PATH Project Design

Purpose:
1) To create, support, and expand the opportunities of individuals in the nursing pathway and select healthcare pathways to obtain credentials and degrees that allow them to advance.

2) To meet shortages of workers in the healthcare industry that have been exacerbated by the COVID 19 pandemic.

Goal:
Increase completion in healthcare programs by 15% (approx. +15,000 completions). Sustained through FY2024-2027.

Areas of Healthcare Workforce Issues

- Training and Education
- Licensure
- Scope of Practice
- Telehealth
- Wages, Benefits, and Rights
- Recruitment and Retention
Completion Targets

• Original Completion Target (representing 15% growth)- based upon data from annually submitted student-level information by each community college in the Annual Completions submission (AY20).

• Reflective of only credit-bearing programs.

• Completion targets MAY be met with non-credit completions in eligible PATH programs that culminate in an industry-recognized credential.

• A student is considered a completer if they complete an eligible PATH program in the AY for which the grant is active.
  • May be duplicated (completes multiple programs in one AY).
  • May include students who began a program prior to the AY for which the grant is being implemented.
PATH Project Design modeled after WEI

Target Population

- Incumbent workers.
- New, entering students on a nursing or healthcare pathway with an identified need for support and an intention to continue their employment in Illinois.
- Low-income, first generation, and minority students as a subset of both above categories.
