

Resources to Aide HVACR Educators

Due to the World Health Organization declaring COVID-19 a global pandemic, mass gatherings including school is being postponed. This leaves many HVACR educational programs scrambling to put together online content, while still bringing high-quality education to their students.

The ESCO Institute and its educational partners have quickly assembled the resources to aide HVACR educators in offering online content and maintaining a sound HVACR program. This online content comes in the form of FREE webinars as wells as online content for instructors to use.

Free Webinars for Students & Instructors

The ESCO Institute will be hosting a series of FREE webinars to help HVACR students learn the core competencies required of entry level technicians and fill in many of the gaps created by not being in class. These webinars will be conducted by members of the ESCO Institute, HVAC Excellence, COSA and dedicated industry partners.

Free use of Content for Instructors

For a limited time, our most popular instructor resources (PowerPoint presentation & instructor supplements) that correlate to our publications will be available to our proctors, FREE OF CHARGE. This material can be utilized in online classes being offered by instructors, using their LMS, or online training portals. To access these downloadable files, go to the Resource Center after you have logged into the www.escogroup.org website.

Digital Content

We would also like to remind you that many of our publications are available digitally through Redshelf, Google Books, Vital Source and Kindle. Please contact us if you need assistance finding these items in these digital platforms. (Or go to the online store, find the product and look for the digital edition link in the product description.)

ESCO Institute understands this is an unprecedented time for everyone. We are here to help HVACR instructors get access to the content and materials needed to teach their classes remotely. As we continue to add resources and tools for instructors, we suggest you visit www.escogroup.org regularly, to keep apprised of new resources as they are added, including remote testing options for students (coming soon).

Sincerely,
