.*)
 - BL.S8: Ask and respond to simple questions using basic life skills vocabulary (e.g., family, days, months, time, money)
 - BL.W3: Write simple personal information (e.g., first and last name, address, birthdate)

- present simple information.
 - BL.S3: Use basic greetings and polite expressions (e.g., *Good morning. How are you? Thank you.*)

	IL ABE/ASE Math Standard*	Examples of How Adults Use this Skill
1.CC.1	Count to 100 by ones and by tens.	Count money. Count boxes of supplies at work.
1.CC.5	Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.	Count how many pennies, dimes, \$1 bills in the cash drawer. Count out silverware for each place setting.
1.CC.7	Compare two numbers between 1 and 10 presented as written numerals.	Compare number of milk gallons on hand with number needed for breakfast service.
1.OA.2	Solve addition and subtraction word problems, and add and subtract within 10 (e.g., by using objects or drawings to represent the problem).	Count cleaning supplies to place order needed for the next week. Determine how many customers were served between 10 am and noon.
1.OA.4	For any number from 1 to 9, find the number that makes 10 when added to the given number (e.g., by using objects or drawings), and record the answer with a drawing or equation.	Make change from \$10. Count baking supplies to determine if there are 10 of each spice needed for one month.
1.MD.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.	Measure the height and weight of each patient you check in.
1.MD.6	Tell and write time in hours and half-hours using analog and digital clocks.	Determine what bus to catch to get to work on time.

2. In a unit on using the verb *to be* to describe people, have students measure each other's heights and practice making statements such as *I am 5'6"* or *She is 5'3"*.
3. For a unit on telling time, say different times aloud and have students write them, e.g., 10:30. Then give students movable analog clocks (with hands), write a time on the board and have students move the hands to match the digital time. Students practice asking, "What time is it?" and answering with various times as indicated on an analog or digital clock.

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard *	Examples of How Adults Use this Skill
1.OA.9 CCR.OA.A	Understand subtraction as an unknown-addend problem. For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8.	Making change. Determining how many years lived in a specific place.
1.OA.11 CCR.OA.A	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and reading equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).	Pay for \$14 of groceries with a \$10 bill and four \$1 bills. Calculate the number of dogs walked during the day.
1.NBT.2 CCR.NBT.A	Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: <ul style="list-style-type: none"> a. 10 can be thought of as a bundle of ten ones—called a “ten.” b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones).	Count 10 cookies to put on each tray and the number left after all trays are filled.
1.MD.5 CCR.MD.A	Express the length of an object as a whole number of length units by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. <i>Limit to contexts where the object being measured is spanned by a whole number of length units with no gaps or overlaps.</i>	Measure the length and width of a yard to determine how much fencing is needed.

Examples of Math & ESL Integration in the Classroom

1. For a unit on shopping, students role play interactions between a cashier and a customer, saying amount due, making payment using fake money, and making change.
2. For a lesson on simple past tense, students make statements to describe where they lived or worked previously and for how long, e.g., “I lived in Puebla for 13 years.” “I worked at Portillo’s for 3 years and 5 months.”
3. For a unit on housing, students are asked to measure items in the classroom, or rooms or furnishings in their homes, e.g., kitchen, table. They fill in the measurements on a sentence template, e.g., “My kitchen is 8’ x 10’.” “My table is 36” x 50”.”

Test Benchmark: CASAS scale scores Reading: 191–200 BEST Plus 2.0: 428 – 452 BEST Literacy: 53–63	Individual can understand common words, simple phrases, and sentences containing familiar vocabulary, spoken slowly with some repetition. Individual can respond to simple questions about personal everyday activities, and can express immediate needs, using simple learned phrases or short sentences. Shows limited control of grammar.	Individual can read most sight words, and many other common words. Can read familiar phrases and simple sentences but has a limited understanding of connected prose and may need frequent re-reading. Individual can write some simple sentences with limited vocabulary. Meaning may be unclear. Writing shows very little control of basic grammar, capitalization and punctuation and has many spelling errors.
	Functional and Workplace Skills	
	Individual can function in some situations related to immediate needs and in familiar social situations. Can provide basic personal information on simple forms and recognizes simple common forms of print found in the home, workplace and community. Can handle routine entry level jobs requiring basic written or oral English communication and in which job tasks can be demonstrated. May have limited knowledge or experience using computers.

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard*	Examples of How Adults Use this Skill
1.OA.8 CCR.OA.A	Apply properties of operations as strategies to add and subtract. Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known (commutative property of addition). To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$ (associative property of addition). Students need not use formal terms for these properties.	Add the number of hours in school each week.
1.OA.12 CCR.OA.A	Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$	Exchange large denominations of currency for smaller bills.
1.OA.13 CCR.OA.A	Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = ? - 3$, $6 + 6 = ?$.	Determine quantity of office supplies to order for the month.
1.NBT.3 CCR.NBT.A	Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.	Compare number of servings made from different recipes. Decide which recipes to make and make a grocery list of ingredients needed.
1.MD.7 CCR.MD.A	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Understanding a child's growth chart.
1.G.9	Partition circles and rectangles into two and four equal shares, describe the shares using the words halves, fourths, and quarters, and use the phrases half of, fourth of, and quarter of. Describe the whole as two of or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.	Cut pizzas, pies, cakes, into equal size pieces.

Examples of Math and ESL Integration

1. For a unit on employment, students fill in a chart with the number of hours they work each day for a week. Then they write equations to represent their work week and the total hours worked, e.g., $7+9+8+6+8+5=43$.
2. For a health unit and practice using modal verb 'have to,' students read dosage charts on medicine packages and determine appropriate dosages for several sample patients based on the patient's weight. They make statements such as "Mr. X weighs more than 100 pounds. He has to take two pills every 4 hours."
3. For a unit on shopping, students compare prices of products at different stores, and use numerical notation to write comparisons, e.g., "\$1.29 > \$1.07."

Test Benchmark: CASAS scale scores: Reading: 201–210 BEST Plus 2.0: 453 – 484 BEST Literacy: 64– 67	Individual can understand simple learned phrases and limited new phrases containing familiar vocabulary spoken slowly with frequent repetition; can ask and respond to questions using such phrases; can express basic survival needs and participate in some routine social conversations, although with some difficulty; and has some control of basic grammar.	Individual can read simple material on familiar subjects and comprehend simple and compound sentences in single or linked paragraphs containing a familiar vocabulary; can write simple notes and messages on familiar situations but lacks clarity and focus. Sentence structure lacks variety but shows some control of basic grammar (e.g., present and past tense) and consistent use of punctuation (e.g., periods, capitalization).
	Functional and Workplace Skills	
	Individual can interpret simple directions and schedules, signs, and maps; can fill out simple forms but needs support on some documents that are not simplified; and can handle routine entry level jobs that involve some written or oral English communication but in which job tasks can be demonstrated. Individual can use simple computer programs and can perform a sequence of routine tasks given directions using technology (e.g., fax machine, computer).

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard *	Examples of How Adults Use this Skill
2.OA.1 CCR.OA.B	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem).	Determine number of pieces of candy for party favor bags at a birthday party.
2.OA.5 CCR.OA.B	Interpret products of whole numbers (e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each). For example, describe a context in which a total number of objects can be expressed as 5×7 .	Calculate the total number of chairs in the audience for the workshop.
2.OA.7 CCR.OA.B	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem).	Determine number of hours available to visit each worksite location in a 40 hour work week.
2.OA.10 CCR.OA.B	Understand division as an unknown-factor problem. For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.	Calculate number of buses needed for employees to go to the company picnic.
2.NBT.3 CCR.NBT.B	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	Write checks to pay monthly bills.
2.NBT.10 CCR.NBT.B	Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.	Calculate the amount of baseboard needed for a house.
2.NF.3 CCR.NF.B	<p>Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.</p> <p>a. Understand two fractions as equivalent (equal) if they are the same size or the same point on a number line.</p> <p>b. Recognize and generate simple equivalent fractions (e.g., $1/2 = 2/4$, $4/6 = 2/3$). Explain why the fractions are equivalent (e.g., by using a visual fraction model).</p> <p>c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. Examples: Express 3 in the form $3 = 3/1$; recognize that $6/1 = 6$; locate $4/4$ and 1 at the same point of a number line diagram.</p> <p>Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole.</p>	Compare the amount of ingredients for a cookie recipe.

2.MD.1	Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	Measure the width of a house to determine the number of bushes needed.
2.MD.9 CCR.MD.B	Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i>	Create a graph that shows what transportation people use to get to work.
2.MD.13 CCR.MD.B	Recognize area as an attribute of plane figures and understand concepts of area measurement. a. A square with side length 1 unit, called “a unit square,” is said to have “one square unit” of area, and can be used to measure area. A plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.	Determine amount of flooring needed.

LI.R5: Use alphabetical or numerical order to locate information (e.g., in a phone book, dictionary, index)

Writing

LI.W1: Write short paragraphs on familiar topics (e.g., family, neighborhood)

LI.W4: Write simple directions to a familiar location (e.g., to one’s house, to a local store)

Examples of Math and ESL Integration

1. For a unit on food and practice in using imperatives, students work in small groups to find or create a recipe, double it, write the amounts and instructions, and present it orally to the class.
2. For a unit on transportation, students interview each other about the transportation used to go to work. They compile their information and create a pie or bar chart. Then they make statements about their findings, e.g., “More people take a bus.” “Half the people drive a car to work.”
3. For a unit on communities, students use a local map and practice giving directions to get from one point to another, including distances, e.g., “Go a half mile to Oak Street, turn left and go about 2 miles...”. They compare the total distances of two routes.

Level	Listening and Speaking	Basic Reading and Writing
Test Benchmark: CASAS scale scores: Reading: 211–220 BEST Plus 2.0: 485 – 524 BEST Literacy: 68-75	Individual can understand learned phrases and short new phrases containing familiar vocabulary spoken slowly and with some repetition; can communicate basic survival needs with some help; can participate in conversation in limited social situations and use new phrases with hesitation; and relies on description and concrete terms. There is inconsistent control of more complex grammar.	Individual can read text on familiar subjects that have a simple and clear underlying structure (e.g., clear main idea, chronological order); can use context to determine meaning; can interpret actions required in specific written directions; can write simple paragraphs with main idea and supporting details on familiar topics (e.g., daily activities, personal issues) by recombining learned vocabulary and structures; and can self and peer edit for spelling and punctuation errors.
	Functional and Workplace Skills	
	Individual can meet basic survival and social needs, can follow some simple oral and written instruction, and has some ability to communicate on the telephone on familiar subjects; can write messages and notes related to basic needs; can complete basic medical forms and job applications; and can handle jobs that involve basic oral instructions and written communication in tasks that can be clarified orally. Individual can work with or learn basic computer software, such as word processing, and can follow simple instructions for using technology.

	IL ABE/ASE Math Standard*	Examples of How Adults Use this Skill
3.OA.3 CCR.OA.C	Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	Estimate and then calculate the cost of a holiday meal.
3.NBT.3 CCR.NBT.C	Use place value understanding to round multi-digit whole numbers to any place.	Round expense items on a budget.
3.NBT.6 CCR.NBT.C	Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Calculate average speed driven on a trip.
3.NBT.12 CCR.NBT.C	Use place value understanding to round decimals to any place.	Round the cost of food items to determine if there is enough cash to buy all of them.
3.NF.3 CCR.NF.C	<p>Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.</p> <ol style="list-style-type: none"> Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions (e.g., by using a visual fraction model). Examples: $3/8 = 1/8 + 1/8 + 1/8$; $3/8 = 1/8 + 2/8$; $2\ 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8$. Add and subtract mixed numbers with like denominators (e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction). <p>Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators (e.g., by using visual fraction models and equations to represent the problem).</p>	Calculate the number of pies left after serving desert.

3.NF.6 CCR.NF.C	Use decimal notation for fractions with denominators 10 or 100. For example, rewrite 0.62 as $\frac{62}{100}$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.	Determine if the deli is accurately filling orders based on customer requests.
3.MD.1 CCR.MD.C	Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb., oz.; l, ml; hr., min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. For example: Know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36).	Follow the growth chart of a baby for one year.
3.MD.2 CCR.MD.C	Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.	Convert temperature from Celsius to Fahrenheit and Fahrenheit to Celsius.
3.MD.3 CCR.MD.C	Apply the area and perimeter formulas for rectangles in real world and mathematical problems. For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.	Determine the area of a garden and the amount of fencing to put around it.
3.G.4	Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).	Graph the daily high temperatures for the month of July.
3.G.5	Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.	Graph each family member's data use on smart phone for one month to determine who and when the most data is used.

Examples of Math and ESL Integration

1. For practice with teamwork and problem-solving, students are grouped and given case study scenarios to work with. Scenarios describe workplace or home problems, e.g., supplies are needed but financial resources are limited. Groups work together to propose solutions, share them with other groups, and come to a class consensus on the best solutions.
2. For a unit on financial literacy, students track their expenses for one week on a chart. They create a personal budget based on their weekly or monthly expenses and income, rounding figures up to the nearest \$5 or \$10. They explain their budget to a partner.
3. For a unit on health, students read articles on nutrition. They track their caloric intake for a weekend and two weekdays by listing all foods/beverages and amounts consumed along with calorie estimates. They chart their daily total calories on a graph.

Examples of Math and ESL Integration

- For a unit on employment, students use www.careeronestop.org to research occupations that interest them and the median annual salaries or hourly wages for those jobs. For their current job or a previous job, they calculate the annual salary from their hourly, weekly or bi-weekly earnings, then compare the salary to the medians shown on the website.

2. For a unit on transportation, small groups are assigned to research and analyze the costs of using a specific type of transportation to go to work (e.g., bus, car), based on case scenarios the teacher supplies or on the real-life situations of some students. Then groups compile the information and analysis and make recommendations for choice of transportation, given factors such as time, cost, safety and distance. Groups present findings using graphics to support their recommendations.

3. Half the class researches the costs of purchasing and making monthly payments on a new car, while the other half researches costs of a used car. Pairs are assigned specific makes and models to research. Pairs share findings with other pairs in their research group. Each group presents its compiled information to the other group orally, using graphics and written text to support its findings.

Sample Lesson Plans

How can the Illinois ESL Content Standards be incorporated into adult ESL classrooms? In addition to using an appropriate standards-based textbook for adult ELLs, teachers often design their own lessons based on the specific needs of their program or students. Teacher-made lessons may expand on a textbook lesson or be developed independently to supplement or substitute for commercially-prepared materials. Teacher-made lessons generally address one or more Content Standards.

On the following pages, a reproducible lesson plan template features the effective ESL lesson phases of Presentation, Practice, Application, Assessment, and Review. Following the template are lesson plans for a variety of language levels and content areas. These sample lesson plans can serve as practical models for teachers wishing to develop their own standards-based lessons. Each lesson plan is correlated to one or more Illinois ESL Content Standard, ELP Standard, or Illinois ABE/ASE Mathematics Standard.

Lesson plans are included for the following content areas:

- Workforce Preparation (*3 sample lessons*)
- English Language Acquisition (*6 sample lessons*)
- Mathematics and ESL (*2 sample lessons*)

The following ESL teachers developed workforce preparation lessons as part of the ALRC online course *Infusing Workforce Preparation at All ESL Levels*. They have generously agreed to share their lessons:

- Rosanne Poppell, Centro Romero
- Beth Duran, YWCA Elgin
- Mary Klinger, Joliet Junior College

The following ESL teachers participated in the field test of the 2007 edition of the Illinois ESL Content Standards and developed the English Language Acquisition lessons. Many thanks for their contribution!

- Kelley Briles, Waubensee Community College
- Elizabeth McNulty, Elgin Community College
- Elizabeth Minicz, William Rainey Harper College
- Jennifer Richardson, Township High School District 214
- Kathy Speers, Asian Human Services

WORKFORCE PREPARATION LESSON PLAN: IDENTIFYING OCCUPATIONS

IL ESL Content Standard(s):	LB.L7 Demonstrate understanding of high-frequency vocabulary in everyday contexts (e.g., health, school, work) LB.S8 Describe simple everyday activities (e.g., working, shopping) LB.R1 Read a variety of personal information words and phrases (e.g., <i>date of birth</i> vs. <i>birthdate</i> , <i>home phone</i> vs. <i>work phone</i>) LB.R5 Read simple sentences on familiar topics (e.g., family, school, work)
ELP Standard(s):	1: Identify a few key words and phrases in oral communications and simple spoken and written texts. 8: Recognize the meaning of a few frequently occurring words, simple phrases, and formulaic expressions in spoken and written texts about familiar topics, experiences, or events
Lesson Outcome:	<u>Students will be able to identify names of common occupations orally and in writing</u>

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <ol style="list-style-type: none"> 1. The teacher shows the class pictures of people engaged in work. Using previously learned structure, the present progressive, and vocabulary, the teacher asks the class, "What is she/he/doing?" to elicit the answer, "He/She is OR (He's/She's) working." 2. The teacher asks individual students, "Do you work?" and students answer yes or no. 3. The teacher introduces the words job and occupation. The teacher explains that people who work have a job or occupation and puts these words on the board. 4. The teacher shows pictures of people doing various occupations (8-12, depending upon the ability and background knowledge of the class). The teacher introduces the names of each occupation. 5. The teacher shows the occupations again, emphasizing the term and the pronunciation. 6. The teacher writes or presents the written form of the occupation name. 7. The teacher briefly describes, along with any elicited class contribution, each occupation. 	<p>Pictures of people engaged in work (showing different occupations)</p> <p>Board and markers/chalk</p> <p>If using actual, non-projected pictures of the occupations, then tape to put pictures on the board and markers/chalk for writing the occupation names.</p>

WORKFORCE PREPARATION LESSON PLAN: IDENTIFYING OCCUPATIONS, continued

<p>PRACTICE</p> <ol style="list-style-type: none"> 1. The teacher puts up the pictures on the board, without the occupation name. The teacher gives students index cards with the occupation names, and the students post them next to the correct pictures. 2. The teacher gives each student a handout, and working in pairs, students write the name of the occupation next to the picture. 	<p>Pictures of people engaged in different occupations</p> <p>Index cards with the occupation names and tape.</p> <p>Handout with the same pictures of people engaged in different occupations</p>
<p>APPLICATION</p> <ol style="list-style-type: none"> 1. The teacher gives each group of 3-5 students a set of cards with the same pictures and occupation names. The students play a memory game, matching the picture with the correct occupation name. The students need to say the name of the occupation when they turn over cards. 2. The teacher gives the students some paper and pencils and asks the students to draw a picture of a job that they would like to have in the future. The teacher posts the pictures around the room. 3. Students stand by their pictures and name the job they want to have to the class. 	<p>One set of cards for each group of 3-5 students. For each set of cards, half the cards have the same pictures of people engaged in different occupations and half have the previously presented occupation names.</p> <p>Paper, colored pencils</p>
<p>ASSESSMENT</p> <p>The teacher shows the students the original pictures, and they name the occupation. Together, they briefly discuss a description of and/or information about the occupation.</p>	<p>Pictures of people engaged in different occupations</p>
<p>REVIEW</p> <p>In the next class, the teacher presents the occupation pictures (both the original occupations and the ones the class drew) and asks students to name them.</p>	<p>Pictures of people engaged in different occupations</p> <p>The pictures students drew of their desired future occupations</p>

WORKFORCE PREPARATION LESSON PLAN: CAREER INTERESTS

IL ESL Content Standard(s):	LI.L4 Identify main idea and some details in a short conversation or listening activity LI.R2 Use titles, headings, and visuals to predict the content of short passages LI.W3 Complete authentic forms (e.g., change of address, job application, library card application)
ELP Standard(s):	1: Identify the main topic in oral presentations and simple spoken and written texts 2: Respond to simple questions and wh- questions

Lesson Outcome: The student will be able to use a career interest website in order to read about and listen to information about a chosen occupation and report about it orally and in writing.

This lesson can be enhanced if it is preceded by lessons on occupation names/categories and career interests. An ESL lesson using a career personality interest inventory is found at the Cambridge Career Pathways website <http://www.cambridge.org/careerpathways/ventures.html> Worksheet 2C, the Career Interest Inventory, contains both a suggested lesson plan and a career interest inventory handout.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <ol style="list-style-type: none"> The teacher asks students to write a list of 5 occupations that are interesting to them. Students should make choices based on their interest, not necessarily on their abilities, job preparation required, or salary. Students can consult a dictionary or picture dictionary for ideas and occupation names. <i>(If the students have previously completed a career personality interest inventory—see box above-- students can put a check mark next to careers that match their career interests.)</i> The teacher shows the students the webpage of “Job Families” from the <i>California Career Zone</i> website and clarifies vocabulary as needed. Students take turns naming one of the occupations on their list and the teacher guides the class in matching the occupation with the correct job family. The teacher demonstrates other important features of the <i>California Career Zone</i> website, emphasizing navigation, the site’s components, and interpretation of the symbols. <i>(If the students have previously completed a career personality interest inventory, the teacher can show the relationship between the site and the career personality inventory and related occupations.)</i> The teacher selects one occupation to use as an example, showing the occupation description page, the associated video clip, and demonstrating use of section headings to guide reading and listening. The teacher demonstrates how to use the Job Research Chart handout and guides the whole class in filling out the Example boxes using the occupation in step 3, above. 	<p>Pictures of people engaged in different jobs previously used in class, from a picture dictionary, textbook or other source.</p> <p>www.cacareerzone.org/</p> <p>Handout: Job Research Chart</p>

WORKFORCE PREPARATION LESSON PLAN: CAREER INTERESTS, continued

<p>PRACTICE</p> <p>The teacher asks students to choose 2 occupations from their lists and watch any associated videos. Students fill in the Job Research Chart for these 2 occupations. The teacher circulates and assists as needed.</p>	<p>www.cacareerzone.org/</p> <p>Handout: Job Research Chart</p>
<p>APPLICATION</p> <ol style="list-style-type: none"> 1. The teacher asks each student to interview 3 classmates about one of the occupations that they investigated and to fill in their classmates' information on their Classmate Interview Charts. 2. As homework, students create an account on the website and complete the interest and/or skills inventory in order to find information about other possible occupations. Students choose one more occupation to research. 	<p>Handout: Classmate Interview Chart</p> <p>www.cacareerzone.org/</p>
<p>ASSESSMENT</p> <p>The teacher collects and reviews the Job Research Charts that the students filled in during the Practice.</p>	<p>Handout: Job Research Chart</p>
<p>REVIEW</p> <p>The next class, students do an oral presentation to the class on one of their occupations. If they have completed the homework assignment, they can present the new occupation they researched for homework. If not, they can present one of the occupations they researched in the previous class.</p>	<p>Handout: Job Research Chart</p>

WORKFORCE PREPARATION LESSON PLAN: BUILDING A RESUME

IL ESL Content Standard(s):	HI.W5 Prepare a simple resume using a model HI.S1 Participate in face-to-face and phone conversations in familiar contexts (e.g., employment, housing)
ELP Standard(s):	2: Participate in conversations, discussions, and written exchanges about familiar topics, texts, and issues 3: Compose written informational texts about familiar texts, topics, or events

Lesson Outcome: Students will be able to use important terms associated with resume creation and identify parts of a resume.

Note: The terms presented below are based upon a free resource, *Cambridge's Career Pathways Building a Resume Activity and Template*. It can be found by going to <http://www.cambridge.org/careerpathways/> and then selecting Lesson Plan and Activity Worksheet 6C, *Building a Resume*. However, if your school or organization has or works with a career or job placement center and/or job placement counselors, they may suggest other resume templates and/or resume builders. Consider adapting the vocabulary, templates, and activities provided below to fit the wording and format for those documents.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <ol style="list-style-type: none"> As a warm-up, introductory activity, the teacher asks students to form groups of 3-6 and asks them to participate in a Conversation Circle about work-related questions (written on a handout or the board) such as: <ul style="list-style-type: none"> <i>Are you working now?</i> <i>Are you looking for a job now?</i> <i>What was your first job?</i> <i>What kind of job would you like to have?</i> <i>What did you study previously?</i> <i>What schools did you go to before this one?</i> <i>What is something that you can do well?</i> The teacher asks if any student has used a resume previously and elicits student contributions about their knowledge of it. The teacher provides information about its function in US job searching, as needed. The teacher presents and explains key terms found in resumes, e.g., <i>experience, responsibilities, skills</i>. The teacher guides students through reading and understanding a simple sample resume that uses the terms presented and the template that will be used later. 	<p>Handout or list of Work-Related Conversation Questions, using vocabulary and content previously practiced in class</p> <p>Cambridge's Career Pathways Building a Resume Activity and Template http://www.cambridge.org/careerpathways/ Lesson Plan and Activity Worksheet 6C, <i>Building a Resume</i>.</p> <p>Sample completed resume</p>

WORKFORCE PREPARATION LESSON PLAN: BUILDING A RESUME, continued

<p>PRACTICE</p> <ol style="list-style-type: none"> 1. The teacher and class read a case study describing a person’s work history, education, and personal information in paragraph form. The teacher introduces the resume template and guides the whole class in transferring the information from the case study to the correct place on the template. 2. The teacher distributes a new case study written in paragraph form. Student pairs or small groups work to read the case study together. Then they transfer relevant information onto a blank resume template similar (but not identical—the key headings and terms should be the same, but in a slightly different layout). Pairs (or groups) compare their completed resumes. 	<p>Two case studies describing employment history, dates, skills, etc., written in paragraph form.</p> <p>Handouts of two blank resume templates</p>
<p>APPLICATION</p> <ol style="list-style-type: none"> 1. Students fill in their own information on the Building a Resume Activity and Template http://www.cambridge.org/careerpathways/, Lesson Plan and Activity Worksheet 6C, <i>Building a Resume</i>. 2. Students explain their resume to a partner and ask each other questions about their education, employment history, and skills. 	<p>Resume template from Building a Resume Activity and Template http://www.cambridge.org/careerpathways/, Lesson Plan and Activity Worksheet 6C, <i>Building a Resume</i>.</p>
<p>ASSESSMENT</p> <p>The teacher gives each student a sample resume that contains errors and some correct given information about the person described in the sample resume. The teacher asks the students to find and correct the errors.</p> <p>The teacher will check students’ papers to make sure that they are finding and correcting the resume accurately.</p>	<p>Handout of a different sample resume containing errors together with a handout of given information that should be found on that sample</p>
<p>REVIEW</p> <p>After the students complete their resume template, the teacher will check it in preparation for the next step, having the students use a computer to create their resume and then sending an electronic copy of the resume to the teacher.</p>	

ESL LESSON PLAN: FOLLOWING CLASSROOM INSTRUCTIONS

IL ESL Content Standard(s): BL.L5 Follow simple oral classroom instructions
 ELP Standard(s): 1: Identify a few key words and phrases in oral communications and simple spoken and written texts
 2: Actively listen to others

Lesson Outcome: Students will be able to follow these simple oral instructions: *Stand up, Sit down, Open your book, Write your name.*

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>The students listen as the teacher demonstrates each of these actions several times while saying the command:</p> <p style="padding-left: 40px;">Stand up. Sit down. Open your book. Write your name.</p>	<p>Chairs, books, pencils, paper</p>
<p>PRACTICE</p> <p>Teacher-led Total Physical Response (TPR) activity:</p> <p>The teacher gives each oral instruction and the students demonstrate each action. First, the whole class responds, and then individual students respond.</p> <p>Student-led TPR activity:</p> <p>The students take turns giving the oral instructions to the whole class. Then the students work in pairs, giving and responding to the commands.</p>	<p>Chairs, books, pencils, paper</p>

ESL LESSON PLAN: FOLLOWING CLASSROOM INSTRUCTIONS, Continued

LESSON PHASE and STRATEGIES	MATERIALS
<p>APPLICATION</p> <p>Charades: The students take turns performing the actions for the whole class while the others name the command that is being demonstrated.</p>	Chairs, books, pencils, paper
<p>ASSESSMENT</p> <p>Comprehension of the commands is checked through use of color-coded yes / no cards. The teacher performs an action while saying a command. If the command and action match, the students hold up “yes” cards. If not, they hold up “no” cards.</p>	Color-coded yes / no cards (for example, “yes” cards may be pink, and “no” cards blue)
<p>REVIEW</p> <p>At the next session, the teacher leads the class in a brief review of the instructions, followed by a “Simon Says” game using the commands.</p> <p>Example: “Open your books.” (The students do not open books.) “Simon says open your books.” (The students open books.)</p> <p>The students then take turns leading the review activity.</p>	Chairs, books, pencils, paper

ESL LESSON PLAN: READING FABRIC CARE LABELS

IL ESL Content Standard(s):	BL.L6 Demonstrate understanding of basic life skills vocabulary BL.S8 Ask and respond to simple questions using basic life skills vocabulary BL.R8 Interpret simple symbols
ELP Standard(s):	1: Identify a few key words and phrases in oral communications and simple spoken and written texts 2: Actively listen to others

Lesson Outcome: Students will be able to read and interpret fabric care symbols on clothing.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>The teacher holds up a garment and points to the care label. She asks the students, "What is this?" She acknowledges or provides the word "label," says it several times, writes it on the board, and has the students repeat it several times.</p> <p>Pointing to the labels on several articles of clothing, the teacher elicits the word "label" again.</p> <p>The teacher shows pictures of a washing machine and dryer and elicits or provides the names. She then points to jugs of laundry detergent and chlorine bleach, a box of non-chlorine bleach, and an iron, and asks students to identify them as well.</p> <p>The teacher writes the words on the board, points to them, and has the students repeat the words in order and then at random.</p>	<p>A variety of articles of clothing, preferably one per student (clothing items must have fabric care labels with symbols, not just words)</p> <p>Photos of a washing machine and a dryer</p> <p>Realia: detergent and bleach containers, an iron</p> <p>Blackboard or flip chart</p>
<p>PRACTICE</p> <p>Using handouts with fabric care symbols, the class reads them together. The teacher then shows the students fabric care symbol cards at random and has them provide the words. She then shows the word cards and has the students read the words.</p>	<p>Fabric care handouts</p> <p>Fabric care symbol cards and corresponding word cards</p> <p><i>Note: Fabric care symbols can be found on the Internet at www.cleaning101.com</i></p>

ESL LESSON PLAN: READING FABRIC CARE LABELS, Continued

LESSON PHASE and STRATEGIES	MATERIALS
<p>APPLICATION</p> <p>The students work in pairs. Each pair has an article of clothing and a chart to complete. When all the pairs have filled in the information for their first article of clothing, they pass the garment to the pair on the right so that each pair now has a new article of clothing. The class continues to work until they have completed at least three articles of clothing.</p>	<p>Chart (attached)</p> <p>Articles of clothing</p>
<p>ASSESSMENT</p> <p>The students match fabric care symbols and words on a handout.</p>	<p>Matching exercise handout</p>
<p>REVIEW</p> <p>At the next class session, the teacher distributes either a symbol card or a word card to each student. The students circulate and find their matching cards. Each pair then tapes their cards to the board. The rest of the class decides if the matched cards are correct.</p>	<p>Fabric care symbol cards and corresponding word cards</p> <p>Tape</p>

ESL LESSON PLAN: MAKING AN EMERGENCY CALL

IL ESL Content Standard(s): LI.L2 Respond to short phone conversations related to immediate needs
LI.S3 Participate in short phone conversations related to immediate needs

ELP Standard(s): 2: Participate in short conversations and written exchanges about familiar topics and texts

Lesson Outcome: Students will be able to make telephone calls to report an emergency.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>Using pictures, the teacher introduces the vocabulary in the dialogue (e.g., natural gas, hot water heater, gas leak, odor).</p> <p>The teacher models the dialogue.</p>	<p>Vocabulary pictures (attached)</p> <p>Handout of dialogue about reporting a smell of natural gas in the basement (attached)</p>
<p>PRACTICE</p> <p>Using the dialogue handout, the whole class reads the dialogue aloud after the teacher. Then half the class reads the part of the operator while the other half is Reema. They then switch roles.</p> <p>The students then practice the dialogue in pairs, substituting their own names and addresses in the dialogue.</p>	

ESL LESSON PLAN: MAKING AN EMERGENCY CALL, Continued

LESSON PHASE and STRATEGIES	MATERIALS
<p>APPLICATION</p> <p>Each pair of students is given an “Emergency Card” that presents an emergency situation. The students work together to write a dialogue for that situation. They practice and then present their dialogues to the class.</p>	<p>Index cards with different emergency situations written on them (e.g., fire, burglary)</p>
<p>ASSESSMENT</p> <p>The teacher circulates and monitors the students as they develop their dialogues, helping as needed.</p> <p>When the pairs present their dialogues to the class, the teacher notes recurring problems in the areas of vocabulary, pronunciation, and grammar for use in future lessons.</p>	
<p>REVIEW</p> <p>The teacher brings several copies of the local newspaper and asks the students to work in groups to find articles about emergency situations. The class discusses the articles and reviews emergency vocabulary.</p>

A Gas Leak

Reema Patel smells natural gas around the water heater in her basement. She calls the emergency number for the gas company.

Operator: Hello. Gas Company emergency service.

Reema: Hello. I need help. I smell gas near my hot water heater.

Operator: You might have a gas leak. We will send someone out to check it. What's your address?

Reema: I'm at 5683 Golf Road.

Operator: Please give me your name.

Reema: Reema Patel. Should I do anything now?

Operator: Yes. Open all of your windows. If the odor is strong, you should leave the house.

Reema: OK. I'll do that. When will somebody be here?

Operator: Within an hour.

Reema: Thank you. Goodbye.

ESL LESSON PLAN: WRITING ABOUT WEEKLY ACTIVITIES

IL ESL Content Standard(s): LI.W1 Write short paragraphs on familiar topics (e.g., family or neighborhood)
LI.W2 Apply capitalization and punctuation rules (e.g., commas in series, apostrophe)

ELP Standard(s): 3: Compose simple written narratives or informational texts about familiar texts, topics, or events
10: Use frequently occurring verbs, nouns, adjectives, adverbs, prepositions, and conjunctions

Lesson Outcome: Students will be able to write three paragraphs describing the activities of their families during a typical week.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>The teacher asks the students to talk about their weekly activities and those of their families.</p> <p>The teacher shows a sample chart with three column headings:</p> <ol style="list-style-type: none"> 1) What do you do during the week? 2) What do your friends or family do during the week? 3) What do you do together? <p>The teacher provides a model by writing sentences about herself and her family in the appropriate columns.</p>	<p>Sample Chart: "What do you do during the week?" with three completed columns (attached)</p>
<p>PRACTICE</p> <p>The teacher gives the students a handout duplicating the sample chart and asks them to write four or five sentences in each of the three columns. She writes items for special attention on the board:</p> <ul style="list-style-type: none"> • capital letters and periods • subject and verb in each sentence • spelling <p>After the students have written their sentences, the teacher has them trade papers with partners. On the board, the teacher writes several sentences with errors in the categories above and asks the students to identify the errors on the board and then circle them. The teacher asks the students to do the same on their partners' papers. She reminds them to circle, not correct, the errors and return them to their partners. The partners discuss their mistakes and make corrections on their own papers.</p> <p>The teacher collects the papers and returns them with any corrections that are appropriate. She discusses common errors with the class. (e.g., <i>My son and I on Saturday go to the park.</i>)</p>	<p>Handout: "What do you do during the week?" with three empty columns (attached)</p>

ESL LESSON PLAN: WRITING ABOUT WEEKLY ACTIVITIES, Continued

LESSON PHASE and STRATEGIES	MATERIALS
<p>APPLICATION</p> <p>The teacher shows the students examples of how the sentences can be arranged in three paragraphs. She points out, writes on the board, and discusses indentation, capital letters and periods, subjects and verbs, and spelling.</p> <p>The teacher asks the students to write three paragraphs using the information they recorded on the “What do you do during the week?” handout. ESL LESSON PLAN: WRITING ABOUT WEEKLY ACTIVITIES, Continued**Paragraph Examples***Our Busy Week*

Everybody in my family is busy during the week.

I work from 9:30 to 2:00 on Monday, Tuesday,

Thursday, and Friday. I work from 9:15 to 11:45 on

Wednesday. After work I go shopping. Then I make

dinner. I plan English lessons in the evening.

Sometimes I watch TV.

I have three daughters. One daughter is

married and lives in Chicago. My other daughters

live at home. They go to school and work part time.

My husband works at home in his office. He uses the

computer a lot.

My husband, my daughters, and I eat dinner

together during the week. We don't eat dinner

together on the weekends because my daughters go

out with their boyfriends. We eat breakfast together

on Sunday, and we go to church.

ESL LESSON PLAN: RESPONDING TO GOOD & BAD NEWS

IL ESL Content Standard(s):	HI.L5 Respond appropriately to small talk in everyday situations (e.g., <i>How's it going? Thank God it's Friday.</i>)
ELP Standard(s):	HI.S2 Participate in social conversations (e.g., discussing vacation plans, making small talk at work) 2: Participate in conversations, discussions, and written exchanges about familiar topics, texts, and issues 7: Adapt language choices to task and audience with emerging control in various social and academic contexts

Lesson Outcome: Students will be able to respond appropriately to small talk related to reporting bad news or good news.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>The teacher writes “How are you?” or “How are you doing?” on the board and begins the class by having the students report how they typically respond to these questions.</p> <p>Then she distributes slips of paper, each with a brief response, such as “great,” “super,” “awful,” “so-so.” The students write the responses on the board under the appropriate heading: “Very Good,” “OK,” or “Bad.” The class goes over the lists to see if everyone agrees with the answers.</p> <p>Next, the teacher puts sample dialogues on the board:</p> <p>A: Hi. How are you? B: Not too good. A: What's the matter? B: My child is sick. He vomited all day yesterday. A: I'm sorry to hear that.</p> <p>A: Hi. How are you doing? B: Terrific. I just got a new job. A: Congratulations. That's wonderful.</p> <p>The teacher models and discusses the dialogues. She gives the students a handout with expressions for responding to good news and bad news. They practice them as a class.</p>	<p>Handout with 15-20 brief responses, including some from each category: “Very Good,” “OK,” and “Bad”</p> <p>Blackboard or flip chart and marker</p> <p>Handout with responses to good news and bad news, including five to seven expressions for each type of news (attached)</p>

<p>PRACTICE</p> <p>The teacher gives each student one or more situation strips. They read and practice them with partners. The partners use appropriate good news / bad news responses. The teacher encourages the students to role play, rather than merely read from their strips.</p>	<p>Situation strips with good and bad news (attached)</p>
<p>APPLICATION</p> <p>The teacher gives each student one situation strip and asks the students to walk around the room, finding and changing partners until they have talked to a half dozen or so classmates. In each encounter, they role play two short conversations, giving and responding to good or bad news. After each exchange, students trade strips and find new partners.</p>	<p>Additional situation strips</p>
<p>ASSESSMENT</p> <p>The teacher listens as the students interact with each other, noting any problems with word choice, grammar, or pronunciation for later attention.</p>	
<p>REVIEW</p> <p>The teacher reviews any problem areas with the class. Regular ongoing review can take the form of encouraging students to share any good or bad news in their lives with their classmates at each class session.</p>

IL ESL Content Standard(s): AE.S5 Present short speeches or oral reports
 ELP Standard(s): 2: Clearly support points with specific and relevant evidence
 7: Adapt language choices and style according to purpose, task, and audience in various social and academic contexts; adopt and maintain a formal and informal style and tone in spoken and written texts, as appropriate.
 9: Introduce and develop an informational topic with facts, details, and evidence

:

Lesson Outcome: Students will be able to give short, informal speeches about themselves.

LESSON PHASE and STRATEGIES	MATERIALS
<p>PRESENTATION</p> <p>The teacher models an informal “paper bag speech” in which she shows and describes five or six items that represent her and her interests.</p> <p>The class discusses what makes a good presentation. The teacher demonstrates some desirable features of presentations (appropriate eye contact, appropriate rate of speech) and some undesirable features (fidgeting, very rapid delivery).</p> <p>The teacher hands out an evaluation rubric and discusses it with the class.</p>	<p>Paper bag containing five or six objects that represent the teacher, her interests, her experiences, or things that are important to her (e.g., photos, souvenirs, or documents)</p> <p>Oral presentation evaluation rubric (attached)</p>
<p>PRACTICE</p> <p>Working in pairs, the students identify the five or six items they will bring to the next class session for their paper bag speeches. They discuss the items and why they have chosen them. With their partners, the students practice sentences they will use in their presentations. The partners ask questions and comment on any vocabulary or grammar errors they notice.</p>	
<p>APPLICATION</p> <p>At the next class session, each student gives a two- to three-minute speech in front of the class.</p>	<p>Paper bag and five to six items brought from home by each student</p>

About the ELP Standards for Adult Education⁸

Background

The English Language Proficiency (ELP) Standards for Adult Education are intended to address the urgent need for educational equity, access, and rigor for adult English language learners (ELLs). States are adopting challenging academic content standards for adult education with the goal of ensuring that adult learners are adequately prepared for careers and postsecondary education. This trend is in response to the WIOA mandate that requires states to align content standards for adult education with state-adopted challenging academic content standards.

The ELP Standards continue the U.S. Department of Education Office of Career, Technical, and Adult Education's (OCTAE) investment in standards-based education reform. OCTAE has supported state efforts to develop academic content standards for adult education for more than a decade. This investment has included such initiatives as *the Standards-in-Action: Innovations for Standards-Based Education, Promoting CCR Standards in Adult Basic Education, and Implementing CCR Standards in Adult Education*. The development of the ELP Standards for AE was rooted in the history of these initiatives and in OCTAE's vision of ensuring that all learners have access to the highest quality instruction.

Where the Standards Came From

A panel of experts adapted a set of existing evidence-based K–12 ELP standards as the basis of the ELP standards. The project team chose the ELPA21 K–12 ELP Standards⁹ as the starting point for the selection of the ELP Standards. Panelists drew on both their individual expertise and a set of guiding principles throughout the standards selection process.

Guiding Principles for the ELP Standards

The ten guiding principles that informed the ELP Standards development process were intended to ensure that the standards will help adult educators recognize both the strengths and needs of adult ELLs. The principles represent foundational understandings about adult ELLs and English language teaching. The guiding principles are:

1. Adult ELLs have the potential to meet state-adopted challenging academic standards.
2. Adult ELLs represent a diverse population of learners.
3. Adult ELLs' funds of knowledge are a resource for their learning.
4. Social language has an important role in ELLs' English language acquisition process.
5. Three key instructional advances form the basis of state-adopted content standards for English language arts and literacy in AE that ELLs must access.

6. Adult ELLs must be able to successfully engage with a wide variety of informational texts.
7. Scaffolding is essential to facilitate ELLs' acquisition of language and academic content.
8. ELLs with disabilities have specific instructional needs.
9. Multimedia technology aligned to the ELP Standards for AE should be integrated into instruction.
10. Academic language instruction should be incorporated into all content lessons, including mathematics and science.

1. Adult ELLs have the potential to meet state-adopted challenging academic standards.

ELLs have the same potential as native English speakers to engage in the cognitively complex tasks required by state-adopted challenging content standards (Wong Fillmore, 2014). All adult ELLs should therefore be working toward the same college and career readiness goals as students in other adult education classes. To acquire the knowledge and language skills required to meet these goals, ELLs need access to challenging, level-appropriate curriculum and materials. They also need extensive exposure to authentic language and meaningful opportunities to practice language (Parrish, 2004). The level descriptors for each ELP Standard for AE describe the language knowledge and skills that ELLs of varying proficiency levels should practice to engage with standards-based content.

2. Adult ELLs represent a diverse population of learners.

Adult ELLs show great diversity in their individual capacity to acquire language. The appropriate language acquisition path and level of support needed to reach the goal of college and career readiness varies by ELL student. A number of factors may affect an ELL's language development. These factors include native language literacy, exposure to the English language, quality of instruction, and motivation, among others (Bailey & Heritage, 2010). It is expected that adult education students will acquire language at different rates and require different types of support.

Adult learners can apply both their informal and formal educational experiences to the task of learning English. For example, adult ELLs who are literate in their native language have the ability to transfer their literacy and learning strategies to their acquisition of English (Parrish, 2004).

Adult ELLs whose education has been interrupted may have a wealth of experiences and oral skills in their native language, but they may have limited literacy in their native language. Limited native language literacy may affect their English language development. If adults do not have the opportunity to develop their basic literacy and language skills, they cannot meet the entry requirements for college. Nor can they be successful in any postsecondary education or workplace setting that requires proficiency in English. The foundations of reading are a critical component of educating adult ELLs who have lower-level literacy skills in their native language(s).

3. Adult ELLs' funds of knowledge are a resource for their learning.

Adult ELLs have a rich reservoir of social, linguistic, and cultural experiences from which they can draw as they learn English. These funds of knowledge can be invaluable in supporting their language development and linguistic competency (Moll, Amanti, Neff, & González, 1992). It is important to recognize, value, and build on the social, cultural, and linguistic backgrounds of students to maximize the benefit of these resources (González, Moll, & Amanti, 2005). Understanding your students' individual identities can play a role in planning, instruction, and assessment (TESOL, 2008). For example, provide students with opportunities to learn new skills and information by connecting instruction to their lives outside the classroom (Condelli & Wrigley, 2008). As ELLs construct meaning from oral presentations and text (ELP Standard 1) and analyze and critique the arguments of others (ELP Standard 6), support their learning by drawing on their reservoir of social, linguistic, and cultural experiences. Provide opportunities for your ELLs to practice how to use knowledge of their native language when determining the meaning of unfamiliar words and phrases in English (ELP Standard 8).

4. Social language has an important role in ELLs' English language acquisition process.

The ELP Standards strongly emphasize the academic language needed by ELLs to engage with and meet state-adopted content standards. However, in addition to academic language, adult ELLs need to develop social language in order to meet family, social, civic, and community needs and responsibilities. Additionally, informal social conversations and writing are part of a continuum that will support students in moving toward participation in academic discussions and formal presentations (Zwiers, 2008). ELP Standards 2 and 7 provide guidance on how to help ELLs acquire both academic language and social language.

5. Three key instructional advances form the basis of state-adopted content standards for English language arts and literacy in AE that ELLs must access.

The three advances in instruction prompted by the CCR standards are:

- regular practice with complex text and its academic language
- reading, writing, and speaking grounded in evidence from text (both literary and informational)
- building knowledge through content-rich nonfiction (Pimentel, 2013; Student Achievement Partners, 2012).

Instruction grounded in these advances may be seen as challenging for ELLs who may not share the content knowledge that texts assume or that may come from a culture of teacher-centered learning (Parrish, 2015). With the appropriate scaffolding and support, however, ELLs can meet the demands of instruction framed by these instructional advances.

6. Adult ELLs must be able to successfully engage with a wide variety of informational texts.

One of the three key instructional advances, described above, is a move toward building students' knowledge through content-rich nonfiction. Informational texts make up the vast majority of readings that students will encounter in college and the workplace (Pimentel, 2013). To be successful in postsecondary education and career training, adult ELLs will need to understand and analyze different forms of complex, nonfiction texts. In a workplace environment, for example, ELLs may need to read

charts, forms, and training instructions (Parrish, 2015; Parrish & Johnson, 2010). ELLs should be exposed to a variety of informational texts related to the workplace, citizenship, and college readiness. ELP Standards 1 and 3s focus on supporting ELLs' engagement with informational texts.

7. Scaffolding is essential to facilitate ELLs' acquisition of language and academic content.

Scaffolding is defined as temporary assistance that an instructor or more capable peer provides to a student that supports the student in being able to perform a task he or she could not do without help. The goal of scaffolding is to enable a student to independently complete a similar task in the future (National Governors Association for Best Practices, CCSSO, 2010). Effective instruction of ELLs requires scaffolding; it facilitates ELLs' construction of meaning and knowledge, acquisition of language, and advancement to the next level of language proficiency. The ELP Standards for AE do not include specific recommendations for scaffolding. However, the standards do reference using supports at lower levels of language proficiency, supports that can be gradually removed at higher levels of proficiency.

The chart on the next page provides recommendations for the types of supports and scaffolds that teachers use to help ELLs of varying language proficiency levels engage in instructional tasks.

Supports and Scaffolding Recommendations by Level¹⁰

	Beginning ESL Levels	Intermediate and Advanced ESL Levels
Teacher Language and Teacher–Student Exchanges	<ul style="list-style-type: none"> • Give wait time • Use contextualized language about concrete topics • Repeat, paraphrase, model, and gesture • Give one-step directions • Use native language as appropriate • Have students demonstrate understanding by pointing or gesturing • Concentrate on meaning rather than correctness 	<ul style="list-style-type: none"> • Give wait time • Use contextualized language about concrete and abstract topics • Repeat, paraphrase, and model • Use think alouds to model process and language • Concentrate on meaning rather than correctness

8. ELLs with disabilities have specific instructional needs.

Educators working with ELLs must first determine whether a student’s struggle is caused by a disability rather than linguistic and cultural differences (Hamayan, Marier, Sánchez-López, & Damico, 2013).

¹⁰Adapted from WIDA Consortium. (n.d.). *WIDA support examples across levels*.

<https://lincwellell.wikispaces.com/file/view/WiDA+Support++Examples+Across+Levels.pdf>

Adults with documented disabilities should receive accommodations that permit their full participation in instruction and assessment. This may require more varied types of instructional supports, such as in the chart above.

9. Multimedia technology aligned to the ELP Standards for AE should be integrated into instruction.

Advances in information and communications technology have changed the definition of literacy to include visual and digital literacies (International Reading Association, 2009). Visual and digital literacies incorporate knowledge of 21st century technologies such as video, online communities, search engines, web pages, and more. These new technologies require new literacy skills and practices. Specifically, appropriate multimedia tools and technologies aligned to the ELP Standards for AE are needed. Integrating multimedia tools and technologies into your design of curriculum, instruction, and assessment will help your students be college and career ready. ELP Standards 3 and 5 offer guidance for how multimedia technology may be incorporated into ELL curriculum, instruction, and assessment.

10. Academic language instruction should be incorporated into all content lessons, including mathematics and science.

English language acquisition instruction has been viewed as the responsibility of the English language acquisition teacher. However, state-adopted academic content standards include explicit expectations for how language should be used to demonstrate content knowledge and skills (Stanford University, Understanding Language Initiative, 2013). As a result, content teachers should incorporate academic vocabulary and language use relevant to their content area into their instruction.

Integrating Mathematics and ESL Instruction

There are several aspects of math instruction to consider when deciding how to effectively integrate math into the ESL curriculum. While the primary focus of ESL instruction is English language acquisition, there are topics that naturally lend themselves to math skills and concepts used in daily life and in the workplace. When teaching these topics, it is helpful to consider the factors below.

Cultural Differences in Mathematics

Mathematics is often called a “universal language,” but there may be differences in how persons from other countries read and write numbers and perform basic operations. ELLs may experience difficulty in the notations, symbols, and procedures of mathematics in the U.S. compared with their country of origin. When instructors are aware of potential cultural differences in math, they can appreciate why their students may be struggling and develop more effective lessons.

Notations and Symbols

The written notations and symbols used to represent numbers are not universal. For example, several countries use a crosshatch in the number 7 to distinguish it from the number 1. The numbers 2, 4, and 9 can also be written in such a way that they may be misinterpreted by teachers in the U.S.

Other differences include:

- Large numbers separated by dots or spaces instead of commas (*see chart below*)
- Comma used in place of a decimal point to separate whole number from decimal part (*see chart below*)
- Large numbers read differently – millions, billions, and trillions
- Negative numbers, angles, multiplication, and division symbols written differently

Number Style	Countries
12,345,678.89	U.S., Canada, Korea, Philippines
12 345 678.89	China, Sri Lanka, Latin American Countries
12.345.678,89	Argentina, Brazil, Spain, Portugal

Procedures

The standard algorithms (procedures) for the four basic operations of addition, subtraction, multiplication, and division are often taught and used differently in other countries. While ESL instructors do not need to know all of the different ways that students from other cultures approach a problem, they do need to know that there is always more than one way to solve a problem.

Using different strategies to solve math problems is encouraged by the CCR Standards, so it is advantageous for ESL instructors to be aware of some of the different strategies. Additional information about the differences in algorithms can be found at the following:

http://www.csus.edu/indiv/o/oreyd/ACP.htm_files/TODOS.operation.description.pdf

Developing Effective Lessons

At the program level, there are several ways to include math in ESL instruction. Here are three options:

1. Offer separate math classes to ELLs based on their math ability
2. Adopt a separate math curriculum to be used for a set period of time during each ESL class
3. Integrate math content into thematic units of instruction that are already part of the ESL curriculum

The Illinois ESL Content Standards reflect Option 3. The standards provide correlations between applicable Illinois ABE/ASE Mathematics Content Standards and the Illinois ESL Content Standards, as well as provide examples of math and ESL integration activities in the classroom. This approach builds on the language and content that is already being taught at a particular level.

Thematic Units of Instruction

Many ESL textbooks include references to math in units on money, shopping, budgeting, and others. Relevant math standards can be incorporated into those units. For example, in a unit on transportation, a lesson on reading a train schedule can include calculating how much time is needed to get to the train station, time of departure, arrival at the destination, and elapsed time sitting on the train. In a unit on shopping, prices can be estimated and then compared to the actual price. Discounts can be calculated and change can be determined based on the amount given to pay for the purchase.

Section 4 contains two sample lesson plans at different ESL levels that integrate math and ESL standards.

Mathematics Skills

ESL instructors may need to refresh their math skills. To understand how math instruction is currently taught in the K-12 system, these videos are a good start:

Learner Levels and Differentiated Instruction

ELLs' prior educational experiences will impact their math level and the rate at which they are able to acquire new math skills. Students with little formal education in their home country may struggle with basic math, while those with high levels of prior education may be highly skilled in math. In addition, ELLs are typically placed in ESL classes based on their English language level rather than on their math level.

For these reasons, the levels of math skills in a given classroom will likely vary significantly. As their math abilities become evident, differentiation in math activities may be appropriate so that all students have an opportunity to learn. Instructors may find it necessary to group students by ability and tailor the math to different levels of complexity and skill.

Vocabulary Development

ELLs need to learn vocabulary that pertains to math. In addition to academic mathematics vocabulary (e.g., *denominator*, *trapezoid*, and *rhombus*) there are many common words that have a different meaning in a math context (e.g., *table*, *mean*, and *product*.) It is important to teach these words so ELLs acquire the vocabulary of math.

Concrete to Abstract

Math concepts, like language, should begin with real-life scenarios. Money is a good place to start since students need to know the money system in the U.S. and using real coins and currency is tangible (concrete.). Teaching about U.S. currency could start with real coins; students can learn the names, the amount of each coin, how to add them together, and trade for larger coins. The next step would be visual representations or pictures of coins and currency that students would look at and do the same types of activities as in the concrete stage. Finally, money would become abstract by reading and solving problems using only the words and symbols to denote the amounts of the coins and currency.

Instructional Grouping

Effective math lessons should go beyond teacher-led instruction followed by worksheets with problems. Students should be given opportunities to work in small groups, in pairs, and on their own to discover math, not just repeat a procedure that was demonstrated by the instructor. Working with others facilitates language acquisition in addition to math skills.

Show What They Know

It is important for learners to “show what they know” not only by solving problems and coming up with the right answer, but also to explain their reasoning and strategies used to solve a problem. This is best done through math discussions with partners, in groups, or with the whole class. Allowing learners to explain how they solved a problem gives them the opportunity to practice the language of math and solidify concepts learned.

The following pages show the **IL ABE/ASE Mathematics Content Standards for ESL** in sequential order by level. This sequential list is designed to assist programs with curriculum development and to help instructors with lesson planning, particularly in the case of multilevel classrooms where ELLs have differences in math ability and/or varied levels of prior math education.

Beginning ESL Literacy (BL)

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard*	Examples of How Adults Use this Skill
1.CC.1	Count to 100 by ones and by tens.	Count money. Count boxes of supplies at work.
1.CC.5	Count to answer “how many?” questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.	Count how many pennies, dimes, \$1 bills in the cash drawer. Count out silverware for each place setting.
1.CC.7	Compare two numbers between 1 and 10 presented as written numerals.	Compare number of milk gallons on hand with number needed for breakfast service.
1.OA.2	Solve addition and subtraction word problems, and add and subtract within 10 (e.g., by using objects or drawings to represent the problem).	Count cleaning supplies to place order needed for the next week. Determine how many customers were served between 10 am and noon.
1.OA.4	For any number from 1 to 9, find the number that makes 10 when added to the given number (e.g., by using objects or drawings), and record the answer with a drawing or equation.	Make change from \$10. Count baking supplies to determine if there are 10 of each spice needed for one month.
1.MD.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.	Measure the height and weight of each patient you check in.
1.MD.6	Tell and write time in hours and half-hours using analog and digital clocks.	Determine what bus to catch to get to work on time.

Low Beginning ESL (LB)

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard *	Examples of How Adults Use this Skill
1.OA.9 CCR.OA.A	Understand subtraction as an unknown-addend problem. For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8.	Making change. Determining how many years lived in a specific place.
1.OA.11 CCR.OA.A	Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and reading equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).	Pay for \$14 of groceries with a \$10 bill and four \$1 bills. Calculate the number of dogs walked during the day.
1.NBT.2 CCR.NBT.A	Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: <ul style="list-style-type: none"> a. 10 can be thought of as a bundle of ten ones—called a “ten.” b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones).	Count 10 cookies to put on each tray and the number left after all trays are filled.
1.MD.5 CCR.MD.A	Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. <i>Limit to contexts where the object being measured is spanned by a whole number of length units with no gaps or overlaps.</i>	Measure the length and width of a yard to determine how much fencing is needed.

High Beginning ESL (HB)

IL ABE/ASE Mathematics Content Standards for ESL

	IL ABE/ASE Math Standard*	Examples of How Adults Use this Skill
1.OA.8 CCR.OA.A	Apply properties of operations as strategies to add and subtract. Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known (commutative property of addition). To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$ (associative property of addition). Students need not use formal terms for these properties.	Add the number of hours in school each week.
1.OA.12 CCR.OA.A	Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$	Exchange large denominations of currency for smaller bills.
1.OA.13 CCR.OA.A	Determine the unknown whole number in an addition or subtraction equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = ? - 3$, $6 + 6 = ?$.	Determine quantity of office supplies to order for the month.
1.NBT.3 CCR.NBT.A	Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$.	Compare number of servings made from different recipes. Decide which recipes to make and make a grocery list of ingredients needed.
1.MD.7 CCR.MD.A	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	Understanding a child's growth chart.
1.G.9	Partition circles and rectangles into two and four equal shares, describe the shares using the words halves, fourths, and quarters, and use the phrases half of, fourth of, and quarter of. Describe the whole as two of or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.	Cut pizzas, pies, cakes, into equal size pieces.

	IL ABE/ASE Math Standard *	Examples of How Adults Use this Skill
2.OA.1 CCR.OA.B	Use addition and subtraction within 100 to solve one- and two-step word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem).	Determine number of pieces of candy for party favor bags at a birthday party.
2.OA.5 CCR.OA.B	Interpret products of whole numbers (e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each). For example, describe a context in which a total number of objects can be expressed as 5×7 .	Calculate the total number of chairs in the audience for the workshop.
2.OA.7 CCR.OA.B	Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities (e.g., by using drawings and equations with a symbol for the unknown number to represent the problem).	Determine number of hours available to visit each worksite location in a 40 hour work week.
2.OA.10 CCR.OA.B	Understand division as an unknown-factor problem. For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.	Calculate number of buses needed for employees to go to the company picnic.
2.NBT.3 CCR.NBT.B	Read and write numbers to 1000 using base-ten numerals, number names, and expanded form.	Write checks to pay monthly bills.
2.NBT.10 CCR.NBT.B	Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.	Calculate the amount of baseboard needed for a house.
2.NF.3 CCR.NF.B	<p>Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.</p> <p>b. Understand two fractions as equivalent (equal) if they are the same size or the same point on a number line.</p> <p>d. Recognize and generate simple equivalent fractions (e.g., $1/2 = 2/4$, $4/6 = 2/3$). Explain why the fractions are equivalent (e.g., by using a visual fraction model).</p> <p>e. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. Examples: Express 3 in the form $3 = 3/1$; recognize that $6/1 = 6$; locate $4/4$ and 1 at the same point of a number line diagram.</p> <p>Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole.</p>	Compare the amount of ingredients for a cookie recipe.

2.MD.1	Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	Measure the width of a house to determine the number of bushes needed.
2.MD.9 CCR.MD.B	Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i>	Create a graph that shows what transportation people use to get to work.
2.MD.13 CCR.MD.B	Recognize area as an attribute of plane figures and understand concepts of area measurement. b. A square with side length 1 unit, called “a unit square,” is said to have “one square unit” of area, and can be used to measure area. A plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.	Determine amount of flooring needed.

3.OA.3 CCR.OA.C	Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	Estimate and then calculate the cost of a holiday meal.
3.NBT.3 CCR.NBT.C	Use place value understanding to round multi-digit whole numbers to any place.	Round expense items on a budget.
3.NBT.6 CCR.NBT.C	Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	Calculate average speed driven on a trip.
3.NBT.12 CCR.NBT.C	Use place value understanding to round decimals to any place.	Round the cost of food items to determine if there is enough cash to buy all of them.
3.NF.3 CCR.NF.C	<p>Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$.</p> <ol style="list-style-type: none"> a. Understand addition and subtraction of fractions as joining and separating parts referring to the same whole. b. Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions (e.g., by using a visual fraction model). Examples: $3/8 = 1/8 + 1/8 + 1/8$; $3/8 = 1/8 + 2/8$; $2\ 1/8 = 1 + 1 + 1/8 = 8/8 + 8/8 + 1/8$. c. Add and subtract mixed numbers with like denominators (e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction). <p>Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators (e.g., by using visual fraction models and equations to represent the problem).</p>	Calculate the number of pies left after serving desert.

3.NF.6 CCR.NF.C	Use decimal notation for fractions with denominators 10 or 100. For example, rewrite 0.62 as $\frac{62}{100}$; describe a length as 0.62 meters; locate 0.62 on a number line diagram.	Determine if the deli is accurately filling orders based on customer requests.
3.MD.1 CCR.MD.C	Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb., oz.; l, ml; hr., min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. For example: Know that 1 ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36).	Follow the growth chart of a baby for one year.
3.MD.2 CCR.MD.C	Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.	Convert temperature from Celsius to Fahrenheit and Fahrenheit to Celsius.
3.MD.3 CCR.MD.C	Apply the area and perimeter formulas for rectangles in real world and mathematical problems. For example, find the width of a rectangular room given the area of the flooring and the length, by viewing the area formula as a multiplication equation with an unknown factor.	Determine the area of a garden and the amount of fencing to put around it.
3.G.4	Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).	Graph the daily high temperatures for the month of July.
3.G.5	Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.	Graph each family member's data use on smart phone for one month to determine who and when the most data is used.

4.NS.2 CCR.NS.C	Fluently divide multi-digit numbers using the standard algorithm (long division).	Calculate monthly life insurance premiums.
4.NS.3 CCR.NS.C	Fluently add, subtract, multiply, and divide multi-digit decimals using the standard algorithm for each operation.	Calculate a monthly car payment for 4, 5, and 6 years.
4.NS.5 CCR.NS.D	Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, debits/credits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation.	Determine the difference in temperature between the actual temperature and the wind chill.
4.EE.6 CCR.EE.C	Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number or, depending on the purpose at hand, any number in a specified set. Alignment of the Illinois ABE/ASE Language Arts Content Standards and the Illinois ESL Content Standards

This appendix contains an alignment of applicable standards from the 2014 edition of the Illinois ABE/ASE Language Arts Content Standards with the Illinois ESL Content Standards. This alignment may be useful to programs in designing curricula for ELLs who will transition from ESL instruction to ABE/ASE instruction, or for ABE/ASE instructors who have ELLs in their classrooms.

The Illinois ABE/ASE Language Arts Content Standards incorporate standards from four key initiatives, each designed to promote student transition to postsecondary education, career education, or the workplace. These initiatives are:

- The Common Core State Standards¹¹
- The College and Career Readiness (CCR) Standards for Adult Education States¹²
- Career Clusters Initiative Essential Knowledge and Skill Statements (ESS)¹³
- International Society for Technology in Education's National Educational Technology Standards for Students (NETS•S)¹⁴

The Common Core State Standards Initiative

This initiative is a state-led effort to establish a shared set of clear educational standards for English language arts and mathematics that states can voluntarily adopt. The standards have been informed by the best available evidence and designed by a diverse group of teachers, experts, parents, and school administrators. These standards are designed to ensure that students graduating from high school are prepared to go to college or enter the workforce. The standards are benchmarked to international standards to guarantee that students are competitive in the emerging global marketplace. The Illinois State Board of Education adopted the Common Core State Standards for elementary and secondary education in June 2010.

The College and Career Readiness (CCR) Standards for Adult Education

In April 2013, the U.S. Department of Education, Office of Career, Technical and Adult Education (OCTAE), released the highly-anticipated report, College and Career Readiness (CCR) Standards for Adult Education. The report was the result of a nine-month process that examined the Common Core State Standards from the perspective of adult education. It was funded to provide a set of manageable yet significant CCR standards that reflect broad agreement among subject matter experts in adult education about what is desirable for adult students to know to be prepared for the rigors of postsecondary education and training.

Career Cluster™ Knowledge and Skills

The 2008 National Career Cluster® Knowledge and Skills statements are a comprehensive collection of industry-validated expectations of what students should know and be able to do after completing instruction in a career program area. These statements reflect the expectations of postsecondary education and business and industry for entering into a career in a given area—and are used to guide curriculum development, assessment, and program planning.

TESOL Standards for Adult Education ESL Programs

The standards on this and the next two pages are from *Standards for Adult Education ESL Programs*¹⁵. This document defines the components of a quality adult education ESL program in nine areas:

1. Program Structure, Administration, and Planning
2. Curriculum and Instructional Materials
3. Instruction
4. Learner Recruitment, Intake, and Orientation
5. Learner Retention and Transition
6. Assessment and Learner Gains
7. Employment Conditions and Staffing
8. Professional Development and Staff Evaluation
9. Support Services

These standards were developed by a diverse group of adult education ESL teachers, administrators, and researchers from across the United States. Reprinted here are two sections that served as the guiding principles in the design of the Illinois ESL Content Standards: *Standards for Curriculum and Instructional Materials* and *Standards for Instruction*.

Standards for Curriculum and Instructional Materials

- A. The program has a process for developing curriculum that is based on a needs assessment of learners and includes participation and input from other stakeholders.
- B. The curriculum reflects the mission and philosophy of the program and is compatible with principles of second language acquisition for adult learners.
- C. The curriculum includes goals, objectives, outcomes, approaches, methods, activities, materials, technological resources, and evaluation measures that are appropriate for meeting learners' needs and goals.
- D. The curriculum specifies measurable learning objectives for each instructional offering for learners and is appropriate for learners in multilevel classes.
- E. The curriculum and instructional materials are easily accessible, up to date, appropriate for adult learners, culturally sensitive, oriented to the language and literacy needs of the learners, and suitable for a variety of learning styles.
- F. The program has an ongoing process for curriculum revision in response to the changing needs of the learners, community, and policies.

Standards for Instruction

- A. Instructional activities adhere to principles of adult learning and language acquisition. These principles include the following:
- Adult learners bring a variety of experiences, skills, and knowledge to the classroom that need to be acknowledged and included in lessons.
 - Language acquisition is facilitated through providing a nonthreatening environment in which learners feel comfortable and self-confident and are encouraged to take risks to use the target language.
 - Adult learners progress more rapidly when the content is relevant to their lives.
 - Language learning is cyclical, not linear, so learning objectives need to be recycled in a variety of contexts.
- B. Instructional approaches are varied to meet the needs of adult learners with diverse educational and cultural backgrounds. Examples of these approaches include, but are not limited to, the following:
- grammar-based
focus on the basic structure of language, e.g., grammar, vocabulary, and pronunciation
 - competency-based or functional context
focus on application of specific basic language skills in areas needed to function in everyday life or at work
 - whole language
integrated approach using listening, speaking, reading, and writing in thematic contexts often introduced through learner-generated content
 - participatory
focus on developing language and literacy skills to facilitate personal empowerment, community involvement, and social change
 - content-based
focus on developing language to support learner success in specific content areas, such as citizenship or vocational training
 - project-based
focus on developing language through collaborative work with the goal of completing a task or developing a product
- C. Instructional activities engage learners so that they take an active role in the learning process.

- D. Instructional activities focus on the acquisition of communication skills necessary for learners to function within the classroom, outside the classroom, or in other educational programs (e.g., ABE, HSE preparation, postsecondary education, vocational training programs).
- E. Instructional activities integrate the four language skills (listening, speaking, reading, and writing), focusing on receptive and productive skills appropriate to learners' needs.
- F. Instructional activities are varied to address the different learning styles (e.g., aural, oral, visual, kinesthetic) and special learning needs of the learners.
- G. Instructional activities incorporate grouping strategies and interactive tasks that facilitate the development of authentic communication skills. These include cooperative learning, information gap activities, role plays, simulations, problem solving, and problem posing.
- H. Instructional activities take into account the needs of multilevel groups of learners, particularly those with minimal literacy skills in their native language and English.
- I. Instructional activities focus on development of language and culturally appropriate behaviors needed for critical thinking, problem solving, team participation, and study skills.
- J. Instructional activities give learners opportunities to use authentic resources both inside and outside the classroom (e.g., newspapers, telephone books, school notices, library resources, community agencies, work sites, television, and the Internet).
- K. Instructional activities give learners opportunities to develop awareness of and competency in the use of appropriate technologies to meet lesson objectives.
- L. Instructional activities are culturally sensitive to the learners and integrate language and culture.
- M. Instructional activities prepare learners for formal and informal assessment situations, such as test taking, job interviews, and keeping personal learning records.

History of ESL Content Standards Development in Illinois

The first edition of the Illinois ESL Content Standards (2007) was the result of several federal and state initiatives that addressed the need for content standards in adult education programs. The Illinois standards were the outcome of a three-year process that included development and review by the field, including Illinois ESL coordinators, instructors, and students.

A Blueprint for Preparing America's Future

This federal document, published in 2003 by the U.S. Department of Education, Office of Vocational and Adult Education (OVAE), indicated that all federally funded adult education programs would need to develop content standards for accountability purposes.

The Adult Education Content Standards Consortia and Online Warehouse Project

This federal project was funded in 2003 by OVAE to assist states in developing content standards for adult education. Fourteen states, including Illinois, participated in the Consortia, which provided information, technical assistance, and the opportunity to network with other states in the process of developing content standards. The Consortia provided much of the background and research used to develop the Illinois ESL Content Standards.

The Illinois ESL Task Force

In spring 2003, this ongoing task force of Illinois ESL professionals began to discuss the need for a common language in the state regarding ESL class levels and the content taught at each level. The ESL Task Force conducted an initial review of existing ESL content standards from other states and made recommendations about the format and the content of the document.

The Illinois ESL Content Standards Work Group

Thirteen experienced ESL instructors and coordinators from twelve Illinois ESL programs worked from May 2004 through June 2005 to develop the initial draft of the Illinois ESL Content Standards. This draft was then reviewed by the field.

Illinois ESL Program Review

During the summer of 2005, instructors and ESL students at all NRS levels and from nine Illinois adult ESL programs reviewed the draft document. Feedback was gathered via focus groups and evaluation surveys. Revisions were then made from the data gathered in this review process.

Field Test

The final phase of the Illinois ESL Content Standards development process was the field test. Twenty-two instructors in 15 Illinois ESL programs agreed to use the draft standards as the primary focus for their ESL classes for four months (January-April, 2006). All NRS levels were represented in the field test classrooms, and both new and experienced instructors participated. After completion of the field test, the results were incorporated into the final document. Sample lesson plans developed by the field test instructors are included in Section 4.

The ESL Curriculum Institutes

In order to implement the 2007 Illinois ESL Content Standards, program administrators and instructors participated in intensive professional development on implementation of the standards. These professional development sessions, called the *ESL Curriculum Institutes*, were multi-day workshops that addressed curriculum design, instructional materials, instructional techniques, and ongoing assessment strategies related to the standards. Twelve *ESL Curriculum Institutes* were held between 2007 and 2009, and all ICCB programs offering ESL classes participated in the Institutes.

Guiding Principles for the 2007 Illinois ESL Content Standards

The ESL educators who developed the first edition of the Illinois ESL Content Standards (2007) based them in part on a set of assumptions about adult ESL learners and effective ESL instruction. These are summarized in *Standards for Adult Education ESL Programs* published by the TESOL International Association. Two sections--*Standards for Curriculum and Instructional Materials* and *Standards for Instruction*--are included in Appendix D. These are part of a standards-based approach to evaluating effective adult ESL programs and served as guiding principles in the design of the 2007 Illinois ESL Content Standards.
