

# Priority Programs

- Electrical Engineering Technology
- Mechatronics
- Electrical Technology
- Manufacturing Engineering Technology
- Alternative Fuel Vehicle Technology
- High Voltage Battery Technology
- Automotive Technology
- Software Development
- Programs aligned to industry certifications (e.g. TESLA Independent Repair Certified).
- Programs that advance the development and maintenance of EV charging infrastructure.
- Other programs of interest are identified in the Illinois Clean Energy Jobs and Training Program Inventory.
- Proposals will be evaluated with a focus on high demand areas, a sound labor market argument to meet statewide need and capacity for college's focusing in those areas, and the ability to effectively accelerate training.
- It should be noted that the ICCB program approval process requires a labor market focused argument for program approval.
